

Decolonization in Canadian biochemistry departments

A desk survey of what 89 Canadian universities and their biochemistry-like units have published online. Prepared for Michael Hallett, Western University, by Mummured agents (conscience, bookworm, artist, lawyer, adversary). Survey date 5 October 2026. Version 2 (Part II added the same day).

Read this first. This survey records what each university and department has *published online*. It cannot show what happens in classrooms and labs that is not written up. "None found" means we found no public documentation after the search described in section 2. It does not mean no effort exists. The survey records no scores and no rankings. It records institutions' own descriptions of their relationships with First Nations, Métis and Inuit communities, and does not record those communities' views except where a community has published them.

Contents

1. Summary	2
2. How the survey was done	2
3. Coverage: which universities we found	3
4. Question 1: Does the department have a concerted effort?	4
5. Question 2: Is decolonization defined?	9
6. Question 3: Activities, events and efforts	10
7. Questions 4 and 6: Reviews of courses, research and materials	10
8. Question 5: Distinctive aspects	14
9. Question 7: Relationships with First Nations, Métis and Inuit communities	18
10. Question 8: Courses with decolonization or Indigenous content	23
10.1 Department-owned biochemistry or chemistry courses with Indigenous content	24
10.2 Faculty-of-science courses that biochemistry programs require or list	24
10.3 University-wide requirements that reach biochemistry students	25
10.4 Ethics, history and "science and society" courses inside biochemistry programs	25
10.5 Approaches documented in the published literature (sector)	25
11. Question 9: Disagreement, criticism and resistance	26
11A. Disputes about decolonization and Indigenization	26
11B. Adjacent disputes, recorded unevenly	27
12. Per-university summaries	27
13. What the reviewers said	35
14. Limits, and what would improve the survey	35
15. Textbooks named on public pages for Canadian biochemistry programs	37
15.0 Coverage by university	37
15.1 Textbooks named by two or more units (alphabetical; current textbooks only)	38
15.2 Year 1	39
15.3 Year 2	40
15.4 Year 3	45
15.5 Year 4	51
15.6 Graduate	54
15.7 Year not stated	54
16. Legal review: scanning textbooks and course curricula	55
17. Western's biochemistry courses: decolonization evaluation and suggestions	56
17.1 What the course documents show, at department level	56
17.2 The department's phased plan, as it describes it	57
17.3 Suggestions for the future (provisional)	57
18. Reviews of Part II	58
19. Glossary	58
Appendix A. Coverage and unit identification	64
Appendix B. Activities (Q3)	66
Appendix C. Courses (Q8)	72
Appendix D. Disagreement and criticism (Q9)	88
Appendix E. Territorial acknowledgements (recorded, not counted)	106
Appendix F. Files	110
Appendix G. Internal working tables (not for circulation)	110
G.1 Western biochemistry courses, one row per course (conscience review, 2026-10-05)	111
G.2 Western biochemistry courses: proposals by year of study (conscience design, provisional; two rows annotated after the adversary's audit)	112
G.3 Courses in the textbook inventory for which no public page names a text	113

1. Summary

What the survey covered. We looked at 89 universities in all ten provinces and Yukon. We found a biochemistry department, or the nearest unit that teaches biochemistry, at 66 of them (67 counting First Nations University of Canada, which has its own profile outside the counts). At 14 we confirmed there is no chemistry or biochemistry unit, and at 7 more we found the institution but could not reach a unit page. One site (Royal Roads) could not be read at all.

What biochemistry units themselves publish. Very little. Among the 41 units at 40 universities that are a biochemistry department, a combined department, a biochemistry program inside a department, or a merged unit, one publishes its own concerted effort on decolonization: the Department of Biochemistry at Western University, with a five-phase plan, a committee whose remit names decolonization, and its own definition. Four publish a statement that names decolonization or reconciliation without a documented activity behind it (Guelph's Molecular and Cellular Biology, Winnipeg's Chemistry, Waterloo's Chemistry, Bishop's Biology and Biochemistry). So 5 of 41 units publish anything of their own on the topic. Fifteen point to a faculty or university plan, either because their page links to it or because the plan's own text binds every unit. Twenty-one publish nothing on the topic at department level that we could find, and for those the university's framework is recorded instead. Toronto Metropolitan University's Department of Chemistry and Biology, a nearest-equivalent unit outside that pool, has a committee and resource hub whose first listed area is Indigenous Knowledges; it is coded statement only because the page read does not use the words decolonization, Indigenization or reconciliation, pending a verbatim read of the hub.

Where the work lives. Almost everything we found lives at the university level: Indigenous strategic plans, TRC task forces, Indigenous course requirements, advisory circles of Elders, and relationships with named First Nations. Units inside medical schools also inherit faculty-level Indigenous health programs. Biochemistry departments rarely add anything of their own.

Definitions. Only one biochemistry unit, Western's, publishes its own definition of decolonization; McMaster's department adopts the Truth and Reconciliation Commission's framing. Institution-level definitions exist at NOSM University, the University of Lethbridge and Yukon University, and Laurier adopts a published three-part definition of Indigenization. Most pages use the words "decolonization", "Indigenization" and "reconciliation" without defining them, and the words are not interchangeable.

Courses. In the calendars we read, no biochemistry department course carries decolonization in its calendar description. Five department-owned courses at three universities carry Indigenous content: Regina's BIOC 200 (medicinal plants and culture) and CHEM 101, Brock's CHEM 3P63 (Indigenous medicine and medicinal chemistry), and Memorial's HUBI 3004 and 3005. The main route by which Indigenous content reaches biochemistry students is a university-wide Indigenous course requirement (Winnipeg, Trent, Lakehead, Canadian Mennonite, UPEI, Saskatchewan's College of Arts and Science) or, at Windsor, a list of Indigenous Studies courses written into every Honours Biochemistry program, one of which must be taken. These statements cover the calendars we could read: seven found units had no calendar scan at all (Fraser Valley, Trinity Western, Mount Royal, Athabasca, Concordia Edmonton, Brandon, UQAM), and McMaster's and UNBC's calendars could not be read.

Reviews of courses and materials. Four institutions describe a course-review process that is operating: Saskatchewan's and Winnipeg's committees that review courses for their Indigenous requirements, UQO's adviser who reviews course outlines on request, and Western's departmental review of its own teaching, the only department-level process we found, still in progress. Fifteen of the 41 pooled units (20 over all 90 rows) sit under a plan or recommendation to review programs that has not yet been documented as applied to biochemistry. Indigenous course requirements (Trent, Lakehead and others) designate courses rather than review them, and are reported under courses, not reviews. Reviews of textbooks were not found anywhere; the nearest things are reading lists and instructor toolkits (Windsor, Carleton, Concordia, Laval, UQTR, Moncton).

Disagreement. We recorded 127 published criticisms and positions, of which 103 are about decolonization or Indigenization, 23 are about adjacent disputes (equity hiring, EDI statements, identity verification) that we report separately because our coverage of them was uneven, and 1 is peripheral. Eight further rows were recorded but set aside on counsel's advice as outside scope. The main disputes are: whether "Indigenous science" or "ways of knowing" belong in science teaching; whether mandatory Indigenous courses are box-ticking; whether hiring restricted to Indigenous or Black scholars and required EDI statements violate the merit principle; how universities should verify Indigenous identity; and whether land acknowledgements are empty gestures or, as critics of the UBC court petition say, statements of legal fact. One case happened inside a chemistry department: the 2020 essay by Brock chemistry professor Tomas Hudlicky, withdrawn by the journal, and the responses to it. The 2021 dismissal of Mount Royal professor Frances Widdowson is the academic-freedom case that recurs most often in the sources we could reach; the university said the case concerned harassment, not academic freedom, and the faculty association said it concerned academic freedom. One source family (the Society for Academic Freedom and Scholarship) is over-represented because its archive is easy to fetch, so counts by direction are not a measure of opinion.

2. How the survey was done

Frame. The 89 institutions are the degree-granting universities of Canada's ten provinces plus Yukon University, as listed in our seed file. Our frame is universities with a biochemistry-like unit. We found none in the Northwest Territories or Nunavut: Aurora College grants a nursing degree but lists no science unit, its polytechnic plan was paused in 2024, and a proposed Inuit-led university (Inuit Nunangat University, planned for 2030) is not yet established. Those statements rest on institutional pages and Wikipedia and should be confirmed against the institutions' or governments' own pages. The gap falls hardest on Inuit-relevant institutions, and the map says "no institution in survey frame" rather than showing an empty North. Northern communities do appear in other universities' rows (Ottawa's Inuit physicians program with Nunavut partners; UQAR's research with Nunavut communities).

Finding the right unit. Not every university has a "Department of Biochemistry". We used a six-step ladder and recorded which step applied: an exact match (12 units), a combined name such as "Chemistry and Biochemistry" (13), a biochemistry program inside another department (12), a merged or renamed unit such as Guelph's Molecular and Cellular Biology or Memorial's Human Biosciences (4; Queen's Biomedical and Molecular Sciences is coded as a program within a department because no page confirms the merger), the nearest equivalent, usually a chemistry department (30), or no equivalent (19). Summary counts in this report pool only the first four steps, as the survey design requires: 41 units at 40 universities (Manitoba has two pooled units, Biochemistry and Medical Genetics in medicine and Chemistry in science, which jointly offers the biochemistry degree). Nearest-equivalent units are shown but not pooled.

The nine questions. The conscience agent wrote a coding scheme before any searching began. Every field has a closed vocabulary. A field may only be filled from a quote on a page we read, with its URL and date. Inferences were kept in a separate note that no table uses. Territorial acknowledgements were recorded but not

counted as an effort, because they are statements, and often boilerplate, not activities.

Two waves of search. Wave 1 (ten bookworm agents) read each unit's pages, its faculty's equity and Indigenous pages and the university's Indigenous plan, and began web searches in English and French; the search cap cut most of those searches short. Wave 2 (eleven agents) scanned academic calendars course by course, searched for course and materials reviews, searched for criticism and disagreement region by region, and re-read sites that had blocked the first pass. A session-wide cap of 200 web searches was exhausted early in each wave, so most of wave 2 worked by fetching pages directly. "Not assessable" in the tables means the search step could not be run; "none found" means the pages read carried nothing.

Checking the coding. Five universities (Western, Queen's, Université de Montréal, First Nations University, Cape Breton) were coded twice by independent agents. Compared with the main coding as released, the two coders agreed on 44% of the question codes (Cohen's kappa 0.30; 60% when "none found" and "not assessable" are merged) and on 56% of all 45 field comparisons. The sample is five universities, so the interval around these figures is wide. About half of the disagreements are about search depth (one coder could not run a search leg); the rest are substantive: which documentation-volume bin applies (four of five universities), whether a term counts as "used" when only the university uses it (three), whether Western's departmental plan is a course review, whether Mi'kmaw Ethics Watch counts as Cape Breton's research review, and what kind of unit Queen's is. The coding rules were tightened after the pilot, but no second pilot was run, so agreement under the final rules is unmeasured. "Term used, undefined" is the least reliable code and the documentation-volume bins should be read as rough. The adversary agent's view of this check is in section 13.

Review chain. The conscience designed the instrument, then reviewed the merged data before this report was written and required a set of recodes, which were applied with the original values kept in the spreadsheet. The artist drew the figures under rules that forbid ranking. The lawyer reviewed the disagreement table for naming and defamation risk. The adversary audited the whole report. Their verdicts are in section 13.

Disclosure. The PI is a member of Western University's Department of Biochemistry (confirmed by the PI). That department's rows were coded by the same protocol as all others. It was, however, read more deeply than most units: six or more pages and five newsletters, fetched verbatim rather than through the summarising tool, because its EDID committee publishes a newsletter. Its prominence in this report reflects what it publishes, and the reader should weigh the disclosure.

3. Coverage: which universities we found

Figure 1. Coverage of our search, not level of effort. One point per university, coloured by how much documentation we found for its biochemistry-like unit. Hollow markers are universities with no chemistry or biochemistry unit. First Nations University of Canada has its own profile (section 8) and is excluded from all counts. Nothing in this map should be read as a measure of effort.

Province	In frame	Site read	Biochemistry-like unit found
British Columbia	11	10	8
Alberta	11	11	6
Saskatchewan	3	3	2 (+1 FNUV)
Manitoba	5	5	5

Province	In frame	Site read	Biochemistry-like unit found
Ontario	28	28	21
Quebec	14	14	12
New Brunswick	5	5	3
Nova Scotia	9	9	6
Prince Edward Island	1	1	1
Newfoundland and Labrador	1	1	1
Yukon	1	1	1
Total	89	88	66 (+1 FNUniv)

"Unit found" counts universities whose biochemistry-like unit was coded as found (documented or minimal); First Nations University of Canada is shown in brackets and excluded. Sites that blocked automated reading were recovered from the Internet Archive (Brock, St. Francis Xavier, Winnipeg) or re-read with a browser user agent (McMaster, Ottawa, Toronto). Royal Roads could not be read at all. The full coverage table is Appendix A.

4. Question 1: Does the department have a concerted effort?

Where documented effort is located, by faculty home

† cell with 1-4 units: read as presence, not as a proportion. Categories are not ordered by count; counts describe documents found, not effort made.
Source: desk survey of public web pages, 2026-10-05

Figure 2. Where documented effort is located (the Q1 code), for the 41 units at 40 universities that are a biochemistry department, a combined department, a biochemistry program inside a department, or a merged unit. Departmental pages describing a concrete activity were found for 1 unit, a statement without a documented activity for 4, and for 15 the effort sits with the faculty or university; for 21 nothing was found. "Relies on faculty or university" is a finding about where the effort lives, not a shortfall. Faculty-home groups are small (14 / 22 / 5) and cells under five are marked, so the figure describes documents located by a desk survey and is not a comparison between faculty types.

A "concerted effort" was coded only where a unit-authored page names decolonization, Indigenization or reconciliation and shows at least one documented activity behind it that is about one of those three things: a committee whose remit names them, a plan, a dated workshop, a hire. Words alone were coded "statement only". An equity committee whose remit does not name any of the three was not counted, and neither was guidance on land acknowledgements. "Relies on faculty or university" was coded only where the unit's page points to the framework or the framework's own text binds every unit. The conscience's review found that the first-pass coding had applied these rules unevenly across regions, and the recodes it required are applied here; the original codes are kept in the spreadsheet.

The counts below are for the 41 pooled units at 40 universities (Figure 2). Over all 90 unit rows, including nearest-equivalent chemistry departments and institutions with no unit, the pattern is the same: 1 concerted, 5 statement only, 22 pointing to a plan, 54 nothing found at department level (of which 15 are institutions with no unit to search), 8 not assessable.

One unit with its own concerted effort.

- **Western University, Department of Biochemistry.** An EDID committee (Equity, Diversity, Inclusion and Decolonization), created in February 2022 and renamed in January 2024, runs a five-phase plan to decolonize the department's teaching: grounding, interrogation, new learning, commitment, and rebuilding. It has run about a dozen workshops since 2024, including "Interrogating our Origins: Colonial Legacies", "History of and Knowledge in

Biochemistry", "Beyond Euro-Western Perspectives", "Decolonial Curricula" and "Naming Changes" (a workshop for naming the changes members want to see, not about eponyms). It keeps a resource hub, posts a monthly "decolonization factoid" in the graduate student newsletter, and ran an anonymous survey on the changes members want to see in the department's teaching. As of September 2026 it is in the rebuilding phase with a working group. No page yet documents which courses changed. **Four units with a statement only.**

- **University of Guelph, Department of Molecular and Cellular Biology.** An EDI committee and an EDI statement that says: "In the spirit of reconciliation, we will also strive to develop and enhance existing Indigenous relationships." The committee wrote guidance for land acknowledgements in theses, seminars and lectures. The department's word is reconciliation; it does not use decolonization. Coded statement only because the committee is an EDI committee and the one activity found is acknowledgement guidance.
- **University of Winnipeg, Department of Chemistry.** A 2021 project, "Indigenizing Chemistry at The University of Winnipeg", funded by the Royal Society of Chemistry and led by two faculty members, one of whom is quoted saying "Indigenizing chemistry is an important step toward reconciliation." Coded statement only because the evidence is one university news announcement and no output of the project was found; the courses it hoped to create are not in the 2026 calendar.
- **University of Waterloo, Department of Chemistry.** A page titled "Equity, Diversity, Decolonization, and Inclusion" with a statement, a territorial acknowledgement and links out to faculty and university resources.
- **Bishop's University, Department of Biology and Biochemistry.** A job posting that says members "recognize the efforts we must all make in pursuit of reconciliation and decolonization".

Fifteen pooled units that point to a faculty or university plan (22 over all 90 rows). This is a legitimate location of effort, not a shortfall, and it is recorded only where a link exists: the unit's page points to the framework, or the framework's own text binds every unit. Examples of what these units point to: the University of Alberta's "Braiding Past, Present and Future"; Calgary's "ii' taa'poh'to'p"; Saskatchewan's "ê-pimohtêyahk, We Are Walking Together"; Manitoba's "Truth and Reconciliation Framework", which asks every unit to write its own action plan; McGill's 52 Calls to Action from the Provost's Task Force; Université de Montréal's "Place aux Premiers Peuples, Réconciliation et décolonisation à l'UdeM"; Laval's "Vers un portage collaboratif"; Laurier's Indigenous Strategic Plan, which names three kinds of Indigenization after Gaudry and Lorenz; York's "Decolonizing, Equity, Diversity and Inclusion Strategy"; and NOSM's "Strengthening Our Relations". Units inside medical schools (UBC, Alberta, Calgary, Saskatchewan, Manitoba, Toronto, McMaster, Western, Ottawa, Queen's, McGill, Montréal, Sherbrooke, Dalhousie) also sit under faculty Indigenous health programs that answer TRC Call to Action 24.

Twenty-one pooled units with no department page on the topic (54 over all 90 rows) include large exact-match departments: Toronto, Ottawa, Dalhousie, Carleton, SFU, Montréal, Laval, Sherbrooke, Queen's and Memorial. For several Quebec and Atlantic units the first-pass coders had written "relies on the university" where no link was stated, and the conscience's review recoded them so that the same evidence gets the same code in every region. For each, the university framework is recorded in the table so the row says what exists. The sentence for these units is: we found no department page on this topic; the university's framework is recorded. The adversary's audit notes three "relies on" codes that rest on a framework binding every unit rather than on a link from the unit's page (Alberta, Lakehead, NOSM); they are kept because the design allows that, and the evidence column says which it is.

ID	University	Q1 where the effort is located	Q1 located at	Q1 named framework	Q2 definition	Q2 terms used

5. Question 2: Is decolonization defined?

Definitions are rare. The table above gives the code for every unit. The definitions we found, quoted:

Under the rule the conscience set at review, "own definition" means the unit's own page gives a definition; institution-level definitions are recorded against the unit as the source it sits under, not as the unit's own. On that rule one unit has its own definition and one adopts an external framing.

- **Western, Department of Biochemistry (own definition):** "Decolonization - cultural, psychological, and economic freedom for Indigenous people with the goal of achieving Indigenous sovereignty -- the right and ability of Indigenous people to practice self-determination over their land, cultures, and political and economic systems."
- **McMaster, Department of Biochemistry and Biomedical Sciences (adopts external):** the unit's page states "a reconciliation based approach as documented by the Truth and Reconciliation Commission of Canada".
- **NOSM University (institution level):** "Decolonization is not a metaphor for our ongoing efforts to realize our social accountability mandate or achieving social justice, but rather a process of self-reflection to understand and change our own colonial practices."

- **University of Lethbridge (institution level, Indigenization):** "Indigenization, in the context of ULethbridge, refers to the inclusion of Indigenous worldviews and perspectives in University programming, supports and activities through consultation and engagement with Indigenous communities."
- **Yukon University (adopts a framework definition):** decolonization is "the practice of 'reclaiming our good mind'. In academic spaces, the invitation towards decolonizing our systems is to fundamentally reorient knowledge production".
- **Laurier (adopts Gaudry and Lorenz 2018):** three kinds of Indigenization: "Inclusion Indigenization", "Reconciliation Indigenization: Bridging common ground on Indigenous and Western ways of knowing", and decolonial Indigenization, with the plan's own note that inclusion alone "can be a token gesture".
- **Laurentian (through Anishinaabemowin):** reconciliation explained as "aanji naakgonimon gaa-aanseg: to rebuild something that has been broken".
- **Simon Fraser (university curriculum page):** defines Indigenizing the curriculum and decolonization at university level; the MBB department uses the words without definition.

Most francophone institutions use *réconciliation* most often; *décolonisation* and *autochtonisation* appear in plans (Montréal, UQAM, UQO, Moncton, Sherbrooke) but are not defined. UQAT's plan says plainly that terms such as "sécurisation culturelle" are "des exemples de termes dont la définition et l'utilisation restent à convenir" [our translation: examples of terms whose definition and use remain to be agreed].

6. Question 3: Activities, events and efforts

We recorded 207 activities. Thirty-two of them are equity activities whose text names none of decolonization, Indigenization, reconciliation or an Indigenous topic; they are kept in the table but flagged, and not counted here. Of the 175 that do name one of those topics, 15 are department-level (most of them Western's), 39 faculty-level and 121 university-level. These counts are over all 90 unit rows. Department- and faculty-level activities that reach biochemistry members:

- **Western Biochemistry:** the workshop series above; the EDID committee's discussions of the Centre for Teaching and Learning's Indigenous Teaching and Learning modules; a talk from the Office of Indigenous Initiatives; the resource hub, newsletter factoids and anonymous survey. Schulich's Office of Equity and Social Accountability adds "Mushkiki Miikan - Pathways to Medicine" and an inclusive-curriculum program.
- **UBC Biochemistry and Molecular Biology:** an EDI committee of undergraduates, graduate students, postdocs, staff and faculty (equity remit; flagged). UBC's Chemistry department, a different unit in the same faculty, runs the "Indigenous Chemistry Connections" learning hub for anyone Indigenizing chemistry courses.
- **Toronto Biochemistry:** a WIDE committee (Wellness, Inclusion, Diversity and Equity; equity remit, flagged); the Temerty Faculty of Medicine's Office of Indigenous Health and its Marguerite Hill Memorial Lecture on Indigenous Health.
- **McMaster Biochemistry and Biomedical Sciences:** the unit's EDI page points to the Faculty of Health Sciences' Indigenous Health Learning Lodge, its "Culture of Safety Online" course, an Indigenous health leadership program, and a facilitated admissions stream for First Nations, Inuit and Métis applicants. The Faculty of Science heard a talk on Indigenous science at its 2022 retreat and is installing art by an Anishinaabe (Algonquin) artist in the science building.
- **Guelph MCB:** EDI committee; land-acknowledgement guidance; the College of Biological Science's "Enhancing Indigenous Research in the Biological Sciences" initiative.
- **TMU Chemistry and Biology:** EDIA committee (nine members in 2026) and resource hub.
- **Waterloo Chemistry:** a department resource list; the Faculty of Science's embedded Science Indigenous Initiatives office, Indigenous Working Group and Indigenous Student Advisory Committee.
- **Windsor Chemistry and Biochemistry:** the Faculty of Science EDI Taskforce and its reading list "Decolonization in the Faculty of Science: A place to start", which has a Chemistry and Biochemistry section.
- **Carleton Institute of Biochemistry:** the Faculty of Science EDI Teaching Toolkit, a planned Indigenous Science faculty hire, and a planned Indigenous Research in Science program for Indigenous undergraduates.
- **Saskatchewan BMI:** the College of Medicine's Indigenous Health Committee and "Anti-Racist Transformation in Medical Education".
- **Calgary BMB:** the Faculty of Science Indigenous Pathway, whose review committee includes an Elder from a local community.
- **Victoria Molecular Life Sciences:** a Faculty of Science cluster hire of three Indigenous science scholars, cross-posted to six departments including this one.
- **Manitoba Chemistry:** the Faculty of Science's Wawatay Scholars cohort for Indigenous direct-entry students.
- **Saint Mary's Chemistry:** an IDEA committee with planned annual seminars and workshops.
- **McGill Biochemistry:** the Faculty's Indigenous Health Professions Program and recurring teaching-support sessions on "moyens d'autochtoniser leurs cours" [our translation: ways to Indigenize their courses].
- **Ottawa BMI:** the Faculty of Medicine's EDI seminar series (including Inuit health), an Indigenous Garden, and a medicine walk and talking circle.
- **Dalhousie Biochemistry:** the Faculty of Medicine's required "Introduction to Cultural Safety in Healthcare for Indigenous People".
- **UQAM Chemistry:** a 2023 faculty workshop, "Préparer le terrain : l'étape 0 d'un processus d'autochtonisation de l'enseignement".

The full activities table is Appendix B.

7. Questions 4 and 6: Reviews of courses, research and materials

What the survey coded, by question

Documentation found in a desk survey, not an adoption rate. The Q2 bar shows whether the word appears, not whether it is defined.

Units with exact, combined-name, program-within-department or merged/renamed match; nearest/no equivalent and First Nations University of Canada excluded. Segment order follows the coding scheme; colours are categories, not a scale. Source: desk survey of public web pages, 2026-10-05

Figure 4. For the 41 pooled units, what was coded on each question. The segments show the coded values, so a reader can see, for example, that one unit has a departmental concerted effort and 21 had none found, and that most course-review "yes" codes at faculty or university level are plans or recommendations rather than operating reviews. Read this as documentation found in a desk survey, not an adoption rate; the Q2 bar shows whether the word appears (most units use it without defining it), not whether it is defined, and "not assessable" means the search was not run.

Course and program reviews. The conscience's review split this question three ways, and the table carries the split in its status column.

- 1. A review described as operating (3 of the 41 pooled units; 4 over all 90 rows).** Saskatchewan's Indigenous Course Committee reviews Indigenous Learning Requirement courses every three years; Winnipeg's Senate committee reviews courses proposed for the Indigenous Course Requirement; UQO's teaching-centre adviser reviews course outlines and bibliographies on request; Western's department is reviewing its own teaching through its phased plan, with no course-level change yet documented. The first two review courses proposed for a designation, not biochemistry courses.
- 2. A review planned or recommended (15 of 41 pooled; 20 over all 90).** UBC's Indigenous Strategic Plan (every program to include Indigenous content in at least one course); SFU's Call to Action 22 (an Indigenous Curriculum Review Committee); Montréal's strategy 3.2.1 ("Considérer adapter les programmes d'études"); Laval's measures 2.4 and 2.5 (harmonizing Indigenous content already in programs); Sherbrooke's 2.1.3; Concordia's Action Plan, which "encourages all faculties and departments to undertake self-assessments on the inclusion of Indigenous perspectives in their course offerings"; Moncton's plan to "Décoloniser certains cours existants"; Alberta's provost "Guidelines: Indigenization, Decolonization, Responding to the TRC Calls to Action in Academic Programs and Curricula", which give prompts for anyone proposing a new or changed program. Whether these have been applied to a biochemistry program is not documented anywhere; "planned" here means the source says "will" or "should". TMU's periodic program review and York's DEDI Strategy (a recommendation to Senate, adoption not verified) are in this group.
- 3. Not a review (recoded).** Trent's and Lakehead's Indigenous course requirements are requirement mechanisms, not evaluations of courses, and are reported under courses (section 10, Question 8). Acadia's item is "for Senate consideration". UQTR's funded guide "pour décoloniser son plan de cours" is guidance,

reported under materials.

Research reviews. Thirteen of the 41 pooled units (15 over all 90 rows) sit under a stated Indigenous research review or advisory step. For Calgary, Concordia and Montréal the step is a plan, not an operating process. Because TCPS 2 Chapter 9 binds every institution that receives federal research-council funding, this count mostly measures which research-ethics pages happened to be read, not which institutions have such a step. Examples: UBC's research ethics board Indigenous review lens; SFU's Indigenous Research Committee; Dalhousie's requirement that researchers adhere to OCAP, Mi'kmaw Ethics Watch and TCPS 2 Chapter 9; StFX's "Research Ethics and Indigenous Peoples" page; UQAR's and UQTR's reference to TCPS 2 Chapter 9 and the APNQL protocol; Montréal's planned interfaculty ethics structure for Indigenous research; Concordia's planned Indigenous research policy aligned with TCPS and OCAP; Guelph's protocols. Mi'kmaw Ethics Watch is hosted at Cape Breton University but states it is autonomous, so it is not coded as CBU's review.

Textbooks and course materials. No textbook review was found at any institution. What exists is instructor-facing guidance: Windsor's reading list (three items on decolonizing chemistry teaching); Carleton's EDI Teaching Toolkit, which asks instructors to check class resources for insensitive content; Concordia's Centre for Teaching and Learning self-review prompts ("Whose voice/perspective is missing in your course design?"); Laval's plan to produce a guide for teachers and to revise library subject headings; UQO's adviser, the only materials review we found that is described as operating rather than planned; UQTR's funded guide "pour décoloniser son plan de cours"; Moncton's plan item "Décoloniser certains cours existants"; McGill's teaching knowledge base; Montréal's planned repertoire of Indigenous content. Western's department ran an anonymous survey in spring 2026 on the changes members want to see in its teaching (its "Naming Changes" workshop lists desired changes; it is not about eponyms), but no review of course materials is yet documented. For many units this question could not be searched at all, and the table says "not assessable" rather than "none found".

8. Question 5: Distinctive aspects

The bookworms recorded "notable" items; the conscience decided at the merge which are distinctive when set against every row in every table. An item is distinctive if no other row records the same kind of thing at the same level. Because some calendars could not be read in full (McMaster, UQTR, parts of Brock and Trent), each claim says "the only one we found", never "the only one".

Unit	Item	Why it is distinctive in this dataset
Western, Biochemistry	A five-phase department plan to decolonize the unit's own teaching, run by a committee whose remit names decolonization, with dated workshops, a resource hub and a department survey; the definition is printed on the department's page.	The only unit-authored decolonization plan we found, and the only unit-level definition. It is still pre-implementation: no course-level change is yet documented.
Windsor, Chemistry and Biochemistry	Every Honours Biochemistry variant (and Honours Chemistry) must include one of eleven Indigenous Studies courses (Winter 2027 calendar, p. 548).	The only requirement we found that is written into the biochemistry program's own degree rules. The others are university-wide (Winnipeg, Trent, Lakehead, UPEI) or college-wide (Saskatchewan).
Regina, Chemistry and Biochemistry; Brock, Chemistry	BIOC 200 <i>Medicinal Plants and Culture</i> ; CHEM 3P63 <i>Indigenous Medicine and Medicinal Chemistry</i> , where "Indigenous speakers discuss Indigenous medical practices".	BIOC 200 is the only biochemistry-coded course we found whose whole subject is Indigenous medicinal plants. CHEM 3P63 is the only course whose description says it is taught with Indigenous speakers. Memorial's HUBI 3004 mentions Indigenous medicines in one clause.
Cape Breton (university level)	The Integrative Science (MSIT) series: science-designated courses usable as BSc electives, each written as paired "Mi'kmaw world view" and "Western science" sections.	The only science-designated course series built on Two-Eyed Seeing. It sits at university level, not in the chemistry unit. CBU's calendar attributes the term to Elder Albert Marshall.
Manitoba, Faculty of Science	SCI 1100 and SCI 1200 (Wawatay), first-year courses "centering First Nations, Métis, and Inuit sciences alongside Western scientific approaches", restricted to the Wawatay cohort of Indigenous direct-entry students.	The only science-faculty courses we found designed for an Indigenous direct-entry cohort. Enrolment is restricted.
Yukon University, School of Science	The Science Certificate requires a Yukon First Nations core competency.	The only science credential we found with a stated Indigenous competency at program level. Yukon is a nearest-equivalent unit and is not pooled.
UQO, Département des sciences naturelles (university level)	A teaching-centre adviser on <i>autochtonisation et décolonisation</i> who reviews course outlines and bibliographies on request.	The only materials review we found that is described as operating rather than planned.
UQAR, Département de biologie, chimie et géographie	Two doctoral theses supervised in the department that "intègrent les savoirs autochtones au cœur de la démarche méthodologique" [our translation: place Indigenous knowledge at the heart of the methodology].	The only unit-level research item we found. Student names are withheld.

Notable but not distinctive. University-wide Indigenous course requirements at Winnipeg, Trent, Lakehead and UPEI are one pattern, reported as a group in section 10. UBC Chemistry's "Indigenous Chemistry Connections" hub belongs to a sister department of the biochemistry unit. Winnipeg's 2021 "Indigenizing Chemistry" project has no outputs found yet.

First Nations University of Canada describes itself as "a First Nations owned post-secondary institution" and "a federated college of the University of Regina", founded in 1976 as the Saskatchewan Indian Federated College and renamed in 2003. In its own words: "FNUUniv is a unique Canadian institution that specializes in Indigenous knowledge, providing post-secondary education for Indigenous and non-Indigenous students alike within a culturally supportive environment." Its Indigenous Knowledge and Science program says: "Our curriculum harmoniously blends 'textbook Science' with the wisdom of Elders and Knowledge Keepers," and describes "strong relationships with First Nations Elders and other Indigenous Knowledge keepers to better understand Indigenous Science, experiential learning and important oral traditions." The survey's questions ask how a department in a settler-founded university responds to colonization. They were not applied here, and FNUUniv is not included in any count, chart or comparison. These quotations came through the summarising fetch tool and should be checked against the live page before they are quoted onward.

ID	University	Q5 notable (quoted)
1_a	University of British Columbia	(paraphrase from fetch summary) Different department in the same university: UBC Chemistry runs a learning hub on Indigenizing chemistry courses (not BMB). — a learning hub for anybody engaged with Indigenizing chemistry < https://blogs.ubc.ca/indigenouchem/about/ >

ID	University	Q5 notable (quoted)
2_a	University of Victoria	Faculty of Science cluster hire of three Indigenous science scholars, cross-posted to six departments including this unit. — "The candidate has interest, potential or experience in either (a) working with Indigenous ways of knowing, or (b) in infusing Indigenous science approaches and perspectives into science." < https://csmb-scbm.ca/indigenous-science-scholar/ >
3_a	Simon Fraser University	(paraphrase from fetch summary) University-level Indigenous Curriculum Resource Centre in the SFU Library. — books, articles, websites and audio-visual materials on Indigenous curriculum and Indigenous pedagogy < https://www.sfu.ca/about/truth-reconciliation/our-actions/curriculum-innovation.html > A first-year Health Sciences course module on comparing scientific method with Indigenous knowledge-gathering (HSCI 100); different faculty from MBB. — how do we know? < https://sfu.ca/teaching-inquiry/project-archive/DT/G0272.html >
12_a	University of Alberta	University-level Faculty of Native Studies online microcredential course covering decolonizing methods in science (not a biochemistry-unit course) — "Learners are exposed to relational frameworks and nation-specific concepts that are guiding principles for producing, applying and governing knowledge" < https://www.ualberta.ca/en/native-studies/programs/continuing-education/indigenous-technoscience-microcredential/indigenous-peoples-as-scientists.html >
13_a	University of Calgary	Faculty of Science Indigenous Pathway whose review committee includes an Elder (faculty level) — "The Committee will include faculty members of the Faculty of Science who are Indigenous or have expertise in Indigenous Studies, and an Elder from a local community." < https://ucalgary.ca/pubs/calendar/archives/2023/sc-3-2-1.html >

9. Question 7: Relationships with First Nations, Métis and Inuit communities

We recorded 96 rows naming a community exactly as each institution writes the name. Thirteen of them only name nations, usually in an acknowledgement, without stating a relationship; they are kept in the table but flagged and not counted here. Of the 83 that state a relationship, 64 are university level, 12 faculty level, and 7 department level (6 excluding First Nations University). The Manitoba Indigenous Education Blueprint, signed by six Manitoba universities, is counted once as a provincial item; its evidence lists only institutional signatories. The pattern is clear: biochemistry units do not publish relationships of their own. The department-level rows are research collaborations named in institutional reports (UQAR's Département de biologie, chimie et géographie with "communautés innues de la Côte-Nord" and with "treize communautés du Nunavut"; TÉLUQ's science department with "Asubpeeschoseewagong Netum Anishinabek" and "première Nation Mi'kmaq d'Elsipogtog"; UQAT's groundwater group with the "Nation Crie"; Guelph MCB's commitment to "existing Indigenous relationships").

Faculty-level relationships that reach biochemistry students include McMaster Health Sciences' guiding principle of reciprocity with "Haudenosaunee and Anishnaabe community members"; Ottawa Medicine's Inuit physicians program with "Nunavut Arctic College, the Government of Nunavut, Nunavut Tunngavik Incorporated"; Waterloo Science's land-based course with "Anishnaabe Knowledge Keepers"; Calgary Science's Indigenous Pathway committee with "an Elder from a local community"; Montréal Medicine's Indigenous health interest group with "communautés atikamekw (Manawan et Wemontaci) et innues"; Sherbrooke Medicine's partnerships with "APNQL, CSSSPNQL, Institut Tshakapesh".

Agreements signed with communities, at university level, are recorded for Moncton (Declaration of Commitment with "les chefs du Mi'gmawel Tplu'taqnn" and "la cheffe de la première nation malécite du Madawaska"), StFX ("The Confederacy of Mainland Mi'kmaq", June 2025), UQAC ("Entente-cadre de collaboration avec la nation des Pekuakamiulnatsh"), Laurier ("Six Nations Polytechnic", "RedDoor Collective"), and the Manitoba Indigenous Education Blueprint signed by six Manitoba universities. Only Moncton's Declaration of Commitment is recorded as a joint document; every other row is the institution's own claim about the relationship, and no row records the community's view of it.

10. Question 8: Courses with decolonization or Indigenous content

Catalogue of course approaches

† 1-4 units. Level = department, faculty or university offering the course; categories are not ordered by count. Course examples are in the caption, not the figure.

Source: desk survey of public web pages, 2026-10-05

Figure 3. Among the 36 pooled units with at least one coded course, the number of units with a course per approach type, by whether the course belongs to the unit, its faculty, or the university. Courses linking Indigenous knowledge to Western science are the most widespread approach, especially at university level, while research-ethics content appears mostly in the units' own courses. A course can carry more than one approach; duplicate rows and sector-wide examples are excluded; "colonial harms in bioscience" counts only courses with bioscience content. Most cells are under five (marked), and the counts show which courses the survey could reach, not course quality or priority.

We recorded 193 course rows, of which 188 are distinct (five were recorded in both waves and are flagged in the spreadsheet). The headline is negative: **in the calendars we read, no biochemistry department course description mentions decolonization**, and only a handful mention Indigenous content. Coverage: calendars were scanned for the 41 pooled units and most nearest-equivalent units; seven found units had no calendar scan at all (Fraser Valley, Trinity Western, Mount Royal, Athabasca, Concordia Edmonton, Brandon, UQAM), McMaster's and UNBC's calendars could not be read, and Brock's, Trent's, Calgary's and Memorial's were read from earlier or archived years. What biochemistry students do meet comes mostly from outside the department. The catalogue below groups what we found by the form the content takes. Full rows are in Appendix C.

10.1 Department-owned biochemistry or chemistry courses with Indigenous content

Unit	Course	What it looks like (from the description)
Regina, Chemistry and Biochemistry	BIOC 200 Medicinal Plants and Culture	"introduce students to key indigenous bioactive (medicinal) plants, their biologically active compounds" and their role in Indigenous culture. Elective.
Regina, Chemistry and Biochemistry	CHEM 101 Chemistry of Food and Cooking	"Traditional Knowledge of food preparation by First Nations will also be explored." Elective.
Brock, Chemistry	CHEM 3P63 Indigenous Medicine and Medicinal Chemistry	Indigenous speakers discuss Indigenous medical practices and the chemical and pharmacological principles underlying them. Elective.
Memorial, Human Biosciences	HUBI 3004 Cellular Signaling; HUBI 3005 Environment-Health Interactions	Indigenous medicines appear as an example of signalling interactions; Indigenous communities named among populations affected by food and environment policy.
UBC Okanagan, Chemistry (sector example)	CHEM 123	Interior Salish pit-cooking practices used as the contextual frame for the course's four units, revisited through the term.
Thompson Rivers, Chemistry (sector example)	4th-year medicinal chemistry	An Elder guided students through medicinal plants on campus; students wrote reflections and designed pamphlets.
UBC Vancouver, Chemistry (a sister department in the Faculty of Science, not the biochemistry unit)	CHEM 121, 300, 301; sample CHEM 233 worksheet	Natural dyeing; policy writing and pollution in Quikin ?amak?is; Tsileil-Waututh restoration of selilwet; a worksheet "weaving" Indigenous learning principles into organic chemistry problems.

10.2 Faculty-of-science courses that biochemistry programs require or list

Unit	Course	Form
UBC Biochemistry and Molecular Biology	SCIE 113 First-Year Seminar in Science	Required in every biochemistry program; the Faculty says Indigenous Ways of Knowing are being woven in, with a piloted Indigenous Science module.
Waterloo Chemistry (biochemistry program)	COMMST/ENGL 193 Communication in the Sciences	Required; the Faculty says it carries a required Traditional Ecological Knowledge module (the course match is inferred).
Waterloo Chemistry	BIOL 225 Plant Knowledge and Practices: Indigenous and Western Science Perspectives	Weekly circle format; uses <i>Braiding Sweetgrass</i> ; counts toward the program's extra BIOL requirement.
Waterloo Chemistry	SCI 211 Traditional Medicines Land-Based Field Course	Taught at a teaching lodge with Anishinaabe Knowledge Keepers.
McMaster Biochemistry and Biomedical Sciences	SCIENCE 2AR3 Foundations of Science: Equity, Justice and Anti-Racism in Science; SCIENCE 4AR6	History of science, experiences of equity-deserving scientists, "decolonial and Indigenous perspectives in STEM"; whether biochemistry students take it is not stated.

Unit	Course	Form
Manitoba Chemistry	SCI 1100 Wawatay Foundations: Re-centering Indigenous Science within Western Frameworks; SCI 1200	Restricted to the Wawatay cohort of Indigenous direct-entry students.
SFU MBB	CHEM 373 Green Chemistry: Science with Conscience	Names "Indigenous perspectives" among those shaping chemical practice.
Cape Breton Chemistry	PHIL 2221 Science & Society (or PHIL 2223)	Required in every BSc Chemistry option. No Indigenous wording. The MSIT Integrative Science series, each course paired as "Mi'kmaw world view" and "Western science", is designated science and usable as a BSc elective.
Dalhousie Biochemistry	BIOL 4003 / INDG 4003 Indigenous Perspectives in Conservation Biology	Faculty of Science field course; elective.
Lakehead Chemistry	Biology 3012 Indigenous Ethnobotany	The only "Type E" Indigenous-content course found in the science programs; named in the Biology and Chemistry major.
Yukon University School of Science	GEOG 290; GEOL 106/108; PHIL 230 Bridging Knowledge	Science-program courses that treat "Traditional, Indigenous, and Scientific knowledge" as co-equal frames; the Science Certificate requires a Yukon First Nations core competency.

10.3 University-wide requirements that reach biochemistry students

University	Requirement	Since
University of Winnipeg	Indigenous Course Requirement: 3 credit hours in which "the greater part of the content is local Indigenous material"	Fall 2016 admissions
Lakehead University	Indigenous Content Requirement: every program calendars a 0.5 FCE course with at least 50% Indigenous content	2016/17
Trent University	0.5 credit from an Approved Indigenous Course List (39 entries, including IESS 1001H Foundations in Indigenous Environmental Studies and Science)	Fall 2018
University of Windsor	Every Honours Biochemistry program (with thesis, without thesis, Pharmacy stream, Health stream) requires one of eleven listed Indigenous Studies courses	Winter 2027 calendar
University of Prince Edward Island	IKE 1040 Indigenous Teachings of Turtle Island required for every undergraduate degree; it sits in the chemistry major's first-year sequence	2026-27 calendar (Academic Regulation 1 h)
University of Saskatchewan	College of Arts and Science Indigenous Learning Requirement (3 cu), shown on the BMIS planning sheet	current
Canadian Mennonite University	3 credit hours "Indigenous" in the common curriculum; the calendar text promises "insight into Indigenous perspectives and decolonization"	current
Brandon University	Indigenous course requirement reported adopted in 2023 (article body not read)	2023
Carleton University	Collaborative Indigenous Learning Bundles, Brightspace modules addable to any course, "incorporated in more than 470 courses"; a 2024 bundle is "Indigenous Sciences – Shifting the Paradigm in Western Science"; the Faculty of Science plans that every science student meets at least one	2018

Windsor's is the only program-specific rule we found that names Indigenous Studies courses inside the biochemistry program's own degree requirements. Lakehead's chemistry programs print the university's Indigenous Content Requirement in their program rules without naming a course, and UPEI's chemistry chapter repeats the university regulation. Calendars at McMaster and UQTR could not be read, and Brock's and Trent's were read from earlier years, so the claim is limited to what we read.

10.4 Ethics, history and "science and society" courses inside biochemistry programs

These carry no Indigenous content but are the places where such content could be added, and several institutions' plans say they intend to add it. Required examples: Montréal's BCM 3515 Éthique en biochimie; Sherbrooke's SCI601 Éthique en sciences biomédicales and BCM306 La biochimie dans la société; Laval's CHM-3004 Éthique et gestion pour chimiste; Moncton's FSCI3903 Pratique professionnelle; UBC's CHEM 329 Research Ethics (combined honours); Cape Breton's PHIL 2221. Elective examples: UBC's BIOC 470 Biochemistry & Society; Lethbridge's CHEM 2320 History of Chemistry; Windsor's CHEM-1003 Alchemy to Chemistry; Western's BIOCHEM 4320 Synthetic Biology and Philosophy; Queen's BCHM 320 ethics debate and GLPH 281 Racism and Health in Canada; McMaster's BIOCHEM 4E03 modules on the history and ethics of stem cells; Carleton's BIOC 1500 Biochemistry in a Modern Society; SFU's MBB 342, 441 and 463 ethical-legal-social modules.

10.5 Approaches documented in the published literature (sector)

Peer-reviewed or institutional accounts of how a Canadian chemistry or science course incorporated Indigenous content: Guelph's *BOTANY2100 lab with an Anishinaabe environmental educator and Indigenous plant names alongside scientific names*; Western's *A2020 "Two-eyed seeing and astronomy" (Physics and Astronomy, first offered 2019)*; Mount Royal's *Indigenous Science course (peer-reviewed account)*; Cape Breton's *Integrative Science* and Trent's *Indigenous Environmental Studies programs (2009 study)*; the Ontario open textbook *Enhanced Introductory College Chemistry*, which has a chapter on "Commitment to Equity, Diversity, Inclusion and Indigenization in Chemistry" citing Two-Eyed Seeing; and the article series "Chemistry and Inuit Life and Culture" by a Memorial chemistry professor and an Inuk student from Nain, Nunatsiavut. We found no Canadian chemistry teaching example of three approach types in the coding scheme: eugenics or scientific-racism modules, eponym or naming reform, and teaching about unrecognized contributors such as Maud Menten.

11. Question 9: Disagreement, criticism and resistance

How to read this section. It records public criticism and disagreement about decolonization, Indigenization and equity efforts at Canadian universities, in both directions, as the sources state it. Recording a statement is not endorsing it. Opinions are the speakers' own, allegations are allegations, and where a matter went to a court, tribunal or arbitrator we report only the outcome as published. We name institutions and public figures as their sources credit them, and we do not name students or private individuals. Our search was limited and uneven: one organization's indexed archive (the Society for Academic Freedom and Scholarship, 16 letters) was easy to fetch, while the student-press, faculty-association and Quebec sources that carry the other kind of criticism were cut off by the search cap. So the number of items on either side says nothing about how widely a view is held, and we do not chart counts by direction.

We recorded 127 published criticisms, positions and disputes, each with its source named and its standing recorded (news report, op-ed, peer-reviewed, union or association statement, institutional statement, blog). Both kinds of criticism were coded with the same fields and the same evidence bar, although the quotes are not equally good: the "overreach" rows are mostly full-text letters read verbatim, while the "insufficient" rows lean on the student press and on paraphrase, which the tables mark. We did not judge who is right, and we record speakers' roles rather than their motives. The conscience's review sorted the rows into those about decolonization or Indigenization (103) and adjacent disputes about equity hiring, EDI statements and identity verification (24), which part B reports separately because our coverage of them was uneven. The full table is Appendix D; the lawyer's and the conscience's reviews of it are in section 13.

In the searches that could be run, nothing was found that criticizes a biochemistry department's decolonization work as such. The criticism searches were never run for Guelph, Carleton, TMU, Windsor, Laurier and Brock, and were cut short at many others. The disputes found are about universities, faculties, hiring, course requirements and the status of Indigenous knowledge in science.

11A. Disputes about decolonization and Indigenization

1. Whether Indigenous knowledge belongs in science teaching. This is the dispute closest to biochemistry. On one side: a 2017 *Times Higher Education* piece by two professors (Manitoba and Saint-Boniface) argues "science is supposed to be a discipline in which all truth claims are open to experimental refutation" and that scholars "are afraid to publically question the indigenization of knowledge"; a 2019 essay by a UNB physics professor in the SAFS newsletter questions "Two-Eyed Seeing"; a 2023 SAFS newsletter essay says Indigenous "ways of knowing" "rely upon faith"; a blog by a US biologist criticizes Uvic's Indigenous Science Scholar postings and SFU's "Decolonizing and Indigenizing STEM" site ("Indigenous knowledge is not a toolkit like modern science"); and *National Post* columns by a physicist criticize funding agencies and land acknowledgements. On the other side: the Canadian Association of University Teachers' 2010 reply that "Indigenous knowledge enriches but does not displace other forms of knowledge"; a 2020 Canadian Press report that Indigenous perspectives "have largely not" reached STEM; the 2020 FACETS paper "10 Calls to Action to natural scientists working in Canada" and its 2025 follow-up; and a 2021 peer-reviewed article that examines "the latent tension in Two-Eyed Seeing between a desire to foster dialogue" and the contradictions between knowledge systems, a critique from within the field rather than against it.

2. Mandatory Indigenous courses. In 2016 a Manitoba student representative told CBC that mandatory courses risk letting students "wash their hands and say oh, I took an indigenous course"; a Brandon student worried about losing a course slot; a chapter by a Regina-based author warned that without "the requisite funding" the requirements could entrench "the kind of colonial" relations they aim to undo. At Saskatchewan in 2017 a CBC report carried both "It's not just 'add Indigenous and stir'" and administrators' account of professors who "oppose indigenization". A 2022 peer-reviewed study of Winnipeg's requirement found attitude changes and "the limitations of such courses within a settler-colonial context". A 2025 Queen's Journal item reports student-government calls for a required Indigenous course that Queen's does not have.

3. Hiring restricted to Indigenous scholars. One organization, the Society for Academic Freedom and Scholarship (SAFS), which describes itself as "an organization of university faculty members and others", publishes an indexed archive of its letters to universities. Our searches could read that archive easily, so it supplied many of the rows arguing that these efforts overreach. Many of those letters share the same wording and make the same argument at different institutions, so we report them as one organization's position, not as many independent voices. Twenty-one observed rows are items SAFS wrote (18 of them letters to universities), and several more are documents it hosts. Its letters on Indigenous-restricted appointments went to Uvic (a Psychology posting limited to Indigenous Peoples), Waterloo (ten Indigenous and ten Black faculty), Laurier (six Indigenous and six Black), York (Black and Indigenous postdoctoral fellowships), Queen's (the QuARMS medical pathway for Black and Indigenous students), Western (BrainsCAN fellowships), McMaster (a Philosophy search), Ottawa (a research chair) and Brock (a 2021 agreement enabling departments to appoint Indigenous faculty), with one argument: "Restricted hiring is a violation of the merit principle, the principle that academic decisions should be made on academic grounds only." Replies on record: Uvic ("has long been committed to"), York's Provost, Queen's Dean of Health Sciences, Ottawa. Windsor's job advertisements are notable for this survey because they require a statement on "Equity, Diversity, Inclusion and Decolonization". Letters that concern Black-scholar postings or EDI statements with no Indigenous element are in part B.

4. The Brock chemistry essay (2020) is reported in part B, because it concerns diversity-focused hiring rather than decolonization, although Brock's own response invokes reconciliation and decolonization. In June 2020 *Angewandte Chemie* published, then withdrew, an essay by Brock chemistry professor Tomas Hudlicky on the state of organic synthesis that included views on diversity-focused hiring. In a later reflection he wrote that "in a social equilibrium, preferential treatment of one group leads to disadvantages for another" and that "new ideologies have appeared". Brock's statement of 5 June 2020 distanced the university from the essay; the Organic Division of the Canadian Society for Chemistry wrote "we wish to categorically reject the views expressed"; CAUT and the Brock faculty association objected that the administration's statements violated academic freedom; a 2021 *Quillette* essay used the case to argue that Indigenization plans are "ill-defined". This is the one dispute found, in the searches that could be run, that happened inside a chemistry department; the replies travel with the essay in Appendix D.

5. Academic freedom cases around Indigenization. Frances Widdowson, a tenured associate professor at Mount Royal University, has published criticism of Indigenization initiatives (she writes that they "dishonour the scientific method", as True North reported her view). Mount Royal dismissed her in December 2021. The university said the case concerned harassment, not academic freedom ("The university unequivocally supports academic debate ... However, academic freedom does not justify harassment"); the faculty association argued it concerned academic freedom. In 2024 an arbitrator found just cause for discipline but held dismissal disproportionate, and did not order reinstatement (as reported by CBC; the award was not read). At Lethbridge a 2023 petition led to the cancellation of a guest lecture; the president, the faculty association ("Claims that equity and academic freedom are incompatible creates a false binary") and SAFS all published statements, and in September 2026 a court found the cancellation "fundamentally and fatally flawed". At Alberta two MLAs wrote to the president about a 2024 speaker and SAFS replied. At Western, a 2024 *Quillette* piece and a 2025 *Rebel News* report describe a teacher-education student's question, in a course on

decolonizing pedagogy, about what decolonization means for teaching mathematics and chemistry, and a Faculty of Education EDI committee's response. A lawsuit, as reported by Rebel News, alleges the student was punished; the allegations have not been tested in court, the committee's own record was not seen, and we found no Western statement. Counsel advises that this matter be routed to Western's Office of the General Counsel before any publication.

6. Verifying Indigenous identity is reported in part B, because one search batch deliberately left the topic out, so our coverage of it is uneven.

7. Land acknowledgements. In April 2025 members of the UBC community petitioned the B.C. Supreme Court against UBC's land acknowledgements and diversity statements as a breach of the University Act's "non-political" clause; Westbank First Nation called the petition "a thinly disguised attempt to perpetuate harmful rhetoric"; the First Nations House of Learning wrote that acknowledging unceded territory "is not an act of charity or opinion"; the BC Civil Liberties Association applied to intervene. Earlier, a 2019 *Globe and Mail* piece carried an Indigenous scholar's warning that acknowledgements must "go beyond just a tokenized gesture" and another's that they provide an "alibi", alongside a defence ("They remind us that the past isn't over"). Acadia's own handbook, recorded in the units table rather than the contention table, makes the same point: tie acknowledgements "into meaningful actions so that it is not interpreted as an empty gesture".

8. "Too slow" and "tokenistic". Faculty associations and student groups at Saskatchewan (2020: experiences "do not show a commitment to action"), UVic (2019: "talk the talk"), StFX (2016: "late in jumping on the 'indigenizing' bandwagon"), McGill (2019 and 2024), Bishop's (2021: an Indigenous student group described the EDI task-force report as whitewashed, as reported by The Eastern Door), Saint Mary's (2018: a Global News report of a faculty member's resignation over the pace of Indigenization, with the university's reply that "there is still more to be done"), York (2025: Indigenous Studies admissions suspended; 2026: the Indigenous Initiatives vice-presidency "quietly shaved down a rank"), OCAD (2021: "reprehensible" to use "decolonization" to justify library layoffs), and Yukon University (2020). A 2018 peer-reviewed survey of 25 Indigenous academics and allies concluded that institutions "focus predominantly on Indigenous inclusion" despite "reconciliatory language". At UFV, consultation comments in 2019 called "decolonization" "too negative a term".

11B. Adjacent disputes, recorded unevenly

These rows are about equity hiring, EDI statements and identity verification rather than decolonization as such. They are reported because institutions' own responses often invoke reconciliation and decolonization, and because the PI asked for resistance and disagreement to be covered. Coverage of them was not systematic: the SAFS archive supplied most of the hiring rows, and one search batch deliberately left identity verification out.

The Brock chemistry essay (2020). In June 2020 *Angewandte Chemie* published, then withdrew, an essay by Brock chemistry professor Tomas Hudlicky on the state of organic synthesis that included views on diversity-focused hiring. In a later reflection he wrote that "in a social equilibrium, preferential treatment of one group leads to disadvantages for another" and that "new ideologies have appeared". Brock's statement of 5 June 2020 distanced the university from the essay; the Organic Division of the Canadian Society for Chemistry wrote "we wish to categorically reject the views expressed"; CAUT and the Brock faculty association objected that the administration's statements violated academic freedom; a 2021 *Quillette* essay used the case to argue that Indigenization plans are "ill-defined". This is the one dispute found, in the searches that could be run, that happened inside a chemistry department; the replies travel with the essay in Appendix D.

EDI statements and Black-scholar postings. SAFS letters to Toronto (an equity statement required of Physics applicants), McMaster (a Health Sciences post restricted to Black scholars), Calgary (a Faculty of Science teaching post restricted to Black scholars), Guelph, Carleton and TMU (job advertisements), and Windsor (statements on "Equity, Diversity, Inclusion and Decolonization" required by several departments including Hydrology-Climatology). A 2020 open letter from Calgary's Department of Psychology EDI committee asked executive leaders to "put into action" a commitment against racism; a columnist replied that "the letter presented no case of systemic racism on the campus".

Verifying Indigenous identity. Queen's 2021 open letter from Indigenous scholars, its 2022 external review ("deeply disappointed, hurt, and insulted"), Dalhousie's 2023 "Understanding our Roots" report and the Indigenous faculty who, as CBC reported, said "every single Indigenous person in Dalhousie is assumed to be fraudulent", Memorial's draft policy and the NunatuKavut Community Council's statement that a biased policy "would exclude NunatuKavut Inuit – something Memorial University has no authority to determine", and 2024 and 2025 *Policy Options* pieces arguing that "Academic institutions are harming Indigenous Peoples with their Indigenous identity policies". The criticism runs in both directions: that policies are needed, and that policies harm. We report the policy disputes only, say nothing about any individual's identity, and present the NunatuKavut Community Council's position as its own without adopting or denying it.

Quebec. We found almost no French-language criticism. The only Quebec rows are an op-ed by a Concordia professor that the decolonization plan threatens academic freedom, the Bishop's 2021 dispute, and McGill student-press editorials. The 2018 *Le Devoir* letter by eight scholars and the study of "wokisme" coverage in the Quebec press were unreachable (bot walls and dead links), and we could not tie Quebec's 2022 academic-freedom law to decolonization in any source fetched. This is a gap in the survey, not evidence of consensus.

12. Per-university summaries

Two or four plain sentences per university: what the university publishes, then what the biochemistry-like unit itself publishes. The full coding, with quotes and URLs, is in the spreadsheet.

University	University level	Unit level
University of British Columbia	(paraphrase from fetch summary) UBC's named framework is the Indigenous Strategic Plan (2020), described on its page as having eight goals and 43 actions and as responding to UNDRIP, the MMIWG Calls for Justice and the TRC Calls to Action. The page says UBC is the first university in North America to commit to implementing the United Nations Declaration on the Rights of Indigenous Peoples (UBC's own wording). The page says the plan will be reviewed every three years.	(paraphrase from fetch summary) (EDI committee and action plan; land acknowledgement). the department's own calendar course BIOC 470 'Biochemistry & Society: Current Issues' (societal issues, no Indigenous wording); the Biochemistry programs require the Faculty of Science's SCIE 113, which Faculty sources say is being revised to weave in Indigenous Ways of Knowing, and Combined Honours students take CHEM 329 (research ethics).
University of Victoria	UVic's Indigenous Plan (second plan, 2023) is titled X̱ḵənəṉsṯeḻ W̱c̱ENENISTEL Helping to Move Each Other Forward and is said to weave together "shared responsibilities to the local Nations, Indigenous students, staff and faculty through local laws and philosophies". The Office of the Vice-President Indigenous leads the work. The Faculty of Science has a 5-year Indigenization Implementation Strategy (2022-2026).	Calendar scan (Kuali catalogue API, 2026-27 undergraduate catalogue): none of the 34 BIOC, MICR, MLSC and SCIE courses has Indigenous, decolonial, history-of-science or ethics wording in its description; MLSC 102 'Biochemistry and Human Health' is health-topics content only. No Indigenous course is shown as required in the Molecular Life Sciences programs checked.

University	University level	Unit level
Simon Fraser University	(paraphrase from fetch summary) SFU's reconciliation work is organized under Walk This Path With Us (Aboriginal Reconciliation Council, 34 calls to action, implemented from 2017) and 'Upholding Truth and Reconciliation' in What's Next: The SFU Strategy. The curriculum page defines Indigenizing curriculum and decolonization (quoted above) and describes a Library resource centre and a \$6,000 faculty grant program.	(paraphrase from fetch summary) Calendar scan: MBB's own courses MBB 342, 441 and 463 mention ethical/legal/social issues or ethics in the description, and graduate MBB 801 mentions research ethics and 'professional equality, diversity, and inclusiveness'; none mentions Indigenous content. A Chemistry-department course, CHEM 373 Green Chemistry, names 'Indigenous perspectives' in its description. Nothing unit-authored on decolonization was found.
University of Northern British Columbia	UNBC's Indigenous page names an Office of Indigenous Initiatives and a First Nations Centre under the Associate Vice-President, Indigenous, and says the Office helps UNBC follow through on its commitments to "the Indigenization of the institution and the Truth and Reconciliation Commission's Calls to Action." No titled plan found.	The calendar's Chemistry page lists CHEM 204 Introductory Biochemistry and BCMB 300/400-level courses (titles only: Intermediary Metabolism, Basic Science of Oncology, Macromolecular Structure, Advanced Nucleic Acids, Topics in Biochemistry and Molecular Biology); course descriptions could not be fetched (UNBC's course catalogue app returned an error), so descriptions were not scanned. The calendar's academic breadth rule lists FNST (First Nations Studies) among Social Science options.
Thompson Rivers University	(paraphrase from fetch summary) TRU's Indigenous page names The Coyote Project as TRU's roadmap to achieving the Truth and Reconciliation Commission's calls to action and says the institution is Grounded in respect, reconciliation, and Indigenous knowledge.	(paraphrase from fetch summary) Chemistry (Physical Sciences) offers majors in Chemistry, Chemical Biology and Environmental Chemistry; the chemical biology major is described as combining chemistry and molecular biology. Nothing unit-authored found.
Vancouver Island University	(paraphrase from fetch summary) VIU's Indigenous page names the Indigenous Education Plan as its primary strategic document and the Office of Indigenous Education and Engagement; the Shq'apthut (A Gathering Place) team supports students.	(paraphrase from fetch summary) Chemistry offers a Major in Chemistry; the page suggests combining it with a Minor in Biology for biochemistry-like outcomes. Nothing unit-authored found.
Kwantlen Polytechnic University	KPU's Indigenous Student Services page states a commitment to "address and reduce ongoing systemic colonialism, oppression and racism that Indigenous Peoples continue to experience" and no formal plan title.	Unit page not found; nothing unit-authored seen.
University of the Fraser Valley	UFV's Indigenous Affairs office, Xwexwilmexwawt, lists responsibilities including creating Indigenous educational programs, recruiting and retaining Aboriginal faculty and staff, and building relationships with Aboriginal communities (institution's word: Aboriginal).	No biochemistry program seen on the Chemistry page. Nothing unit-authored found.
Trinity Western University	TWU's Indigenous page names an Office of Indigenous Initiatives and a University Siyá:m role, and lists growing course offerings on Indigenous culture, worldview and history. No titled plan seen. TWU's response to TRC Calls 48-49 and 59-60 (faith groups) was not searched.	Chemistry page lists BSc (Honours), BSc, Minor and Concentration; no biochemistry credential seen. Nothing unit-authored found.
Royal Roads University	Not assessed; the site could not be fetched.	Not assessed.
Capilano University	Capilano's home page lists Indigenous initiatives including a student centre, an Elder-in-Residence Program and the Tszil Learning Centre. No titled plan seen.	A School of Science, Technology, Engineering & Mathematics exists; no biochemistry-like unit page was reached.
University of Alberta	The university's Indigenous Strategic Plan is named "Braiding Past, Present and Future" and its page refers to the TRC and UNDRIP. A provost-office document titled "Guidelines: Indigenization, Decolonization, Responding to the TRC Calls to Action in Academic Programs and Curricula (Final)" exists; its text could not be read here.	Calendar scan (apps.ualberta.ca catalogue, BIOCH subject): no course description contains Indigenous, decolonial, reconciliation, ethics, society or history-of wording. The Faculty of Science SCI 201 'The Scientific Process' lists research ethics as one phase of the scientific process (not coded; not shown as required for Biochemistry).
University of Calgary	The Indigenous Strategy is named "ii' taa'poh'to'p" and is described as guiding the university "on its path to truth and reconciliation". It lists grants for Indigenous curriculum development among commitments. It gives no explicit definitions of decolonization or Indigenization.	Calendar scan used the 2023-24 archived calendar (the current Coursedog catalogue could not be read by fetch); the 20-odd BCEM course descriptions (341 to 731) contain no Indigenous, decolonial, ethics, society or history-of wording. The Faculty of Science Indigenous Pathway (admissions) is recorded in wave 1.
University of Lethbridge	The Iniskim Governance Process (adopted 2022) is described as outlining "how the university will address the Truth and Reconciliation Commission's Calls to Action", guided by the Awahksaataakaski Council of Niitsitapi educational Elders and Knowledge Keepers. The university defines Indigenization in its own words (quoted above). An EDI Scholars programme (13 scholars named since 2021) and an inter-institutional panel on Indigenization and decolonization are listed on a news index.	Wave-1 finding 'nothing unit-authored' stands for web pages, but the calendar adds two department-owned courses: CHEM 2320 History of Chemistry and CHEM 2310 Chemistry and Biochemistry in Society, neither with Indigenous wording. BCHM course descriptions (2025-26 calendar) contain no relevant wording. Liberal Education Lists, which every B.Sc. student must satisfy, include Indigenous Studies, Blackfoot and Cree courses (optional, not compulsory).
MacEwan University	A university president's column states "Education is at the centre of reconciliation" and a commitment to growing the Indigenous student population to at least eight per cent of Canadian students. No named Indigenous plan page was fetched.	Not found: the chemistry unit's own pages could not be reached (department and faculty URL guesses returned 404).
Mount Royal University	The university's "Indigenization and Decolonization Strategic Framework" (the Iniskim Centre page names it Inii-Awattoo) aims to indigenize the university and to develop guidelines and content for indigenizing curriculum in every academic program.	Nothing unit-authored found. The Faculty of Science and Technology has an IDEA section with a committee and an events link; contents of the committee page beyond the landing text were not read.
Athabasca University	Athabasca University's Indigenous centre is Nuksahtowin, which links to Indigenous courses, resources and a truth and reconciliation page. The statement-page fetch (athabascau.ca/news/?p=20005) did not return a decolonization statement.	Nothing unit-authored found. Faculty page: "online programs and courses in architecture, computer science, general science, data science"; no chemistry program listed in fetched text and no EDI or Indigenous text.
Concordia University of Edmonton	The university runs an Indigenous Knowledge & Research Centre and Indigenous Student Services (Elders Advisory Council, Indigenous Fellowship, Indigenous Partnerships). No named plan or definitions found in fetched pages.	Faculty page: Chemistry is "a fully accredited degree program by the Canadian Society for Chemistry"; a Biochemistry Minor exists. No EDI or Indigenous text on the faculty page.
The King's University	Homepage mentions Indigenous Commitments and an Indigenous Program; the linked pages were not reached.	Unit pages not reached.
Ambrose University	Only a land acknowledgement found. No Indigenous strategy page was located.	Science page lists a BSc in Biology (Molecular Health Sciences or Ecology concentration); chemistry and biochemistry are not listed. Nothing unit-authored found.
St. Mary's University (Calgary)	The Indigenous Initiatives page states commitment to Truth and Reconciliation and the Calls to Action in Education, lists INST 201 and INST 301, Elder and Knowledge-Keeper visits and Indigenous scholarships.	No chemistry or biochemistry unit found; the homepage lists Biology only.

University	University level	Unit level
Burman University	(paraphrase from fetch summary) Only a land acknowledgement found.	(paraphrase from fetch summary) Academics page shows no chemistry or biochemistry program; Biology and General Science appear. Seed row corrected accordingly.
University of Saskatchewan	(paraphrase from fetch summary) The university's Indigenous strategy item is titled Ê-Pimohhtëyahk, We Are Walking Together; it names three goals: Uplifting Indigenization, Experiencing Reconciliation and Embracing Manacihitowin (Cree: let us respect one another). The 2024 presidential statement uses the words decolonization, reconciliation and Indigenization.	(paraphrase from fetch summary) Calendar scan: all 26 BMIS and 9 BMSC course pages in the 2026-27 catalogue that exist (BMIS 308-499, BMSC 200-405, MCIM 223; no BIOC pages returned) carry no Indigenous, decolonial, reconciliation, history-of-science or ethics wording in their descriptions. What reaches the program is the College of Arts and Science Indigenous Learning Requirement (3 cu), shown in the BMIS planning sheet, with INDG 107 in the guidebook's first-year schedule. Nothing unit-authored beyond the territorial statement found in wave 1.
University of Regina	(paraphrase from fetch summary) The university states a commitment to truth and reconciliation, runs an Office of Indigenous Engagement and describes its Faculty of Science mission as including Indigenization. Faculty of Science states it is on Treaty 4 and 6 lands and that it is incorporating Indigenous knowledge and world views in our research, teaching, and studies.	(paraphrase from fetch summary) The two department-listed courses with Indigenous content (CHEM 101, BIOC 200, wave 1) are electives: the BSc Biochemistry requirement sheet (CHEM, BIOC, BIOL, MATH, STAT, PHYS, CS, ENGL plus electives) does not require either. The university plan uses 'decolonize' for pedagogy and curriculum in a professional-development action. No unit-authored statement found.
First Nations University of Canada	(paraphrase from fetch summary) In its own words: FNUUniv is a unique Canadian institution that specializes in Indigenous knowledge, providing post-secondary education for Indigenous and non-Indigenous students alike within a culturally supportive environment. It describes itself as a First Nations owned post-secondary institution, founded in 1976 as the Saskatchewan Indian Federated College and renamed in 2003, and a federated college of the University of Regina; tagline We are Indigenous.	(paraphrase from fetch summary) Program self-description: Indigenous Knowledge and Science embraces transformative learning methods. Alongside our courses in Biology, Chemistry, Computer Science, Mathematics, and Statistics, we proudly offer classes in Indigenous Environmental Science. Credentials from certificate to Bachelor of Science in Indigenous Environmental Science. Recorded in its own words only; excluded from all counts per design 0.2.
University of Manitoba	(paraphrase from fetch summary) The university's framework is titled University of Manitoba Truth and Reconciliation Framework (Time For Action), with four commitments: Integrate Indigenous Knowledges and Ways of Being, Create a Sense of Belonging, Empower Learning, Decolonize and Indigenize Spaces and Places. It says Each academic and administrative unit will create action plans.	(paraphrase from fetch summary) Calendar scan of BGEN (Biochemistry and Medical Genetics) course descriptions: no Indigenous, decolonial or reconciliation wording; BGEN 3010 and 3024 mention 'ethics' within human genetics. Faculty/university items that biochemistry students could take are on the 26_b rows (Faculty of Science Wawatay courses, INDG 3330). The calendar describes the Biochemistry B.Sc. as jointly offered by Chemistry and Microbiology (Faculty of Science), not by BMG.
University of Manitoba	(paraphrase from fetch summary) See unit 26_a: the university's Truth and Reconciliation Framework (Time For Action) asks every unit for an action plan.	(paraphrase from fetch summary) Calendar scan (2026-27): CHEM descriptions carry no Indigenous or decolonial content; CHEM 1018 lists 'the history of science' among topics. Faculty of Science has Indigenous-focused courses for a cohort of Indigenous students (SCI 1100 'Wawatay Foundations: Re-centering Indigenous Science within Western Frameworks', SCI 1200) and a Direct Entry admission category (Wawatay Scholars). INDG 3330 'Indigenous Science, Technology, and Society' is open to science students as an elective. The Biochemistry B.Sc. is jointly offered by Chemistry and Microbiology.
University of Winnipeg	(paraphrase from fetch summary) The University of Winnipeg requires every undergraduate degree student (Education excepted) to take a 3-credit course 'in which the greater part of the content is local Indigenous material' (Indigenous Course Requirement, Senate-approved 2015-11-20, effective Fall 2016 admissions). Its Indigenization page says: Indigenization is one of the strategic initiatives taken by the University of Winnipeg. The Office of Indigenous Engagement runs the Weweni Indigenous Scholars Speaker Series, and a 2024 cluster hire of eight Indigenous faculty included the Faculty of Science.	(paraphrase from fetch summary) Dept page (archived 2026-01-22) lists the 'Indigenizing Chemistry' news item (2021). The CHEM course descriptions in the 2026-01 calendar snapshot (including the biochemistry courses) carry no Indigenous wording; CHEM 2801 treats 'environmental and societal issues'. The Biochemistry program is described as interdisciplinary with 'most required courses taught in the Departments of Biology and Chemistry'. Students meet the ICR through the Indigenous Studies/other lists (IS-2012 'Indigenous Sciences' is on the ICR list).
Brandon University	(paraphrase from fetch summary) The 2022-2027 strategic plan carries a Michif name, Mamaawii-atooshke aakihkiwiin, Working Together and Growing, and states the university is proud to be located in the homeland of the Red River Métis. A June 2023 CTV headline reports: 'Just the start': Brandon University students now required to take Indigenous courses.	(paraphrase from fetch summary) Nothing unit-authored on Indigenous issues found on the chemistry page. The unit lists Biochemistry, Biological Inorganic Chemistry and Neurochemistry of Therapeutics among courses.
Université de Saint-Boniface	(paraphrase from fetch summary) Le site présente une page Dialogue, vérité et réconciliation : 10 % des membres de la population étudiante se déclarent autochtones, dont 96 % de la Nation métisse (2025-2026). [our translation] The site has a page 'Dialogue, truth and reconciliation': 10% of the student body self-declares as Indigenous, 96% of them Métis Nation (2025-2026). The university signed the Manitoba Indigenous education action plan reaffirmation.	(paraphrase from fetch summary) Program page found (4 years, 120 credits, optional co-op; described as 'le programme le plus poussé de la Faculté des sciences'). The page, the calendar listing of USB-taught CHEM/BIOL/MBIO/SCI courses (via the University of Manitoba calendar) and the admission requirements contain no Indigenous, réconciliation or ethics content. The university's réconciliation page says the commitment is present 'à la fois dans certains programmes d'études et dans la vie étudiante' [our translation] present both in certain study programs and in student life; the one science-adjacent course found is ENVR 2393.
Canadian Mennonite University	(paraphrase from fetch summary) CMU signed the Manitoba Indigenous Education Blueprint in December 2015; its news item lists ten commitments. Mission page: CMU inspires and equips for lives of service, leadership, and reconciliation in church and society.	(paraphrase from fetch summary) CMU's common curriculum for degrees (BA Arts and Science Major, BSc Biology major, transitional core for BA/BBA/BSc) includes an 'Indigenous' requirement of 3 credit hours (Indigenous Peoples of Canada, History of Indigenous Peoples of Canada, Decolonizing our Learning through Music, etc.). The Natural Sciences courses in the calendar (BIOL, CHEM) carry no Indigenous or decolonial wording; HIST-2000 History of Science may count toward the science requirement. The calendar lists Biochemistry as one of the pre-defined Sciences Concentrations (36 credit hours of BIOL, CHEM and MATH or PHYS) within the Arts and Sciences Major (BA), so the Indigenous requirement applies there.

University	University level	Unit level
University of Toronto	The University's response to the TRC is "Wecheehetowin: Answering the Call", whose title is explained in the report: "Wecheehetowin is a Cree word that means 'Working Together'". The report sets out calls to action in areas including Indigenous spaces, faculty and staff, curriculum, research ethics and community relationships, students, and institutional leadership; it states 'decolonize' as a participant comment ("We need to 'decolonize' the institution; bringing in Indigenous ways of knowing, Indigenous knowledge and structures") and uses 'Indigenizing' in its working-group principles. The report gives two target years for Indigenous curriculum content in all divisions: the curriculum working group's goal is stated as 2030, Call to Action 17 as 2025 (both in the same PDF).	The Department of Biochemistry states equity, diversity and inclusion as core values and runs a WIDE (Wellness, Inclusion, Diversity, and Equity) committee with newsletter items and a high-school outreach day. Nothing unit-authored on decolonization, Indigenization or reconciliation was found on the 20+ unit pages and newsletters read; the unit links to the university's land acknowledgement. The Faculty of Arts and Science calendar lists 27 BCH courses and the Biochemistry Specialist requirements, none of whose descriptions mention Indigenous, decolonial, history-of-science or ethics content.
McMaster University	(paraphrase from fetch summary) The Faculty of Health Sciences states a 'whole-of-Faculty' Indigenous health initiative with a reconciliation-based approach, an associate dean (Indigenous Health), a strategic plan and the Indigenous Health Learning Lodge (IHLL), which works alongside the Faculty of Health Sciences towards creating a learning environment that is culturally safe ... to advance the work around concepts of truth, reconciliation and anti-colonization. The Faculty of Science has an Associate Dean (Equity, Diversity, Inclusion & Indigeneity) whose Initiatives page refers to the Indigenous Education Council's Indigenous Education & Research Strategy, a Faculty of Science Indigenous Priorities & Initiatives Framework and TRC Calls to Action 8-14 (the university strategy documents themselves were not fetched).	(paraphrase from fetch summary) The department's current site (biochem.healthsci.mcmaster.ca, reachable with a browser user agent) has an Equity, Diversity & Inclusion page that links out to the Equity and Inclusion Office and to the Faculty's Indigenous Health Learning Lodge and states the Faculty's reconciliation-based commitment. Course outlines carry a land acknowledgement; a BBS-listed course (NEXUS 2A03) includes a poster assignment on Indigenous water inequities. Nothing unit-authored beyond these was found; the Faculty of Science's anti-racism certificate is a faculty-level offering.
Western University	Western's Indigenous Strategic Plan (2016) has eight priority areas, including "Excel in Indigenous teaching and learning" and "Indigenize Western's institutional practices and space". The page fetched says the plan guides "the university's ongoing commitments to truth, reconciliation, and decolonization" but gives no definition of decolonization.	The Department of Biochemistry has an EDID committee (created Feb 2022; renamed Jan 2024) running a five-phase plan to decolonize its teaching, with about a dozen decolonization-related workshops from June 2024 to Sept 2026 (several on colonial legacies, positionality, 'History of and Knowledge in Biochemistry', 'Beyond Euro-Western Perspectives', 'Decolonial Curricula', 'Naming Changes'), a decolonization resource hub, committee discussions of Western's Centre for Teaching and Learning Indigenous Teaching and Learning modules in Indigenous sharing circles, and an anonymous survey of the department. As of the May-Aug 2026 newsletter the department is in the rebuilding phase; no course-level changes are yet documented on any page read.
University of Ottawa	(paraphrase from fetch summary) The Indigenous Action Plan is described as the guiding principle for all efforts to provide guidance and expertise on uOttawa services, supports and policies that affect Indigenous students, staff and faculty and is organised in four 'hoops' (the institution; faculties, departments and programs; the physical space; Indigenous community) after an Anishinaabeg wiigwaam teaching. It was developed with knowledge keepers and community leaders over nearly two years, and the university uses 'Indigenization' (FR: 'autochtonisation'). A university Indigenous Affirmation (not a land acknowledgement, per the university's FAQ) names the Algonquin Nation. Offices include Indigenous Affairs, the Mashkawaziwogamig Indigenous Resource Centre and an Indigenous Education Council. The Faculty of Medicine lists 'Reconciliation, Action, and Indigenous Health' among five priorities of its 2025-2030 strategic plan; the 2025-2030 plan PDF read carries only the priority names.	(paraphrase from fetch summary) Nothing unit-authored on Indigenization, decolonization, reconciliation or EDI was found on the department's English and French pages. The department (formed in 1998 by merging Biochemistry and Bacteriology/Preventive Medicine departments, per its history page) runs graduate programs in Biochemistry and in Microbiology and Immunology and the BSc Translational and Molecular Medicine; undergraduate BCH courses are offered by the Faculty of Science (catalogue), and none of the BCH course descriptions read mentions Indigenous, decolonial, ethics or history content.
Queen's University	Queen's publishes EDII annual reports and the Truth and Reconciliation Task Force implementation report "Yakwanastahentéha Aankenjigemi (Extending the Rafter)" (2019/2020; 25 task-force recommendations released 2016, aiming to "strengthen relationships with Indigenous communities").	Nothing unit-authored on Indigenization, decolonization or reconciliation found on the DBMS site (home, undergraduate programs, courses, graduate programs). The DBMS site lists a Biochemistry program among its Undergraduate Programs and a Biochemistry (BCHM) course focus, and one DBMS-listed course (GLPH 281) takes Indigenous health as its framework. The Faculty of Health Sciences plan and the university task-force report remain the frameworks.
University of Waterloo	Indigenous work at Waterloo is described as centralized in the Indigenous Initiatives Office, with the Faculty of Science hosting its own embedded office (Science Indigenous Initiatives), an Indigenous Working Group and an Indigenous Student Advisory Committee.	The Department of Chemistry's Equity, Diversity, Decolonization, and Inclusion page carries a statement and territorial acknowledgement and links out to faculty and university resources. The Biochemistry (BSc Honours) program is run from Chemistry and Biology; it requires 0.5 additional BIOL 200-level units and COMMST 193/ENGL 193 Communication in the Sciences, and BIOL 225 (Indigenous and Western science perspectives) is a BIOL 200-level course. No CHEM course description (182 CHEM/BIOL/SCI descriptions read from the current Kuali calendar) contains Indigenous, decolonial or history-of-science content.
University of Guelph	(paraphrase from fetch summary) Guelph's Indigenous Initiatives Strategy, Bi-Naagwad It Comes Into View (2021), is described as advancing the University of Guelph's commitments to reconciliation and decolonization with First Nations, Inuit and Métis peoples, organised in six themes (e.g. an Office of Indigenous Initiatives, protocols for working with Indigenous peoples, a framework to indigenize curriculum).	(paraphrase from fetch summary) MCB has an EDI committee and an EDI statement that names reconciliation (In the spirit of reconciliation, we will also strive to develop and enhance existing Indigenous relationships.) and commits to EDI initiatives in its curriculum. The Biochemistry major (offered by MCB, College of Biological Science) lists BIOC, MCB, MBG and MICR courses; none of the 7 BIOC and 9 MCB course descriptions mentions Indigenous, decolonial or history-of-science content, and MCB'2000 has a society framing. The B.Sc. degree learning outcomes include respect for diverse knowledge systems.
York University	York's "Decolonizing, Equity, Diversity and Inclusion Strategy" commits to "a decolonizing, inclusive, diverse and collaborative ecosystem that promotes individual and collective flourishing" and requires faculties and departments to implement actions; accountability sits with the Division of Equity, People and Culture. An annual \$100,000 course-load-reduction fund supports EDI service by faculty who self-identify as Indigenous and/or racialized.	The Department of Chemistry pages (and the Faculty of Science Biochemistry page) contain a land acknowledgement and no unit-authored decolonization, Indigenization or EDI text. A scan of the 2026-27 calendar for all 261 SC/BCHM, SC/CHEM, SC/NATS and SC/BIOL courses found no Indigenous or decolonial content in Chemistry or Biochemistry course descriptions; Faculty of Science courses with related content are SC/NATS 1535 (First Nations of the Americas named as a possible contributor to science) and SC/STS 3725 and 3740. York's university-level 'Courses with Indigenous Content' list for 2023-2024 contains no SC/ course.

University	University level	Unit level
Carleton University	Kinàmagawin (2020) is described by the Faculty of Science page as "Carleton University's revitalized Indigenous strategy". Since 2018 the Collaborative Indigenous Learning Bundles have been "incorporated in more than 470 courses".	Nothing unit-authored found on the Institute of Biochemistry page except the acknowledgement footer. The Department of Chemistry page links to a 'Commitment to Equity, Diversity and Inclusion' (page not fetched; 404 on guessed URL).
Toronto Metropolitan University	(paraphrase from fetch summary) TMU's Standing Strong Task Force report (22 recommendations per a search snippet; not fetched) includes Recommendation nine, quoted above, which asks that all programs include mandatory learning about Indigenous history and Indigenous-colonial relations.	(paraphrase from fetch summary) The Department of Chemistry and Biology has an EDIA committee and an EDIA Resource Hub whose four listed areas include Indigenous Knowledges and Scholarship and resources for inclusive course and research design. The department homepage lists Biology, Biomedical Sciences and Chemistry programs and a graduate Molecular Science program; no biochemistry program is named.
University of Windsor	The university appointed a senior advisor to the president on Indigenous relations and outreach in January 2022, citing the TRC Calls to Action, and said it was beginning 'more comprehensive action towards Indigenization and decolonization'. It is developing its first Indigenous Strategic Plan, aligned with its Aspire Strategic Plan, with student consultation sessions in December 2023 and March 2024.	The Department of Chemistry and Biochemistry's own EDI page uses equity, diversity and inclusivity wording and a Three Fires Confederacy territory statement. The Faculty of Science published 'Decolonization in the Faculty of Science: A place to start' (reading list, file dated 2022-10-19) with a Chemistry and Biochemistry section of three items. The Winter 2027 calendar requires every Honours Biochemistry student (and the thesis, Pharmacy Stream and Health Stream variants) to take at least one course from a list of eleven Indigenous Studies courses.
Wilfrid Laurier University	Laurier's Office of Indigenous Initiatives published an Indigenous Strategic Plan (2023) that names three kinds of Indigenization (inclusion, reconciliation, decolonial) and says it draws on Gaudry and Lorenz (2018). The university has Indigenous student centres, MOUs with Six Nations Polytechnic and RedDoor Collective, and an event titled 'A Way Forward: Sustainability through Decolonization and Reconciliation'.	The department's calendar entry (2026/2027) lists 59 course pages across CH and SC codes (all fetched); none of the descriptions read mentions Indigenous, decolonial, ethics-of-science or history-of-science content (only SC100 'Introduction to the Science of Everyday Life' mentions public policy, and CH271 'Chemistry and Sustainability'). The Honours BSc Biochemistry and Biotechnology program lists no Indigenous requirement.
Brock University	(paraphrase from fetch summary) The Office of the Vice-Provost, Indigenous Engagement site names a strategic priority of 'reconciliation, Indigenization and decolonization', an Indigenous Strategic Plan with an advisory committee, an Aboriginal Education Council and a Two Row Council. The plan text was not retrievable.	(paraphrase from fetch summary) The department's course listing includes CHEM 3P63 'Indigenous Medicine and Medicinal Chemistry' (a department course in which Indigenous speakers discuss Indigenous medical practices and underlying chemical and pharmacological principles) and department-coordinated 'Science in Society' courses for non-science majors. No unit-authored statement on decolonization or Indigenization was found on the pages read. Calendar text is an archived copy whose sections carry different years ('2024-2025 ... Chemistry', '2022-2023 ... Biochemistry'), so program requirements may be out of date.
Trent University	Trent describes itself as 'the first university in Canada to establish a department dedicated to Indigenous studies' (institution's own claim). Since Fall 2018 all undergraduates must complete 0.5 credit from an Approved Indigenous Course List, following a 2017 Senate-approved committee report. It runs a faculty workshop series, 'Starting the Journey', and employs an education developer in Indigenous pedagogy.	Biochemistry & Molecular Biology is offered jointly by the Departments of Biology and Chemistry; the program page lists no Indigenous requirement of its own, but the Senate-approved Indigenous Course Requirement (one 0.5-credit course from an Approved Indigenous Course List) applies to every undergraduate. In the 2020-21 calendar, none of the BIOL or CHEM descriptions in the program mentions Indigenous, decolonial or ethics-of-science content; science-facing ICR options include IESS 1001H and INDG-ERST-IESS 2601Y.
Lakehead University	(paraphrase from fetch summary) Lakehead's Senate-set Indigenous Content Requirement (2014 commitment, from 2016/17) obliges every undergraduate program to calendar a course with at least 50% Indigenous knowledge or Aboriginal content. The President's Council on Truth and Reconciliation (since 2018) has 'launched seven of eight modules'. The university lists an Indigenous Content Curriculum Specialist and a Canada Research Chair in Land Pedagogies and Indigenous Futurities.	(paraphrase from fetch summary) The Chemistry department page carries a Fort William First Nation land acknowledgement and no unit-authored Indigenous text. The 2026-27 calendar shows the Chemistry programs meet the Indigenous Content Requirement through a student-chosen 0.5 FCE 'Type E' course (Chemistry Major; Concentration in Medical Sciences) or through Biology 3012 Indigenous Ethnobotany (Biology and Chemistry Major). No chemistry or biochemistry course carries Type E; the one Type E course found in the Chemistry, Biology, Applied Bio-Molecular Science and General Science chapters is Biology 3012.
Laurentian University	Laurentian's Office of Academic and Indigenous Programs works with the Laurentian University Native Education Council (LUNEC). A Truth and Reconciliation Task Force began in November 2019, and a Dibendaagziwin Committee followed in 2022. The university also has a School of Indigenous Relations and an Indigenous Programs Strategic Business Plan (five-year plan to be included in the university strategic and transformation plan).	The Biochemistry program page (English) lists CHMI, BIOL and NATS courses with no Indigenous requirement; 'PHIL 2345E and SCOM 4006E are highly recommended as electives'. Of 150 English course pages scanned (CHMI, NATS, BIOL, INDG, NSCI, SCOM and others), School of Natural Sciences courses with ethics or society content are PHIL 2345E Bioethics and Human Life (recommended elective), SCOM 1007E Science Communication and Society and BIOL 3977E Biodiversity and Conservation ('conservation ethics'). French course pages (FL codes) were not scanned.
Nipissing University	(paraphrase from fetch summary) Nipissing describes an Office of Indigenous Initiatives (Enji Giigdayang) with student success, mentorship and youth-gathering programs, an Indigenous Studies minor, Indigenous teacher-education programs, and an Indigenous council (NUICE). Source: fetch-tool summary of the Indigenous Initiatives page; the site returns 403 to direct download.	(paraphrase from fetch summary) Nothing unit-authored found. The Biology program page says 'Study genetics, microbiology, and biochemistry' and offers chemistry as a complement; the staff directory labels the unit 'Biology and Chemistry'. No chemistry or biochemistry bachelor's program was found in the program list (chemistry appears as a minor).
Ontario Tech University	(paraphrase from fetch summary) Ontario Tech frames its work as 'Indigenization and Reconciliation', led by a President's Indigenous Reconciliation Task Force working with an Indigenous Education Advisory Circle, under Ontario's Aboriginal Education Strategy. It offers an Indigenous Studies minor, a speaker series, and Indigenous Education and Cultural Services.	(paraphrase from fetch summary) Nothing unit-authored found. The Faculty of Science site lists programs (Biological Science, Chemistry, Human Health Biology) and no Indigenous or EDI pages were seen. No department of biochemistry was found.
Algoma University	(paraphrase from fetch summary) Algoma sits on the former Shingwauk Indian Residential School site and houses the Shingwauk Residential Schools Centre. It offers Anishinaabe Studies and Anishinaabemowin programs delivered with Shingwauk Kinooaage Gamig, and has an Anishinaabe Peoples' Council advising on Indigenous programming and research. Source is a fetch-tool summary; not independently checked.	(paraphrase from fetch summary) No biochemistry or chemistry unit found. Chemistry courses are taught within the Department of Biology (one faculty profile mentions 'Environmental Chemistry, Organic chemistry and Biochemistry courses'). The Biology page has no Indigenous text.

University	University level	Unit level
Royal Military College of Canada	RMC's page titled 'Indigenous Knowledge and Learning' describes the Indigenous Leadership Opportunity Year (ILOY), a one-year program for Indigenous students that can lead to continued study at RMC as a member of the Canadian Armed Forces. The university acknowledges that it is on the traditional homelands of the Hódníhósó:ni, Anishinaabek and Huron-Wendat Peoples.	Nothing unit-authored found on Indigenous topics. The department's mission page states its programs emphasize 'Chemical, Biological, Radiological and Nuclear (CBRN), Life Sciences and Environment for the Chemistry Programme'; no biochemistry unit exists under that name.
NOSM University	NOSM University describes its Indigenous work through a TRC response and a two-year plan, Strengthening Our Relations, written after a 2018 Expert Panel Review. The plan uses the words decolonization, reconciliation and anti-racism and says: "The ultimate sign of success will be a future in which Indigenous people do not experience systemic racism or colonial practices within NOSM." It also names an Office of Indigenous Affairs, Elders, and an Indigenous Reference Group.	The Medical Sciences Division page describes it as "the organizational unit for teaching and research in the basic medical sciences" with a section "Biochemistry, Cell Biology, and Molecular Biology". Nothing unit-authored on Indigenous topics was found on that page. The seed note (strong Indigenous mandate) is borne out in institution-level documents only.
Université de Hearst	No university-level Indigenous or decolonization framework was located. Only the homepage was read; one French web search returned nothing about this institution.	No biochemistry-like unit: no science program on the page read.
Université de l'Ontario français	No university-level Indigenous or decolonization framework was located; only the homepage was read.	No biochemistry-like unit: no science program on the page read.
Redeemer University	Redeemer's published reconciliation material is in its Resound news items (2020, 2023), framed in Reformed Christian terms and tied to an archaeological site on campus. It names Six Nations of the Grand River and Mississaugas of the Credit First Nation and lists planned steps, including an Introduction to Indigenous Studies course.	The Chemistry program page presents the Core Curriculum ('Chemists who are grounded in a biblical worldview are able to discern the ethical implications of their work and research') and requires one Senior Seminar (CHE-381/382/383/384, on 'historical, theological, ethical, societal, and vocational dimensions') and SCI-310 History & Philosophy of Science (of 'Western science'). The 2026-27 calendar lists APS-255 Introduction to Indigenous Peoples in Canada, but the pages read do not tie it to the Chemistry program.
Tyndale University	Tyndale's one fetched statement (June 4, 2021) responds to the Kamloops findings and uses the word reconciliation; it commits to "215 seconds" of silence and prayer and to taking "the actions necessary". No plan or strategy was located.	No biochemistry-like unit confirmed; nothing unit-authored found.
OCAD University	(paraphrase from fetch summary) OCAD University uses the word decolonization in its former Academic Plan 2017-2022 and in IEC documents, and commits to the TRC Calls to Action and to the 13 Principles on Indigenous Education (Universities Canada). It has an Indigenous Education Council (est. 2008) and an Executive Director, Indigenous Engagement.	(paraphrase from fetch summary) No biochemistry-like unit exists. Nothing relevant to biochemistry found.
McGill University	(paraphrase from fetch summary) The Provost's Task Force on Indigenous Studies and Indigenous Education released a Final Report in 2017 with 52 Calls to Action. The Office of Indigenous Initiatives is 'officially tasked with the initiation of the implementation' of those Calls. The Calls cover curriculum content, research protocols, health-professions access and relationships with communities. McGill's own pages use 'reconciliation' most often and give no formal definition of terms.	(paraphrase from fetch summary) catalogue scan found no Indigenous/decolonial/ethics course in the BSc Biochemistry Major lists; FMED 506 exists in the Faculty of Medicine but is not offered this catalogue year and is not a degree requirement.
Université de Montréal	The Place aux Premiers Peuples initiative began in 2018 within the broader équité, diversité et inclusion work; its first plan covered 2020-2023 and a plan for 2024-2029 follows, with four structural projects including 'Atteindre un plus grand équilibre des savoirs'. The university page names 'décolonisation', 'réconciliation' and 'sécurisation culturelle'. A Research Decolonization Committee and the CRI-JaDE centre are described in the 2023 portrait.	The Département de biochimie et médecine moléculaire page contains no Indigenous, decolonization, ÉDI or land-acknowledgement text, and its only equity-related resource is the reporting of incivility and harassment through the Faculty. Nothing unit-authored found.
Université Laval	Laval's plan 'Vers un portage collaboratif : marchons ensemble avec les Premiers Peuples' (successor to the 2021 plan 'En action avec les Premiers Peuples') is organised in four axes: a culturally safe student pathway, learning together, widening horizons in research, and living reconciliation. The institution's own word is 'réconciliation'; the 2023 EDI policy also mentions 'décolonisation'.	The department page names the department and its faculty links but contains no Indigenous, decolonization, ÉDI or land-acknowledgement text. Nothing unit-authored found.
Université de Sherbrooke	UdeS adopted the 'Plan d'action 2021-2026 pour et avec les peuples autochtones' in three axes: a welcoming environment, increased production and sharing of Indigenous knowledge, and contributing to 'le rayonnement des peuples autochtones' and reconciliation. It says it responds to the TRC Calls to Action (2015) and the Viens Commission (2019).	The Département de biochimie et de génomique fonctionnelle page contains no Indigenous, decolonization, ÉDI or land-acknowledgement text. Nothing unit-authored found.
Concordia University	Concordia's Indigenous Directions describes itself as 'the movement to decolonize and indigenize Concordia University'. The Indigenous Directions Action Plan (first tabled 2019, reopened 2021) is said to respond in part to the TRC Calls to Action and is described by Concordia as 'a guide and tool to enable all Concordians to move the University towards a more equitable and inclusive future'. A 2019 news report described it as a 39-point plan; Concordia's 2023 text says 41 recommendations.	What the Indigenous Directions curriculum guide asks of departments (answer to the brief): the CTL 'Getting started' guide is addressed to faculty ('A guide to support faculty in beginning their process of critical self-reflection'); steps are reading, the Primer Course on the Rotinonhsón:ni Confederacy, and consulting the Director. The Action Plan (2.1, 2.2) asks departments and chairs to identify gaps in Indigenous content, co-construct new core Indigenous courses, and self-assess course offerings; the 2023-2027 plan sets four strategic priorities (decolonize/Indigenize curriculum university-wide; cultural safety; co-design programs with Indigenous communities; shared learning communities across faculty units). None of these is a binding departmental requirement in the text read.
Université du Québec à Montréal	UQAM's Plan d'action 2021-2026 'Poursuivre l'engagement avec les Premiers Peuples' is followed by the Comité d'action des Premiers Peuples (created Dec 2021). The 2023 portrait describes training, an Indigenous studies concentration and research projects, using the terms réconciliation, autochtonisation and décolonisation.	The Département de chimie page contains no Indigenous, decolonization, ÉDI or land-acknowledgement text. Nothing unit-authored found.
Université du Québec à Trois-Rivières	UQTR's 2023 portrait to the Quebec inter-university office describes ten advisers and resource persons, courses with Indigenous content, a Cercle de partage autochtone and a decolonizing course-outline guide. The institution links the work to ÉDI and the Dimensions Charter.	The department page (found under the name 'Département de biochimie, chimie, physique et science forensique') contains no Indigenous, decolonization, ÉDI or land-acknowledgement text. Per the university's own 2023 portrait, a professor of the department (listed under its earlier name) is one of its Indigenous-realities resource persons.

University	University level	Unit level
Université du Québec à Chicoutimi	(paraphrase from fetch summary) UQAC reports a Centre des Premières Nations Nikanite, officially recognised since 1991, and a portfolio of '26 programmes spécifiques aux Premiers Peuples'. Its 2023 portrait describes an annual pow-wow, Orange Shirt Day, an Indigenous person on the research ethics committee, a UNESCO Chair and a framework agreement with the Pekuakamiulnuatsh nation. UQAC uses the terms Premiers Peuples, Premières Nations, sécurisation culturelle and EDI; the pages fetched do not use décolonisation or autochtonisation.	(paraphrase from fetch summary) The Département des sciences fondamentales home page names its programmes as Éco-conseil, Ressources renouvelables, Environnement et Biologie, and Module des sciences fondamentales, and contains no Indigenous, reconciliation or EDI text. The only unit-linked item is a university-authored line saying the department's new Certificat en agriculture nordique will contain a course on Indigenous perspectives on agriculture. Nothing else unit-authored found.
Université du Québec à Rimouski	UQAR's 2023 portrait states that its strategic plan has no specific mention of Indigenous teaching or research but contains an EDI indicator, and that UQAR has no policy or structure reserved for Indigenous questions. It reports an Indigenous advisory committee (2021) with the Innu communities of Pessamit and Essipit, and says UQAR « reconnaît les droits distincts des Premiers Peuples et l'importance des territoires traditionnels sur lesquels elle est située » [our translation] recognises the distinct rights of First Peoples and the importance of the traditional territories on which it sits. UQAR's own words are équité, diversité, inclusion et accessibilité (EDIA) and réalités autochtones.	The department page lists biology, chemistry and geography staff and links research to marine-science and nordicity axes; it contains no Indigenous, reconciliation or EDI text beyond one faculty member's listed interest in 'Territoires autochtones'. Nothing unit-authored found on the nine questions; the portrait names unit-affiliated research that integrates Inuit and Innu knowledge.
Université du Québec en Outaouais	(paraphrase from fetch summary) UQO's 2022-2026 strategic plan includes a target for an institutional strategy on 'équité, de diversité, d'inclusion et d'autochtonisation', and the portrait says an action plan on autochtonisation is due 'au plus tard à l'automne 2024' (status not checked). UQO runs a Bureau de liaison autochtone (created April 2020), an institutional EDI committee (CIEDI, 2021) with 3 of 21 members self-identifying as Indigenous, and a teaching-support centre (CSIPU, 2021) with an adviser on 'décolonisation, autochtonisation'. UQO's own words: autochtonisation, décolonisation, réconciliation, résurgence, antiracisme, ÉDI/ÉDIA.	(paraphrase from fetch summary) The Département des sciences naturelles page carries its own territorial acknowledgement (recorded in the acknowledgements table, not coded as an effort). It lists programmes in biologie, écologie et environnement et gestion durable des écosystèmes forestiers; a 2-cycle graduate brochure lists la biochimie et les biotechnologies among fields of activity. No unit-authored decolonization or Indigenization activity found beyond the acknowledgement.
Université du Québec en Abitibi-Témiscamingue	UQAT describes its work with Indigenous peoples as a Chantier peuples autochtones with a 2019-2024 action plan (version updated November 2024), an École d'études autochtones (created 2016), and a Service Premiers Peuples. The plan says it will make UQAT's programmes 'culturellement pertinent[s]', work towards a 'sécurisation culturelle' environment, and leaves those terms to be defined. UQAT uses French terms peuples autochtones, pertinence culturelle, sécurisation culturelle.	UQAT's list of schools, institutes and units shows engineering (École de génie), research institutes in agriculture, mines/environment and forests, and UERs in education, management and health sciences; no biochemistry, chemistry or biology unit. Nothing unit-authored to report.
Institut national de la recherche scientifique	(paraphrase from fetch summary) INRS is a graduate-only institute. Its 2023 portrait describes a Réseau DIALOG on Indigenous knowledge founded in the late 1990s and anchored at INRS, a Comité de collaboration avec les Premiers Peuples (active since fall 2019), three EDI training modules (2021), two graduate courses with Indigenous content, and a 2022 'déclaration de reconnaissance territoriale'. INRS's own words are réconciliation, Premiers Peuples, peuples autochtones, EDI; décolonisation appears in a researcher's thematic list.	(paraphrase from fetch summary) The Centre Armand-Frappier Santé Biotechnologie page describes the centre's health, biotechnology and technology-transfer mission and has no Indigenous, Premiers Peuples, réconciliation or EDI text. Nothing unit-authored found. The 2023 portrait's researcher table includes a researcher in Glycobiologie du cancer alongside social-science researchers on Indigenous topics, without stating a centre.
Bishop's University	(paraphrase from fetch summary) Bishop's 'Indigenous Community and Reconciliation' page says the university sits on W8banaki Nation territory, states it contributed to the systematic erasure of Indigenous peoples and their cultures, and commits to the TRC Calls to Action through higher education. It lists an Indigenous Student Success Centre, Kwigw8mna, an Indigenous Studies minor and Abenaki language courses. Its EDI page lists a Joint Board and Senate Task Force on EDI (2021-2022), an EDI Strategy still being formatted, and an Office of EDI. Bishop's own words: reconciliation, Truth and Reconciliation Commission Calls-to-Action, EDI, decolonization (department text).	(paraphrase from fetch summary) the biochemistry honours/major plans carry a 'Skills and Perspectives' list (3 courses) with SOC 107, HIS 108, LIB 218 History and Philosophy of Science; these are options, not requirements.
TÉLUQ	(paraphrase from fetch summary) TÉLUQ's 2023 portrait says its strategic plan has no specific mention of Indigenous teaching or research, that it has no Indigenous advisory committee but a 'comité de réflexion sur les réalités autochtones', a conseillère à la communauté étudiante des Premiers Peuples, and an awareness webinar for all employees. It says the university offers all courses at a distance. TÉLUQ's own words: réalités autochtones, Premiers Peuples, sécurisation culturelle.	(paraphrase from fetch summary) The portrait names a Département Science et Technologie (professors in environmental health, organic geochemistry, environmental sciences), but no biochemistry unit or programme was found. Nothing unit-authored found. The portrait lists one department research project with a First Nation (see outreach).
University of New Brunswick	UNB's Truth and Reconciliation (TRC) Strategic Action Plan is a 10-point plan including an Indigenous Advisory Council, an Indigenous Lead (Pliuwitahasuwin, Assistant Vice-President, Indigenous Engagement), expanded Indigenous content in curriculum, and a Wabanaki Learning Centre. The Mi'kmaq-Wolastoqey Centre runs an app for the Wolastoqey language and an annual powwow.	Nothing unit-authored found. The seed's 'biochemistry program' within Chemistry/Biology was not confirmed on the two department pages read.
Université de Moncton	The Plan d'action autochtone réseau (2022-2028) rests on a Declaration of Commitment signed with the chiefs of the Mi'gma'we'l Tplu'taqnn and the chief of the première nation malécite du Madawaska, in five orientations. It names autochtonisation and décolonisation, and covers hiring, student access, language revitalisation, curriculum and research visibility. [our translation]	Unit pages carry nothing on Indigenous matters. The course catalogue (Répertoire des cours, 2025-2026, queried by subject) shows no Indigenous, decolonial or history-of-science wording in any BICH or CHIM description. The biochemistry major's required FSCI3903 Pratique professionnelle covers professional and research ethics generically, and the general-education bank (OFG2) offers, among many options, LING4400 Langues & cultures autochtones and LING3100 Langue et colonialisme.
Mount Allison University	Mount Allison's strategic plan commits to co-creating an Indigenization framework with local and regional Indigenous communities. Its Indigenous page names an Indigenous Advisory Circle, theme years 2016-18, an Indigenization Resource Guide for faculty, and courses on decolonizing methodologies.	The 2026-2027 calendar's Chemistry and Biochemistry chapters (BIOC and CHEM descriptions) contain no Indigenous, decolonial, ethics or history-of-science wording; BIOC 3601/CHEM 3601 Research and Communication covers the scholarly publishing and research-funding ecosystem. The calendar's Indigenous Studies chapter offers INDG 2881 Traditional Ecological Knowledge (cross-listed GENS 2881, science prerequisites accepted) and INDG 3901 Indigenous Research Ethics, neither listed in the Chemistry/Biochemistry degree requirements.

University	University level	Unit level
St. Thomas University	STU's own pages could not be read. A 2019 NB Media Co-op article (see contention) describes a Native Studies department, a Wabanaki Student Centre (2012) and Mi'kmaq and Wolastoqey language programs.	No biochemistry-like unit confirmed; nothing unit-authored.
Crandall University	No university-level framework located on the pages read. A search snippet mentioned an Indigenous land acknowledgement; not fetched, so not recorded.	A Science program exists; whether chemistry or biochemistry is offered was not confirmed.
Dalhousie University	(paraphrase from fetch summary) Dalhousie's Mi'kmaq and Indigenous Relations pages say Since the Truth and Reconciliation Commission's (TRC) Calls to Action, Dalhousie has been increasingly committed to strengthening relationships with Indigenous peoples. The university names an Office of the Vice-Provost of Indigenous Relations, an Indigenous Strategy (2018, 37 recommendations, progress update February 2025) and an Indigenous Strategy 2026-2036 in development. It uses the words reconciliation, EDIA and (in research guidance) Etuaptmunk.	(paraphrase from fetch summary) Department pages carry no Indigenous statement. In the 2026/2027 Undergraduate Calendar, none of the BIOC course descriptions linked from the department page contains Indigenous, decolonial or reconciliation wording; BIOC 3501 Introduction to Biotechnology lists 'the history and scope of biotechnology' and 'responsibilities in biotechnology' among its topics. Faculty of Science BIOL 4003/INDG 4003 and INDG 1000 Mi'kma'ki are available as electives but are not in the degree requirements read.
Saint Mary's University	(paraphrase from fetch summary) SMU states it is in Mi'kma'ki and has a page for the Indigenous community with Qomuti, an Indigenous student space, an Indigenous Student Advisor and scholarships. A 2018 news item says the new Indigenous advisory council provides an external viewpoint for Indigenous supports on campus, and Indigenous issues facing the post-secondary sector. The institution's word is reconciliation.	(paraphrase from fetch summary) Department pages carry an EDI (IDEA) committee statement. The 2025-2026 Undergraduate Calendar's CHEM course descriptions and the BSc Chemistry requirements contain no Indigenous, decolonial, ethics or history-of-science wording (CHEM 1221 Chemicals and CHEM 2100 Green Chemistry mention everyday life and technology's environmental effects only). ENVS 3460 Indigenous Experience and Environmental Impact (Faculty of Science) is an elective outside the chemistry requirements; the calendar also lists an Indigenous Studies minor open to all three faculties.
Acadia University	(paraphrase from fetch summary) Acadia's President released a decolonization strategy on 6 March 2018 after a President's Advisory Council on Decolonization (formed 2016, including Mi'kmaq community members) delivered 15 recommendations. The Handbook Working with Indigenous Peoples at Acadia University gives protocols for acknowledgements, Elders, smudging and events, and says its purpose is to increase understanding of Indigenous cultures and knowledge. The institution's word is decolonization.	(paraphrase from fetch summary) Nothing unit-authored found. The Chemistry Department's pages carry only the territorial statement in the footer; the undergraduate page lists biochemistry courses (CHEM 2713 Biochemistry) and PHIL 2713 Biomedical Ethics, with no Indigenous course listed (tool extract).
St. Francis Xavier University	(paraphrase from fetch summary) Per The Xaverian Weekly (20 Oct 2016), StFX launched an 'Indigenizing the Academy' committee chaired by the Dean of Arts, with all four Deans, faculty from each department, librarians, students and community members from Paqtn'kek. A June 2025 agreement between StFX and The Confederacy of Mainland Mi'kmaq commits to work on Mi'kmaw language, laws, and self-governance (tool summary).	(paraphrase from fetch summary) The Department of Chemistry pages (read via the Internet Archive because stfx.ca returns 403 to direct fetches) describe BSc programs with concentrations in Sustainable Chemistry and Renewable Energy and in Biochemistry and carry no Indigenous or equity statement. The Courses page (CHEM 101-4xx, 2024/25 listing) has no Indigenous, ethics or history wording. The Sustainable Chemistry concentration page says the field 'considers the intersection of chemistry with society, economy and environment' and suggests PHIL 213 Philosophy of Science, PHIL 333 Environmental Ethics and SOCI 329 Climate Justice as electives.
Cape Breton University	CBU's Indigenous Initiatives page says "Indigenous culture, heritage and knowledge are integrated into CBU's Indigenous education options, offering all CBU students the opportunity to not only learn about these cultures, but to learn from them". It names Unama'ki College ("the vibrant heartbeat of Indigenous education at CBU for almost 50 years"), Mi'kmaw Ethics Watch, a Purdy Crawford Chair, and the Sister Dorothy Moore L'nu Resource Centre. A job posting cites a Strategic Plan pillar 'Indigenizing the L'nu Way'.	CBU's chemistry pages carry no Indigenous statement. The BSc Chemistry requirements make 3 credits of PHIL-2221 Science and Society or PHIL-2223 Technology and Society part of the core. Separately, CBU teaches an Integrative Science (MSIT) course series, each written as paired 'Mi'kmaw world view' and 'Western science' sections and designated science, and the calendar says these may be used as BSc electives; whether chemistry students take them was not assessed. Etuaptmunk appears on CBU event pages; no current science course description reads it.
Mount Saint Vincent University	(paraphrase from fetch summary) MSVU's Indigenous Initiatives page lists an Indigenous Student Centre, the Wije'winen Indigenous Knowledge Initiative (first-year courses at the Mi'kmaw Native Friendship Centre), a L'nu Advisory Circle formed 2020, the wikuom, and a Special Advisor role established in 2017. The EDIA page names the MSVU Accessibility Plan 2025-2028 and participation in Dimensions: Equity, Diversity and Inclusion Canada.	(paraphrase from fetch summary) The 2026-2027 Chemistry course list (CHEM 1003-4602) and BSc Chemistry requirements contain no Indigenous, decolonial, ethics or history-of-science wording (CHEM 1003 Chemistry of Everyday Life aims to make 'more informed citizens'). The major requires 1.0 unit each from Core A, B and C; Core B lists Canadian Studies and Sociology/Anthropology, whose catalogue includes CANA/SOAN 3651 Indigenous Peoples in a Settler State; Mi'kmaw language courses (MIKM) are not in the Core C list as published.
Université Sainte-Anne	La page de l'Université Sainte-Anne sur l'ÉDI nomme un plan d'accessibilité, une stratégie institutionnelle pour l'équité, la diversité et l'inclusion et une politique pour un milieu de travail et d'études respectueux; aucune mention des Autochtones (rapport de l'outil). [our translation] The ÉDI page names an accessibility plan, an institutional strategy for equity, diversity and inclusion and a respectful workplace and study policy; no mention of Indigenous peoples (tool report).	No biochemistry-like unit found on the Études page. Nothing unit-authored.
University of King's College	(paraphrase from fetch summary) King's states King's is deeply committed to the work of Reconciliation and names Mawio'mio'kuom (Indigenous Students Centre) and Mawaknutma'tnej, a circle of Indigenous community leaders and representatives from the University of King's College that advises and guides the university on initiatives in support of the Indigenous community (tool extracts).	(paraphrase from fetch summary) No chemistry or biochemistry unit; King's offers History of Science and Technology (page not read). Nothing unit-authored on biochemistry.
NSCAD University	NSCAD names an EDIA Targeted Action Plan, a Land Acknowledgement and a People's Acknowledgement recognizing Mi'kmaq territory and African Nova Scotian presence.	No biochemistry-like unit. Nothing unit-authored.
University of Prince Edward Island	UPEI lists Reconciliation among its stated values and offers a Minor in Indigenous Studies (IKE courses). It acknowledges "our location in the unceded, traditional territory of the Mi'kmaq People of PEI".	The Chemistry chapter of the 2026-27 UPEI calendar states that IKE 1040 Indigenous Teachings of Turtle Island is required for every undergraduate degree, and the chemistry major's first-year sequence includes it. Chemistry-owned courses carry no Indigenous content in their descriptions; CHEM 2820 Introduction to Scientific Research lists 'ethics in research' among its topics. A Social Studies of Science minor (history and sociology of science) is open to science students.

University	University level	Unit level
Memorial University of Newfoundland	(paraphrase from fetch summary) The Strategic Framework for Indigenization 2021-2026 sets four priorities and points readers to definitions of Indigenization, Decolonization and Reconciliation (not read: PDF 404). It links to Indigenous Research at Memorial.	(paraphrase from fetch summary) The Biochemistry programs are no longer offered; the 2025-26 calendar (Faculty of Science 11.1) says: The programs formerly offered in Biochemistry (listed below) are no longer offered. Students wishing to choose a major in subject matter related to the Biochemistry or Biochemistry (Nutrition) programs should declare Human Biosciences as a major. Two Human Biosciences courses name Indigenous content in their descriptions (HUBI 3004, HUBI 3005); HUBI 4240 notes ethical issues in personal DNA data.
Yukon University	(paraphrase from fetch summary) The Board approved Breaking the Dawn: Reimagining Reconciliation through Re-education (Reconciliation Framework); the university states it is on the territories of the 14 Yukon First Nations and has a Vice-President, Reconciliation role. The 2022-2027 plan Becoming says it is committed to Truth and Reconciliation and to support the self-determination of Yukon First Nations.	(paraphrase from fetch summary) The Science Certificate meets the Yukon First Nations Core Competency by YFN 101 or a listed 3-credit course (list includes PHIL 230 'Bridging Knowledges' and NS 200 'Indigenous Canada', a Science course cross-referenced with HIST 140). Science course descriptions include: GEOG 290 (Traditional, Indigenous, and Scientific Knowledge) and GEOL 106/108 ('Western and indigenous worldviews'). The biochemistry course (BCHM 200) and CHEM courses carry no Indigenous wording; BIOL 202 mentions ethics in genetics.
Huron University College	Huron says it is committed to the TRC Calls to Action "in our campus and in our curriculum" and, with Brescia and King's, hired an Indigenous Initiatives Coordinator in February 2022 to develop strategies to "decolonize and indigenize the curricula".	No chemistry or biochemistry offered per the program list read. A history course (HIST 4202F/G Confronting Colonialism) is the notable curriculum item.
King's University College (Western)	Shared coordinator role with Brescia and Huron. King's own Indigenous pages could not be read (kings.uwo.ca Indigenous Students page 404).	No chemistry or biochemistry program per program list read.

13. What the reviewers said

Conscience (equity, diversity, inclusion and decolonization review). Designed the survey before searching and reviewed the merged data before this report was written. Verdict on the data: *Flagged*, usable after recodes. Its findings, all applied: "relies on the university" had been coded by batch habit rather than by evidence, so the same evidence got different codes in different regions; Q4 had counted plans and course requirements as reviews; Q1 "concerted effort" needed a documented activity about decolonization, Indigenization or reconciliation, which left Western alone; one course-approach code had been applied to courses with no bioscience content; some outreach rows only named nations; several names and outlet-described identities had leaked into fields that should not carry them. It supplied the distinctive-items list in section 8, the First Nations University paragraph in its own words, the SAFS wording in section 11, and the language rules this report follows (collective terms, Two-Eyed Seeing attribution, TRC Call 62(ii) quoted exactly, acknowledgements recorded but not counted). It asked whether Western's Department of Biochemistry is the PI's own department; the PI has confirmed it is, and the disclosure in section 2 says so. It recommends paid review of this report by Indigenous scholars before any use beyond the PI's own work, with Western's Office of Indigenous Initiatives as the office its resources name for routing that question.

Lawyer (publication risk). Verdict: *Conflict* for publication as the table stood; *Clear, with conditions*, for internal research use. Conditions applied: a human-rights complainant's name removed from every field; eight rows outside the scope of Q9 moved to a separate file with reasons; quotation marks removed from every quote that came through the summarising fetch tool; student reporters credited to their outlet; the Lethbridge petition quote trimmed to its operative ask; the Mount Royal, Queen's, Memorial and Western rows reworded so that no causal claim or claim about an individual's identity is made in our voice. Before any publication: route the Western Faculty of Education rows and the whole of section 11 to Western's Office of the General Counsel (Western is a party to pending litigation described here); obtain written confirmation from the research ethics office that a survey of public web pages is exempt under TCPS 2 Article 2.2; read the primary documents (the Lethbridge judgment, the Mount Royal arbitration award, the Western Senate Review Board decision) before quoting them; and give a prepublication read to counsel because of pending proceedings (the UBC petition, ACFA v. University of Alberta, the Université de Montréal complaint). The lawyer and the conscience differ on one point: whether to name published authors and office-holders who are parties to disputes. The lawyer's rule, that people who publish under their own byline or sign a letter in office are named as the source credits them, is followed in this report; students and complainants are never named.

Adversary (methodological audit). Two passes. The first, on an earlier draft, returned *major concerns*: the prose no longer matched data that had been re-merged under the conscience's recodes; Figure 4 overstated what was "observed"; the pilot statistic was stale and wrongly described; several absolute claims ("only", "anywhere", "most cited") outran the coverage; two of counsel's conditions were still breached in the text; and a few codes failed the design's own rules (TMU, Queen's course review, duplicate course rows). Every item was applied: the merge now applies the audit's recodes, the figures were redrawn, the pilot script was rewritten to merge only "none found" and "not assessable" and to report kappa, and the claims were softened. The second pass, on the revised draft, recomputed every count from the released data and found them matching, with seven small text corrections, all applied. Its verdict: *needs revision (minor, text only)*; the methodology is sound for the PI's internal use. It adds that the pilot check means coded categories, "term used, undefined" above all, should be read as indicative, and that the report remains a record of what institutions publish, not of what they do. Its gate: no intellectual property is being acted on and nothing governed is moving; counsel's verdict, quoted, is "Conflict for publication as the table stands; Clear, with conditions, for internal research use", and the conditions for internal use are now met in the text. Both audits are in `outputs/adversary/report_audit_1.md`.

14. Limits, and what would improve the survey

- **It sees only what is published.** A department that runs workshops without a web page is invisible here. Western's department is the best documented unit partly because it writes everything down.
- **The search cap.** A session-wide limit of 200 web searches ran out early in both waves, so most second-wave work used direct page fetches. "Not assessable" rows are the honest record of that. A re-run with the cap lifted would deepen Q6 (materials) and Q9 (criticism, especially in French and in the student press) first.
- **Fetch summaries.** Some wave-1 quotes came through a summarising fetch tool and are marked "(fetch summary)" in the data; wave-2 quotes were taken by curl or pdftotext and are verbatim. Spot-check marked quotes before quoting them onward.

- **Source skew in Q9.** One organization's indexed archive is over-represented. The student-press, faculty-association and Indigenous-caucus searches that would balance it were cut short.
- **Calendars.** Some were read from archived or earlier years (Brock 2022-25, Trent 2020-21, Calgary 2023-24, Memorial 2025-26). McMaster's and UNBC's calendars could not be read, so their course rows come from outlines or titles.
- **Primary documents not read.** Counsel's condition for any publication: read the Lethbridge Court of King's Bench judgment, the Mount Royal arbitration award and the Western Senate Review Board decision before quoting them, and cite originators rather than copies hosted by a party to the dispute.
- **Coding drift.** The pilot showed coders differ on "none found" versus "not assessable" and on whether university-level use of a term counts for a unit. The conscience's review found the same drift across batches and set rules; the tables follow those rules, with every original value kept in a companion column of the spreadsheet so the recoding can be checked.
- **"None found" is not uniform.** Thirty Q1 rows coded "none found" carry an "observed" evidence level, meaning a page was read and said nothing; institutions with no unit were coded "none found" with the note "no unit". The adversary's audit lists the remaining inconsistencies; they do not change the pooled counts.
- **What is not here.** The views of First Nations, Métis and Inuit communities on any of these relationships, except where a community has published them (Westbank First Nation, the Okanagan Nation Alliance, the NunatuKavut Community Council, the YUFA Indigenous Caucus). Those statements are presented as their own words. The report also carries things a desk survey cannot vouch for: nation names as institutions write them, the First Nations University profile, the Two-Eyed Seeing attribution, and the contested question of historic Métis communities in Quebec, which it does not settle. The conscience recommends paid review of this report by Indigenous scholars before it is used beyond the PI's own work. The PI plans to approach Western's Office of Indigenous Initiatives on that question and to speak with legal counsel before any publication.

Part II. Additions requested after the first report

Added 5 October 2026 at the PI's request: an inventory of the textbooks in use, a legal review of scanning textbooks and course curricula, an evaluation of Western's biochemistry courses with suggestions, and the reviewers' verdicts on this part. Version 2 of the report.

15. Textbooks named on public pages for Canadian biochemistry programs

What was asked. An exhaustive evaluation of the textbooks used in biochemistry departments, broadly interpreted (biochemistry, molecular biology, cell biology, cancer, genetics, pharmacology, physiology, anatomy and other health and life sciences), organised by year of study and covering undergraduate and graduate teaching. The evaluation of the books themselves must wait on the legal route in section 16, because the PI does not hold copies and the books are commercial works. What this section delivers is the inventory: which texts are named for which courses, from public sources, as the first step.

How the inventory was built. Seven bookworm agents covered the 41 pooled units (section 2) and Western's department in depth. For each unit they read the biochemistry program's required and core courses, the unit's graduate courses and common health and life-science electives, and recorded a text only where a page they fetched names it: a course outline or syllabus, a department course page, a university bookstore course-materials listing, a library course reserve, or a calendar entry. Where no page names a text, the course is recorded as "no text published" so the gap is visible. Nothing was listed because it is a standard text. Year of study is taken from the outline or program grid where stated and otherwise inferred from the course number, which the notes column says.

What was found. The inventory holds 1,387 course rows across the 41 pooled units. Thirty-seven units were inventoried course by course; for four (Sherbrooke, Concordia, UQTR and Bishop's) no public source could be reached at all, so they carry one placeholder row each. Of the 408 rows that name something, 372 name a textbook; the others are lab manuals (15), untitled open or no-cost resources listed by a bookstore (12), career or writing books (4), study guides (2), a coursepack and a molecular model kit, which are kept in the tables with a label but not counted as texts, plus 1 row whose title the bookworm could only infer, which is excluded. 7 textbook rows rest on instructor pages from about 2008 and 2019 for courses since replaced, or are marked "previously used"; they are labelled and left out of the counts below, leaving 367 current textbook listings, or 350 once 17 repeated listings of the same text for the same course (sections, formats) are merged. Textbooks were found for 20 of the 37 inventoried units. Of the 372 textbook rows, 175 are required, 113 recommended, 75 optional, and 9 not stated or open access. By year of study, the 350 deduplicated listings are: year 1, 28; year 2, 104; year 3, 128; year 4, 71; graduate, 19. The graduate listings are almost all western bookstore data (Alberta 6, Victoria 5, Calgary 4, Lethbridge 2, British Columbia 1, York 1); Toronto's two graduate courses list career and writing books, not textbooks. Listings come from bookstore data at ten universities (Alberta, Victoria, Lethbridge, Calgary, UNBC, UBC, McGill, Montréal, Waterloo, Western), from course outlines (McMaster, Guelph, York, Dalhousie, SFU, Carleton, Queen's, Toronto) and from department pages: by source, 201 bookstore, 123 course outline, 24 department page, 2 other. The scope is not comparable across universities: a bookstore sweep enumerates a whole faculty (Alberta's covered 242 courses against Western's 31), which is why the subject counts (biochemistry 89, chemistry 61, cell biology 48, physiology 37, microbiology and immunology 35, pharmacology 14, genetics 13, anatomy 10, molecular biology 8, cancer 3, other health and life sciences 32) mostly measure which sites could be swept.

After merging format variants (loose-leaf, e-text, rental, bundle) and editions under one canonical title, there are 250 distinct titles; 26 are named by two or more units and are listed in 15.1. Nelson and Cox's *Lehninger Principles of Biochemistry* is the text most often named in the pages we could read: 8 current units (Dalhousie, McGill, McMaster, Queen's, British Columbia, Guelph, Northern British Columbia, York) in 18 courses; Manitoba's 2008 page would make one more. Named by five units: Quantitative Chemical Analysis (Harris & Lucy). By four: Essential Biochemistry (Pratt & Cornely); Biochemistry (Voet & Voet); Essential Cell Biology (Alberts et al.); Janeway's Immunobiology (Murphy & Weaver); Molecular Biology of the Cell (Alberts et al.). By three: Basic and Clinical Pharmacology (Katzung & Vanderah); Organic Chemistry (McMurry); Biochemistry (Garrett & Grisham); Biochemistry: A Short Course (Tymoczko, Berg & Stryer); Introduction to Genetic Analysis (Griffiths et al.); Membrane Structural Biology (Luckey). "Most often named" is a statement about the pages that could be read, never about how widely a text is used. Open texts are a small, separate group: 9 listings record an open textbook or open-access text (Simon Fraser 3, Ottawa 2, Guelph 2, McMaster 1, York 1) and 12 bookstore listings record an untitled no-cost resource (Calgary 8, UBC 2, Victoria 2); none of the recurring biochemistry texts is open. For the 17 inventoried units with no named current textbook (University of Saskatchewan, University of Regina, University of Manitoba (Biochemistry and Medical Genetics), University of Manitoba (Chemistry), University of Winnipeg, Université de Saint-Boniface, Canadian Mennonite University, University of Windsor, Wilfrid Laurier University, Brock University, Trent University, Laurentian University, Redeemer University, Université Laval, Université de Moncton, Mount Allison University, St. Francis Xavier University), the absence is a fact about their websites and bookstores, not about their teaching.

How to read the tables. Textbooks named on public pages, by year of study. The inventory is partial and still in progress (pages accessed 5 October 2026). Each row is a text named by a course outline, department page, bookstore listing or calendar. "Not published" means we found no public page naming a text for that course. The tables record coverage; they do not rate texts or departments. They list books, not judgements, and carry no column about decolonization, now or later. Rows are in a fixed order (title, then university from west to east), never by count. A dagger after a course code means the year of study was inferred from the course number, which is the case for almost every row (327 of 350): bookstores and most outlines do not state a year. Each row carries the date of the page read (a term, a listing year, or the access year), kept separate from the book's own publication year. Texts from courses since replaced are labelled. Non-textbook materials are labelled by kind. Where a bookstore lists the same text for two sections or in two formats, the year tables show each listing and the counts above merge them. Links to instructor-hosted pages are withheld and kept in the internal record.

Limitation. These tables show only textbooks named on pages the public can reach. Universities that keep outlines and booklists behind a login appear mostly as "not published", so the tables over-represent universities with open course pages, including our own, Western, which we read most fully. Dalhousie, McMaster, Guelph, York, Queen's, SFU, Carleton and Toronto publish outlines or course pages that name texts; bookstore data could be read at ten universities, mostly in British Columbia and Alberta; most other bookstores are JavaScript applications or sit behind logins, and most outlines are on course sites that need a student login. A university with few rows is a university whose texts are not public, not a university that uses fewer books. French titles are kept in French, and francophone gaps are not absence. For publication, links to instructor-hosted pages would be removed and kept in the internal record.

15.0 Coverage by university

University	Courses checked	Courses with a named textbook
Simon Fraser University	65	23
University of British Columbia	91	17

The courses for which no public page names a text are listed in Appendix G.

15.1 Textbooks named by two or more units (alphabetical; current textbooks only)

Textbook	Authors	Publisher	Units	Courses	Years of study	Subjects	Universities
Basic and Clinical Pharmacology (Katzung & Vanderah)	Vanderah Todd	Mcgraw Hill / Medical	3	5	2; 3; 4	pharmacology	McMaster University; Queen's University; University of British Columbia
Biochemistry (Berg, Tymoczko, Gatto & Stryer)	Jeremy M Berg	Freeman Macmillan	2	2	3; 4	biochemistry	University of Guelph; University of Victoria
Biochemistry (Garrett & Grisham)	Reginald H. Garrett, Charles M. Grisham	Nelson Education	3	3	2; 3	biochemistry; molecular_biology	Carleton University; McMaster University; Western University
Biochemistry (Miesfeld & McEvoy)	Roger L. Miesfeld and Megan M. McEvoy	W.W. Norton & Company	2	3	2	biochemistry	Dalhousie University; Simon Fraser University
Biochemistry (Voet & Voet)	D. Voet and J.G. Voet	Wiley & Sons	4	4	2; 3; 4	biochemistry	Dalhousie University; University of Guelph; University of Toronto; York University
Biochemistry: A Short Course (Tymoczko, Berg & Stryer)	John Tymoczko, Jeremy Berg and Lubert Stryer	W.H. Freeman and Co.	3	3	1; 2; 3	biochemistry	Carleton University; Queen's University; University of Toronto

Textbook	Authors	Publisher	Units	Courses	Years of study	Subjects	Universities
Essential Biochemistry (Pratt & Cornely)	Pratt	Wiley & Sons Inc.	4	6	2; 3	biochemistry	Dalhousie University; McMaster University; University of Alberta; Western University
Essential Cell Biology (Alberts et al.)	Alberts	W.W. Norton	4	4	2; graduate	cell_biology	Simon Fraser University; University of Alberta; University of British Columbia; University of Victoria
Fundamentals of Biochemistry (Heilman & Woski)	Heilman	Wiley	2	2	3	biochemistry	Dalhousie University; McGill University
Fundamentals of Biochemistry (Voet, Voet & Pratt)	Voet	John Wiley & Sons	2	4	3	biochemistry	Carleton University; University of Alberta
Genetics: A Conceptual Approach (Pierce)	Pierce	MacMillan	2	2	2	cell_biology; genetics_genomics	University of Alberta; University of Guelph
Introduction to Genetic Analysis (Griffiths et al.)	Griffiths / Cei 264 262	Macmillan Learning	3	3	2; 3	genetics_genomics	University of British Columbia; University of Calgary; University of Lethbridge
introduction to proteins structure function and motion (kessel)	Kessel, Amit; Ben-Tal, Nir	CRC Press LLC	2	2	3; 4	biochemistry	Simon Fraser University; University of Guelph
Janeway's Immunobiology (Murphy & Weaver)	Murphy	Ww Norton	4	4	3; 4	microbiology_immunology	McMaster University; Queen's University; University of Calgary; University of Victoria
Lehninger Principles of Biochemistry (Nelson & Cox)	Nelson / Cox	Mps	8	18	2; 3; 4	biochemistry	Dalhousie University; McGill University; McMaster University; Queen's University; University of British Columbia; University of Guelph; University of Northern British Columbia; York University
Membrane Structural Biology (Luckey)	Mary Luckey	Cambridge University Press	3	3	4	biochemistry	McMaster University; University of Guelph; University of Toronto
Microbiology: An Evolving Science (Slonczewski & Foster)	Joan L Slonczewski, John W Foster, Erik R Zinser	W. W. Norton	2	2	2; 3	microbiology_immunology	McGill University; University of Guelph
Molecular Biology of the Cell (Alberts et al.)	Alberts	Garland Publishing	4	4	2; 3	cell_biology; physiology	Simon Fraser University; University of Alberta; University of Victoria; York University
Molecular Biology of the Gene (Watson et al.)	J.D. Watson, T.A. Baker, S.P. Bell, A. Gann, M. Levine, R. Losick	CSH Press	2	2	3	molecular_biology	University of Guelph; York University
Molecular Cell Biology (Lodish et al.)	Department of MCB, University of Guelph	MacMillan	2	2	2	cell_biology; molecular_biology	McGill University; University of Guelph
Organic Chemistry (McMurry)	Mcmurry, John	OpenStax	3	5	2; 3; 4	biochemistry; chemistry	Carleton University; Simon Fraser University; University of Victoria
Physical Chemistry for the Life Sciences (Atkins & de Paula)	Atkins	Freeman	2	2	2; 3	biochemistry; chemistry	Dalhousie University; McGill University
Principles of Virology (Flint et al.)	Flint et al.		2	3	3; 4	microbiology_immunology	Queen's University; York University
Quantitative Chemical Analysis (Harris & Lucy)	Harris	Mps	5	5	1; 2; 3	chemistry	Simon Fraser University; University of Calgary; University of Victoria; Université de Montréal; York University
the analysis of biological data (whitlock)	Whitlock	Mps	2	2	2; 3	cell_biology; other_health_life_science	University of Calgary; York University
The Biology of Cancer (Weinberg)	Robert A Weinberg	Norton	2	2	4	cancer	University of Victoria; Western University

Carleton University	BIOC 3101 / CHEM 4401 †	Unlocking Metabolism: Pathways, Enzymes, and Control / Physical Aspects of Biochemistry (offered together, Fall 2026)	biochemistry	required	Biochemistry, Seventh Edition, Reginald H. Garrett; Charles M. Grisham, 7th (Brooks/Cole, 2023) [recommended]	2026	course_outline	link
Carleton University	BIOC 3101 / CHEM 4401 †	Unlocking Metabolism: Pathways, Enzymes, and Control / Physical Aspects of Biochemistry (offered together, Fall 2026)	biochemistry	required	Biochemistry: A Short Course, JL Tymoczko; JM Berg; L Gatto; L Stryer, 4th (W. H. Freeman, 2015) [recommended]	2026	course_outline	link
Carleton University	BIOC 3101 / CHEM 4401 †	Unlocking Metabolism: Pathways, Enzymes, and Control / Physical Aspects of Biochemistry (offered together, Fall 2026)	biochemistry	required	Biochemistry: An Integrative Approach, John T. Tansey, 1st (John Wiley & Sons, 2019) [recommended]	2026	course_outline	link
University of Lethbridge	BIOL 3520 †		cell biology		Biology Of The Invertebrates, 7 (McG) [recommended]	Fall 2026	bookstore	link

University	Course	Title	Subject	In program	Textbook (as stated)	Source date	Source	Link
Dalhousie University	BIOC 3700 †	Biomolecular Chemistry	biochemistry		Biophysical Chemistry, Klostermeier, D.; Rudolph, M.G., 2nd (2024) or 1st (2017), either suitable (CRC Press, Taylor & Francis Group, 2024 / 2017) [recommended]	Fall 2025	course_outline	link
York University	SC/Biol 3150 †	Microbiology	microbiology immunology		Brock Biology of Microorganisms, Madigan et al., 16th (Pearson, 2021) [required] [ebook]	2026	course_outline	link
University of Alberta	PMCOL 303 †	Introduction To Toxicolog	pharmacology		Casarett And Doull'S Toxicology: The Basic Science Of Poisons 9Th Edition **Available By Special Order Only**, Klaassen, 9TH [recommended]	Winter 2026	bookstore	link
University of Lethbridge	BIOL 3520 †		cell biology		CEI DIGITAL - eBOOK BIOLOGY OF THE INVERTEBRATES (180 day), 7 [required] [ebook]	Fall 2026	bookstore	link
University of Lethbridge	BIOL 3420 †		physiology		CEI DIGITAL - eText PRINCIPLES OF ANIMAL PHYSIOLOGY 6mos, 3 [recommended] [ebook]	Fall 2026	bookstore	link
University of Ottawa	BCH 3120 / BCH 3170 / BCH 4101 †	General Intermediary Metabolism; Molecular Biology; Human Genome Structure and Function	biochemistry		Cell Biology, Genetics, and Biochemistry for Pre-Clinical Students, Renee J. LeClair (Virginia Tech) [optional] [open_textbook]	2022	other	link
McMaster University	BIOCHEM 3H03 †	Clinical Biochemistry	biochemistry		Clinical Chemistry: Principles, Techniques, and Correlations, Michael L. Bishop; Edward P. Fody; Carleen Van Siclen; James March Mistler; Michelle Moy, 9th [optional]	Fall 2025	course_outline	link
University of Lethbridge	NEUR 3645 †		physiology		Cognitive Neuroscience: The Biology Of The Mind, 6 [recommended]	Fall 2026	bookstore	link
University of Calgary	BIOL 311 †	Principles Of Genetics	genetics genomics		Digital- Introduction To Genetic Analysis 12e Achieve W/ Ete, Griffiths, 12 (Mps) [optional] [ebook]	Fall 2026	bookstore	link
University of Calgary	BIOL 371 †	Cmpt'v Biol Plants & Animals	cell biology		Digital- Russell's Biology 5ce Mindtap W/ Etext (1 Year), Fenton, 5C (Nelson) [recommended] [ebook]	Fall 2026	bookstore	link
University of Alberta	PHARM 346 †	Pharmacotherapy 5	pharmacology		Dipro'S Pharmacotherapy: A Pathophysiologic Approach 12Th Edition **Available By Special Order Only**, Dipro, 12TH [required]	Winter 2026	bookstore	link
University of Northern British Columbia	BCMB 340 †	Physical Biochemistry	biochemistry	elective	Double Helix [required]	Winter 2026	bookstore	link
University of Victoria	BIOL 345 †		other health life science		E-Text: Animal Behavior (180-Day), Rubenstein [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	BIOL 321 †		other health life science		E-Text: Biology Of Invertebrates (180-Day), Pechenik [required] [ebook]	listing 2026	bookstore	link
University of Victoria	CHEM 337 †		biochemistry		E-Text: Introduction To Enzyme & Coenzyme Chemist (Lifetime), Bugg, T. D. H. [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	BME 320 †		physiology		E-Text: Materials Science+Engineering (Perpetual), Callister [required] [ebook]	listing 2026	bookstore	link
University of Victoria	BIOL 365 †		physiology		E-Text: Principles Of Animal Physiol(Lifetime Epub), Moyes [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	BME 335 †		physiology		E-Text: Principles Of Biomedical Instrument(Perpetual), Webb [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	CHEM 347 †		chemistry		E-Text: Quantum Chemistry & Spectroscopy (Perpetual Epub), Engel [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	BIOL 324 †		cell biology		E-Text: Raven Biology Of Plants (180-Day), Evert [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	HLTH 300 †		other health life science		E-Text: Social Determinants Of Health (180-Day), Davidson [required] [ebook]	listing 2026	bookstore	link
University of Victoria	MICR 303 †		microbiology immunology		Ebook for Janeway: Includes access to InQuizitive Case Studies in Immunology ebook and Animations, Kenneth Murphy, Casey Weaver, Leslie J Berg [optional] [ebook]	listing 2026	bookstore	link
University of Victoria	BIOL 360 †		cell biology		Ebook for Molecular Biology of the Cell: Includes The Digital Problems Book in Smartwork and Videos and Animations, Bruce Alberts [optional] [ebook]	listing 2026	bookstore	link
University of Northern British Columbia	BIOL 312 †	Molecular Cell Physiology	cell biology		Endless Forms Most Beautiful (Etext Life) [required] [ebook]	Winter 2026	bookstore	link
University of Calgary	CHEM 321 †	Environmental Chemistry	chemistry		Environmental Chemistry 5e, Baird, 5 (Wh Freeman) [required]	Fall 2026	bookstore	link
University of Waterloo	HLTH 333 †		other health life science		Epidemiology For Canadian Students: Principles, Methods, and Critical Appraisal, Patten (surname as listed), 3rd (Brush Education, 2021) [required]	Fall 2026	bookstore	link
McMaster University	BIOCHEM 3G03 †	Proteins and Nucleic Acids	biochemistry		Essential Biochemistry, Pratt, C. W., & Cornely, K., 5th (Wiley, 2021) [required]	Winter 2026	course_outline	link

University	Course	Title	Subject	In program	Textbook (as stated)	Source date	Source	Link
University of Lethbridge	BIOL 3850 †		cell biology		Essential Plant Pathology (W/Dvd), 2 (Amphy) [required]	Fall 2026	bookstore	link
York University	SC/CHEM 3090 †	Introduction to Polymer Chemistry	chemistry		Essentials of Polymer Science and Engineering, Painter; Coleman (DEStech Publications, 2009) [recommended]	Winter 2024	course_outline	link
University of British Columbia	BIOL 336 †	Fundamentals Of Evolutionary Biology	cell biology		Etect 180 Day: Evolution, Futuyma / Cei / 264 261, 5 (Oxford / Cei) [recommended] [ebook]	listing 2026	bookstore	link
University of Calgary	KNES 373 †	Exercise Physiology	physiology		Exercise Physiology: Nutrition, Energy, And Human Performanc, Mcardle, 9 (Wolters Kluwer) [recommended]	Fall 2026	bookstore	link
University of Northern British Columbia	BCMB 340 †	Physical Biochemistry	biochemistry	elective	Four Laws That Drive The Universe [required]	Winter 2026	bookstore	link
University of Waterloo	BIOL 308 †		molecular biology		Fundamental Molecular Biology, Allison (surname as listed), 3rd (Blackwell Science, Inc., 2021) [required]	Fall 2026	bookstore	link
Dalhousie University	BIOC 3300 †	Cellular and Integrated Metabolism	biochemistry		Fundamentals of Biochemistry, Destin Heilman; Stephen Woski, 6th (Wiley) [recommended]	Winter 2026	course_outline	link
McGill University	BIOC 311 †	Metabolic Biochemistry	biochemistry		FUNDAMENTALS OF BIOCHEMISTRY (150 day subscription EPUB), Heilman [recommended] [ebook]	Fall 2026	bookstore	link
McGill University	BIOC 311 †	Metabolic Biochemistry	biochemistry		FUNDAMENTALS OF BIOCHEMISTRY - LOOSELEAF, Heilman [recommended]	Fall 2026	bookstore	link
University of Alberta	BIOCH 310 †	Bioenergetics Metabolism	biochemistry		Fundamentals Of Biochemistry Looseleaf 6Th Edition, Voet, 6TH [recommended]	Winter 2026	bookstore	link
University of Alberta	BIOCH 320 †	Structure And Catalysis	biochemistry		Fundamentals Of Biochemistry Looseleaf 6Th Edition, Voet, 6TH [recommended]	Winter 2026	bookstore	link
University of Alberta	BIOCH 330 †	Nucleic Acid And Molecula	biochemistry		Fundamentals Of Biochemistry Looseleaf 6Th Edition, Voet, 6TH [recommended]	Winter 2026	bookstore	link
Carleton University	BIOC 3101 / CHEM 4401 †	Unlocking Metabolism: Pathways, Enzymes, and Control / Physical Aspects of Biochemistry (offered together, Fall 2026)	biochemistry	required	Fundamentals of Biochemistry: Life At The Molecular Level, Donald Voet; Judith G. Voet; Charlotte W. Pratt, 5th (John Wiley & Sons, 2016) [recommended]	2026	course_outline	link
University of Lethbridge	NEUR 3610 †		physiology		FUNDAMENTALS OF HUMAN NEUROPSYCHOLOGY (binder ready), 8 (Mac Higher) [required]	Fall 2026	bookstore	link
University of Alberta	GENET 375 †	Molecular Genetics Techni	genetics genomics		Genet 375 Lab Manual (19039) *May Be Printed To Order*, Berry, 19039 - WINTER 26 [required] [lab manual]	Winter 2026	bookstore	link
University of Calgary	MDSC 341 †	Principles Of Human Genetics	genetics genomics		Genetics: From Genes To Genomes Ise 8e, Goldberg, 8 (Mcgraw) [required]	Fall 2026	bookstore	link
University of Lethbridge	HLSC 3002 †		other health life science		Health Promotion In Canada, 5 [required]	Fall 2026	bookstore	link
University of Lethbridge	CHEM 3830 †		chemistry		Inorganic Chemistry, 8 [required]	Fall 2026	bookstore	link
University of Northern British Columbia	CHEM 320 †	Inorganic Chemistry II	chemistry		Inorganic Chemistry (Etext1 Year) [required] [ebook]	Fall 2026	bookstore	link
University of Northern British Columbia	CHEM 310 †	Analytical Chemistry II	chemistry		Intro To Spectroscopy (Etext 1 Year) [required] [ebook]	Fall 2026	bookstore	link
University of Northern British Columbia	BIOL 321 †	Animal Physiology	physiology		Introduction To Animal Physiology [required]	Fall 2026	bookstore	link
University of Victoria	CHEM 337 †		biochemistry		Introduction To Enzyme And Coenzyme Chemistry, Bugg, T. D. H. [optional]	listing 2026	bookstore	link
University of Calgary	BIOL 311 †	Principles Of Genetics	genetics genomics		Introduction To Genetic Analysis 12e Li W/ Digi Update, Griffiths, 12 (Mps) [recommended]	Fall 2026	bookstore	link
Simon Fraser University	MBB 328 †	Introduction to Microbial Pathogenesis	microbiology immunology		Introduction to Microbial Pathogenesis for Simon Fraser University, A.B. Wilson [required] [ebook]	2026	course_outline	link
Simon Fraser University	HSCI 338 †	Virology	microbiology immunology		Introduction to Modern Virology, J. Dimmock, A.J. Easton, K.N. Leppard, 7th (Wiley-Blackwell Publishing, 2016) [required]	2026	course_outline	link
Simon Fraser University	MBB 324 †	Protein Biochemistry	biochemistry		Introduction to Proteins: Structure, Function, and Motion, Kessel, Amit; Ben-Tal, Nir, 2nd (CRC Press LLC, 2018) [required]	2025	course_outline	link
Simon Fraser University	CHEM 380 †	Instrumental Methods of Organic Structure Determination	chemistry		Introduction to Spectroscopy, Donald L. Pavia, Gary M. Lampman, George S. Kriz & James A. Vyvyan, 5th (Cengage Learning, 2015) [required]	2026	course_outline	link
University of Victoria	MICR 303 †		microbiology immunology		Janeway's Immunobiology, Kenneth Murphy, Casey Weaver, Leslie J Berg [optional]	listing 2026	bookstore	link

University	Course	Title	Subject	In program	Textbook (as stated)	Source date	Source	Link
University of Victoria	MICR 303 †		microbiology immunology		Janeway's Immunobiology, Kenneth M Murphy, Casey Weaver, Leslie J Berg [optional] [ebook]	listing 2026	bookstore	link
Queen's University	MICR 360 / BMED 877 †	Immunology	microbiology immunology		Janeway's Immunobiology, Kenneth Murphy (Editor), 9th (Garland Science, Taylor & Francis Group, 2017) [recommended]	read 2026	department_page	link
University of Calgary	MDSC 321 †	Introduction To Immunology	microbiology immunology		Janeway's Immunobiology W/ Online Resources 10e, Murphy, 10 (Ww Norton) [required]	Fall 2026	bookstore	link
University of British Columbia	PATH 313 †	Normal Histology ? Cells And Tissues	other health life science		Junqueira's Basic Histology: Text And Atlas., Mescher, 17 (Mcgraw Hill / Medical) [required]	listing 2026	bookstore	link
University of British Columbia	PCTH 301 †	Introduction To Pharmacology	pharmacology		Katzung's Basic And Clinical Pharmacology 16/E, Vanderah Todd, 16 (Mcgraw Hill / Medical) [required]	listing 2026	bookstore	link
University of Guelph	BIOC*3570 †	Analytical Biochemistry	biochemistry	required	Lehninger (any reasonably recent edition), Lehninger et al. [recommended]	Fall 2023	course_outline	link
Simon Fraser University	MBB 321 †	Intermediary Metabolism	biochemistry	required	Lehninger Biochemistry: Core Concepts and Applications, Cox, Hoskins, Viel & Simcox [required] [ebook]	2026	course_outline	link
University of Guelph	BIOC*3560 †	Structure and Function in Biochemistry	biochemistry	required	Lehninger Principles of Biochemistry, Nelson and Cox, 7th or 8th (Freeman Publishers) [recommended]	Winter 2024	course_outline	link
York University	SC/CHEM 3051 (BIOL/BCHM 3051) †	Macromolecules of Biochemical Interest	biochemistry		Lehninger Principles of Biochemistry, Nelson & Cox, 7th [recommended] [ebook]	Fall 2022	course_outline	link
University of Northern British Columbia	BCMB 306 †	Intermediary Metabolism	biochemistry	elective	Lehninger Principles Of Biochemistry (E-Text 180 Days) [required] [ebook]	Fall 2026	bookstore	link
McMaster University	BIOCHEM 3D03 †	Metabolism and Regulation	biochemistry		Lehninger Principles of Biochemistry (with Achieve electronic learning platform) [required] [ebook]	2026	course_outline	link
University of British Columbia	BIOC 302 †	General Biochemistry	biochemistry		Lehninger Principles Of Biochemistry LJ + 4 Term Achieve, Nelson, 8 (Macmillan) [required]	listing 2026	bookstore	link
Dalhousie University	BIOC 3700 †	Biomolecular Chemistry	biochemistry		Lehninger: Principles of Biochemistry, Nelson, D.L.; Cox, M.M., 5th (W.H. Freeman and Co., 2008) [optional]	Fall 2025	course_outline	link
University of Guelph	MBG*3040 †	Molecular Biology of the Gene	molecular biology	elective	Lewin's Genes XI, Krebs, Goldstein and Kilpatrick, XI (Jones & Bartlett Learning, 2014) [recommended]	Fall 2023	course_outline	link
University of Alberta	PHARM 346 †	Pharmacotherapy 5	pharmacology		Mandell, Douglas, And Bennett'S Principles And Practice Of Infectious Diseases 2 Volume Set 10Th Edition **Available By Special Order Only**, Blaser, 10TH [recommended]	Winter 2026	bookstore	link
University of Alberta	BIOL 361 †	Marine Science	cell biology		Marine Biology 6Th Edition **Out Of Print - Available Digitally Only**, Levinton, 6TH [optional] [ebook]	Winter 2026	bookstore	link
University of Guelph	MBG*3350 †	Laboratory Methods in Molecular Biology	molecular biology	required	MBG*3350 Laboratory Manual [required] [lab manual]	Summer 2023	course_outline	link
University of Alberta	MICRB 320 †	Microbial Ecology	microbiology immunology		Microbial Ecology **Available By Special Order Only**, Barton, 1ST [recommended]	Winter 2026	bookstore	link
McGill University	MIMM 323 †	Microbiology (title not read)	microbiology immunology		MICROBIOLOGY (TEXT + EBOOK + SMARTWORK + ANIMATIONS + EAPPENDICES), Slonczewski [required]	Fall 2026	bookstore	link
University of Guelph	MBG*3040 †	Molecular Biology of the Gene	molecular biology	elective	Molecular Biology, R.F. Weaver, 5th (McGraw-Hill Higher Education, 2012) [recommended]	Fall 2023	course_outline	link
York University	SC/BIOL 3130 †	Molecular Biology II: Regulation of Gene Expression	molecular biology		Molecular Biology, Robert F. Weaver, 5th (McGraw Hill, 2012) [optional] [older source; course since replaced or text no longer used]	Winter 2026	course_outline	link
Simon Fraser University	MBB 322 †	Molecular Physiology	physiology	required	Molecular Biology of the Cell, Alberts et al., 7th (Garland Publishing, 2021) [required]	2026	course_outline	link
University of Victoria	BIOL 360 †		cell biology		Molecular Biology of the Cell, Bruce Alberts, Rebecca Heald, Alexander Johnson [optional]	listing 2026	bookstore	link
University of Guelph	MBG*3040 †	Molecular Biology of the Gene	molecular biology	elective	Molecular Biology of the Gene, J.D. Watson, T.A. Baker, S.P. Bell, A. Gann, M. Levine, R. Losick, 7th (CSH Press, 2014) [recommended]	Fall 2023	course_outline	link
York University	SC/BIOL 3110 †	Molecular Biology I: Nucleic Acid Metabolism	molecular biology		Molecular Biology of the Gene, Watson et al., 7th [recommended]	Summer 2026	course_outline	link
Simon Fraser University	MBB 331 †	Molecular Biology	molecular biology	required	Molecular Biology: Principles and Practice, Michael M. Cox, Jennifer A. Doudna, Michael O'Donnell, 2nd (W.H. Freeman & Company, 2015) [required]	2026	course_outline	link
Queen's University	MICR 320 †	Microbes in Health and Disease	microbiology immunology		Molecular paradigms of infectious disease : a bacterial perspective, Nickerson and Schurr [optional] [ebook]	read 2026	department_page	link

University	Course	Title	Subject	In program	Textbook (as stated)	Source date	Source	Link

16. Legal review: scanning textbooks and course curricula

The lawyer agent was asked two questions: whether the conscience agent may be used to scan textbooks, and whether it is legal to scan course curricula at Western and at other public universities. Its memo ([outputs/lawyer/textbooks_curricula_memo_1.md](#)) reads the Copyright Act, the federal consultation on copyright and generative AI, Western's copyright and AI guidance, Western's intellectual-property policy and faculty collective agreement, the CRKN model licence, the Creative Commons licence text, Ontario's freedom-of-information and privacy act, Quebec's public-sector access act, and TCPS 2 chapters 2 and 3. It could not read the Supreme Court decisions (the court's site needs JavaScript), the terms of commercial e-textbook platforms, or the learning-management-system terms, and says so. It is not legal advice; the binding calls go to the offices it names.

Verdict. On textbooks: *Conflict* as proposed. Scanning or extracting whole commercial textbooks so that an AI agent can read them needs permission or a licence that allows it; open textbooks and a person reading a lawful copy and quoting short passages are clear. On curricula: *Clear, with conditions*, for publicly posted descriptions and outlines used in internal research; an instructor's consent before their course is named in a published critique; no use of learning-management-system content or administrative access.

Ten points in plain language, from the memo's summary.

1. Copyright protects textbooks whether or not the author or publisher is publicly funded. Canada has no text-and-data-mining exception; the phrase does not appear in the Copyright Act, and the federal consultation on generative AI ended without a decision.
2. Reading a lawful copy, taking notes, and quoting short passages in a published critique is lawful today without permission (fair dealing for research, s. 29, and for criticism or review, s. 29.1, which requires naming the source and the author).
3. Bulk-scanning a whole commercial textbook into a corpus is not safe without permission. Western's own guidance lists copying an entire textbook as outside fair dealing. Under the faculty collective agreement Western defends members who follow its copyright advice, and that protection is lost if they do not.
4. Never strip digital-rights management from an e-book (s. 41.1). No statutory exception fits this project.
5. The conscience agent is not a local model. It runs in Claude Code, and every file it reads is sent to Anthropic's servers for processing. In the memo's words, that is the same as uploading to a third-party service. Western's AI guidance says not to prompt AI tools with licensed textbooks unless the licence expressly allows it, and this applies even to lawfully owned copies.
6. Start with open textbooks. Creative Commons texts may be copied whole and read by the agent; every CC 4.0 licence permits verbatim reproduction.
7. At Western, course outlines belong to the instructor, not to the university (the faculty collective agreement lists syllabi as the member's works); other universities' policies and the part-time faculty agreement were not read. Reading and coding publicly posted outlines for research is, in the memo's reading, fair dealing (marked inferred).
8. Privacy law is not the binding constraint on curricula. An instructor's name, title and work contact details are not personal information under Ontario's act, and teaching materials are excluded from it entirely.
9. Research ethics: TCPS 2 Article 2.2 exempts research that relies only on publicly available outlines from ethics-board review. Contacting instructors, surveying them, or using learning-management-system material puts the work back under review. The memo recommends a written exemption determination from Western's board anyway.
10. Naming a colleague's course in a published critique is protected academic expression under Western's own instruments, but it is not risk-free. Ask the instructor first, give them a right of reply, and critique the curriculum, not the person.

"These are public universities, so is it legal?" Public funding does not place a work in the public domain. In the memo's reading (marked inferred), Crown copyright covers government works, not university ones, and at Western an instructor's outline belongs to the instructor. Being public changes the privacy and ethics questions (instructors' names and work contacts are not protected personal information under Ontario's act; research on publicly posted material is exempt from ethics-board review under TCPS 2 Article 2.2, though the memo still asks for a written exemption letter), not the copyright one. The memo also answers a question the conscience later raised: the 31 Western outlines that agents read with instructor names intact are public teaching materials whose names and work details are not personal information under the Ontario act, so privacy law is not engaged; the memo did not address AI processing of outlines specifically, and the consent request should say an AI tool processed them.

What may be done now, what needs permission, and what must not be done (the memo's table, reproduced as written; the conscience's correction to its "presence or absence of Indigenous content" wording is below and in section 18). The memo's protocol adds three items not in the table: anonymise courses by default; a sole-section course is identifiable by its code; request a written Article 2.2 exemption letter.

	Textbooks (Q1)	Curricula (Q2)
May do now	Buy or borrow print copies and read them; human notes. Read tables of contents, indexes and publisher sample chapters (as published). Quote short passages with source and author named (s. 29.1). Load open (CC) textbooks whole into the agent. Use publisher-provided free review/desk copies for human reading.	Read and code publicly posted calendar descriptions and outlines; keep copies for the research record. Record facts (topics, texts, assessment, presence or absence of Indigenous content); facts are not copyrightable. Report aggregate findings by university or course level. Quote short passages with attribution.
Needs permission / written advice	Scanning or OCR of a whole commercial text, even an owned copy (publisher permission, or written Copyright Office advice). Any machine processing of a library e-book (check the platform licence; TDM often needs a separate agreement). Sending any commercial textbook text to Claude or another hosted model (licence plus Western AI/IT approval).	Naming a specific instructor's course in a published critique (instructor consent strongly advised; route to OGC). Using outlines obtained from colleagues (each instructor's own consent). Any interview, survey or correspondence with instructors (REB). Other universities' LMS-only material (owner consent plus REB).
Do not do	Strip DRM or screen-scrape a protected e-book reader (s. 41.1). Use pirated PDFs. Run automated bulk downloads from library platforms (licence breach that can cut off access for all of campus). Republish scanned pages or long extracts.	Use administrative or TA access to OWL/Brightspace to collect colleagues' outlines. Collect any student information. Republish whole outlines publicly. Scrape against a site's blocks or terms, or bypass logins. Publish evaluative statements about named instructors without a reply opportunity.

One correction from the conscience's review of the memo. The memo's index-search step reads "search for terms such as Indigenous, traditional knowledge, colonial". A search for the one word "Indigenous" misses a book that discusses a specific people under its own name (Inuit, Métis, Haudenosaunee, Mi'kmaw) and

counts a passing use of the word as presence. The search list should include "Indigenous", "Aboriginal", "Native", "First Nations", "Inuit", "Métis" and the names of the Nations in each university's own land acknowledgement, and each hit should be recorded in the book's own words with its page number. The memo is the lawyer's document and was not edited; the wording is applied in the protocol in section 18.

The practical route the memo proposes for textbooks. Open textbooks first. For commercial books: tables of contents, indexes and publisher sample chapters as published; then a person reading print or publisher review copies and taking notes; the agent works from the reviewer's notes, not from the book. Ask publishers for permission with the memo's template (its section 1.8). Ask Western's Copyright Office, in writing, whether a given use is permitted, and Western Libraries whether a given e-book licence allows text mining. Ask Western Technology Services whether any enterprise agreement covers sending licensed content to Claude. The memo's section 5 routes: written scanning and AI advice to Western Copyright Services; per-title text-mining rights to Western Libraries; publisher licences, digital-lock questions and pre-publication review to the Office of the General Counsel; an Article 2.2 exemption letter, or a full review if instructors are contacted, to Western's research ethics board.

For the cross-university course evaluation. Publicly posted descriptions and outlines may be read and coded now for internal research. Before any published critique names a course: the instructor's consent and a right of reply; aggregate reporting by university or course level; no learning-management-system material and no administrative access; no student information; and, for Quebec universities, the memo notes that Quebec's public-sector access act binds the Quebec institution, not an Ontario researcher reading its website, and bites only on requests for non-public records.

17. Western's biochemistry courses: decolonization evaluation and suggestions

Scope and disclosure. A bookworm collected every course of Western's Department of Biochemistry from the 2026 academic calendar and the department's site: 22 undergraduate BIOCHEM courses plus MEDSCI 3391A (required in two biochemistry modules), and 8 graduate courses. Fourteen have a full published outline; seventeen have a calendar description only (none was behind a login, but the department's decolonization resource hub was). The conscience agent read all 31 locally, together with the department's EDID committee page and nine newsletters, and evaluated them against its coding scheme (section 2) and the EDID resources. The PI is a member of this department and teaches in BIOCHEM 4450A and MEDSCI 3391A. Those courses were reviewed by the same protocol as all others. No critical finding concerns them, but positive observations do (MEDSCI 3391A's acknowledgement is the only one that asks students to reflect on their own position, and both courses carry suggestion rows), and if either is co-taught the PI's consent does not cover the co-instructors. The EDID resource pool used to judge the courses was itself partly assembled for an earlier EDID review of BIOCHEM 4450A. Under the conflict rule this section proposes for the cross-university phase, the PI's two courses are excluded from any comparison.

Verdict and summary (the conscience's words, lightly shortened). *Flagged:* two text fixes the department can make on its own. The larger picture is not a flag. The department has a documented, phased plan to decolonize its teaching, the only one found in the national survey, run by its EDID committee since 2023 (grounding, interrogation, new learning, commitment, rebuilding), with workshops, a survey, learning circles and public minutes. It printed its own definition of decolonization, and twelve of fourteen published outlines carry a land acknowledgement. The course documents themselves do not yet show that work: across 14 full outlines and 17 descriptions, no learning outcome, topic or required reading names Indigenous knowledge, the colonial history of the biosciences, or the global origins of biochemistry. The department says as much: it is now in the rebuilding phase, where proposed changes are to be turned into course changes.

The two findings.

- **F1. The department's own page uses a land acknowledgement that drops one Nation.** The EDID page and two of the fourteen published outlines name the Anishinaabek, Haudenosaunee and Lūnaapéewak; Western's official acknowledgement names four Nations, including the Chonnonton. The fix is the department's own four-Nation wording, already printed in another of its outlines. The committee can fix the page and one outline alone; the other is cross-listed and coordinated from Microbiology and Immunology. The courses are identified in Appendix G.
- **F2. The definition of decolonization says "Indigenous people" where the same page says "Indigenous Peoples (First Nations, Métis, and Inuit)".** Western's inclusive-language guide treats the singular as homogenizing, and that usage binds this department. The conscience proposes the minimal fix (the plural, with a blank for the definition's source, which the page does not give) and leaves a fuller rewording to the committee, ideally after the Office of Indigenous Initiatives has seen it.

What the department already does well. A plan with dates, phases and public minutes, begun from Western's own Indigenous Teaching and Learning modules; its own printed definition; acknowledgements naming the treaties and the Dish with One Spoon Wampum in 12 of 14 outlines, one adding a commitment to "revealing and correcting miseducation"; contact with Western's Office of Indigenous Initiatives (a talk in March 2024) and Western Research's Indigenous Research Specialist (September 2026); the rewritten biography of Maud Menten and the continuing Menten Memorial Lecture; and an accessibility statement in every full outline although Western's policy does not require one. Under the conscience's stopping rule these make several further observations refinements rather than findings: the outlines' statement that the department is "committed to promoting decolonization (D) within our teaching" shows nowhere in the outlines yet, which is the plan's unfinished phase, not a defect; the required text of one fourth-year course carries eponyms the resources document, but how the course treats them is not published; and the "his/her" in two outlines is university boilerplate.

17.1 What the course documents show, at department level

The conscience's course-by-course table is an internal working table. It gives one row per course code in a single named department, so each row can be matched to an instructor through the public calendar, and the legal memo (section 16) requires an instructor's written consent before their course is named in a published critique. Following the conscience's advice, this section reports at department level; the course table is kept in Appendix G, marked not for circulation beyond the PI until each instructor has seen their row and consented. The PI may consent for the two courses he teaches. The consent request should say plainly that an AI tool has already processed the outline.

Codes used in the tally and the appendix: GO global origins of science; UC unrecognized contributors; IK Indigenous knowledge linked with Western science; CH colonial harms in bioscience; NL naming and language; RE research ethics and data governance (RE-gen where there is no Indigenous element); PC pedagogy change; OT other. Context markers, recorded but not counted as effort: LA4 or LA3 a land acknowledgement naming four or three Nations; EDID the department's EDID statement; DIV its diversity statement; ACC an accessibility statement; TRD the National Day for Truth and Reconciliation listed. (S) marks a suspected item, never a finding.

Tally, on the pages read (the conscience's, with course codes removed; the coded table is in Appendix G.1). Of the decolonial approach types, none is observed in any of the 31 course documents: no global-origins, unrecognized-contributor, Indigenous-knowledge, colonial-harms or naming content, and no research-ethics content with an Indigenous element. The closest items are a community-engaged cancer course's statement on Western-centric knowledge, the positionality sentence in the required third-year data course's acknowledgement, and the second-year core course's reflections on who does science. Acknowledgements: four Nations named in 10 outlines, three in 2, none in 2. The conscience searched every file for military and colonial metaphors (war, battle, fight, invasion, master/slave, whitelist, conquer, pioneer, discover) and, apart from ordinary technical uses such as "drug targets" and "drug discovery", found none.

17.2 The department's phased plan, as it describes it

Phase	Dates (dept)	What the pages say happened
Committee self-education	Oct 2023 to June 2024	"educate our EDI committee on decolonization and the history of Indigenous peoples of Turtle Island"; CTL modules discussed "using an Indigenous sharing circle"
Presenting the plan	June and Sept 2024	Presented at the Undergraduate Program retreat and a department meeting
Grounding	completed Jan 2025	"pre-work, self-reflection questions in an anonymous survey, and a group discussion"; "A resource hub on decolonization was set up"
Interrogation	June to Dec 2025, 5 workshops	e.g. "Interrogating our Origins: Colonial Legacies"; "Interrogating our Origins: History of and Knowledge in Biochemistry"; "Interrogating our Present: Positionality"
New learning	Feb to Mar 2026, 2 workshops	"Beyond Euro-Western Perspectives" parts 1 and 2 (the second on "Decolonial Pedagogy")
Commitment	Apr to May 2026, 3 workshops	"Decolonial Curricula"; a final workshop "for naming the changes we would like to see", plus an anonymous survey and learning circles
Rebuilding	Summer 2026, ongoing	"A working group has been formed"; "Decolonization Retreat - workshop #1" with CTL (Sept 2026); a planned "visiting an Indigenous Elder" (June 2026 minutes)

What is not yet documented (from the pages read): no course-level change produced by the plan; no published criteria for when a course counts as changed, and no deliverable or date for the rebuilding phase; no named decision-maker for course changes (the Undergraduate Program Committee asked for suggestions "through an EDI lens" in December 2024, but whether the rebuilding working group reports to it is not stated); no published results from the commitment-phase survey and learning circles; and Indigenous involvement at two points only (the 2024 talk and the 2026 meeting), with an Elder visit planned and no follow-up recorded. None of the 17 listed workshops names the Office of Indigenous Initiatives or an Indigenous community organization as presenter.

What the resources suggest for the next phases. Route the proposed course changes to the Office of Indigenous Initiatives before they are fixed, not after; the current order (internal learning, naming changes, rebuilding, then an Elder visit) puts consultation last. Use the bioscience-specific curriculum guides the resources hold (the two articles in *The Biochemist* 46(2); the ACS account of an undergraduate chemistry curriculum; Shahjahan and colleagues' 2022 map; the Canadian "Mapping approaches" paper). Tie the plan to the TRC's education Calls 62 to 65, cited from the Commission's own text. Add decolonization to the committee's mandate so the commitment survives membership turnover (new members are recorded in 2024, 2025 and 2026). Two questions are the Office of Indigenous Initiatives' to answer, not ours: whether "Turtle Island (aka Canada)" is the wording the four Nations would use, and whether a sharing-circle format should be used when the pages do not say who facilitated it.

17.3 Suggestions for the future (provisional)

These are proposals, not prescriptions, and they name courses only to say where a suggestion would fit; they are not verdicts on any course or instructor. Course content is decided by instructors and coordinators; learning outcomes go through the program committees; cross-listed courses need every partner department. Anything that teaches what a Nation holds, knows or consents to needs that Nation's involvement, routed first through the Office of Indigenous Initiatives; which communities, which knowledge and on what terms is not ours to fill. "Alone" means the department can act without anyone else's agreement; "consult" names who must be asked first.

The course-by-course proposals, organised by year of study, are in Appendix G.2 (internal, for the same reason as the course table). In outline, by approach type: global origins of science (one lecture segment on fermentation and food biochemistry as practised across many cultures); unrecognized contributors (name Maud Menten where enzyme kinetics is taught, and publish the list of scientists used in the second-year reflections); colonial harms in bioscience (one case in the human and clinical courses on whose bodies set "normal" ranges; ancestry composition of the datasets used in the data-science courses); naming and language (a session on eponyms in the cancer course; militarized metaphors and master/slave terms in the writing and coding courses); research ethics and data governance (OCAP® and TCPS 2 Chapter 9 beside "open science" in the data courses and the research-ethics sessions); Indigenous knowledge linked, not merged (a reading on cognitive justice and Two-Eyed Seeing, with its originators named, in the philosophy course; anything that teaches a Nation's knowledge only with that Nation, through the Office of Indigenous Initiatives); pedagogy (keep the learning circles; use Western's own teaching-centre modules). Two suggestions in the conscience's table were found by the adversary's audit to overstate their sources and are marked as such in Appendix G.3: the Burkitt example rests on context the resources record without a published critique, and the natural-products misappropriation suggestion has no bioprospecting source in the resources.

Across all years. The acknowledgement already names the Dish with One Spoon; whether a Haudenosaunee account of that treaty as a research method belongs in a biochemistry course is for the Office of Indigenous Initiatives and the Nations to advise on. For pedagogy the resources point to Western's own teaching-centre modules and guides; the British Columbian material (the First Peoples Principles of Learning, Pass The Feather) is to learn from, not to present as local practice. A program-level learning outcome would let the commitment survive instructor turnover; the conscience proposes, for the Undergraduate Program Committee to decide: "Describe how biochemical knowledge has been produced across cultures and eras, and how the choice of samples, data and names shapes what the field knows and who it credits."

What a cross-university phase would need. An instructor consent and anonymisation protocol (the legal part is in section 16): findings reported at course and department level, never by instructor; instructors see their course's row before release; "the outline is silent" is never printed as "the course is silent". The same coverage rule as here: "description only" stays a coverage note everywhere. No ranking: Western was read more deeply than any other unit, and its plan is not a yardstick for departments that published less. A conflict rule: any course the PI teaches is excluded from comparison. The phase-1 calendar scans (section 10) already show that, in the calendars we read, no biochemistry department course description mentions decolonization, while five department-owned courses at three universities carry Indigenous content; so the cross-university phase would start from outlines, which are mostly behind logins and so need the consent route.

One definitional difference to note: Part I codes BIOCHEM 4320F/G's ethics content as research ethics and data governance (it counts in Figure 3), whereas this section marks it "RE-gen", ethics with no Indigenous or decolonial element; Part I's code is the broader one.

18. Reviews of Part II

Conscience (review of the legal memo and the textbook plan). Verdict: *Flagged*, with two fixes, both applied. First, the memo's index-search step and its coding field treated "Indigenous" as one category; the corrected wording is in section 16 and the protocol below. Second, the conscience's own course-by-course table for Western identifies instructors through the public calendar, and the memo requires their consent before publication; the table is therefore held in Appendix G as internal, and section 17 reports at department level. On the PI's questions it adds, as observations from its own reasoning rather than from a source: the consent protocol needs five additions (write "the outline does not mention", never "the course does not teach"; positive findings need the same consent as critical ones, because in a small department they identify one person; consent requests should be sent by someone with no say over the instructor's job, and a refusal is never reported; never describe an instructor's identity; check every anonymised example against the public calendar). "Open textbooks first" is the right legal order but would bias the sample: across the inventory batches it read, no course assigns an open textbook, and the recurring texts are commercial, so texts should be chosen by how often the inventory names them and open texts reported as a separate group. An index-only result is "not found in the index", never "absent". Because files the conscience reads go to Anthropic's servers, it should be given open-licensed texts, openly posted publisher pages, the human reader's page-cited notes, and public outlines with instructor names removed; never scans of commercial books, library e-books, learning-management-system material, or anything a community holds or has not published, such as learning-circle notes or Elder teachings, which OCAP® places under First Nations' control. It notes that the 31 Western outlines were already read by agents with names intact, which is a question for the lawyer and should be disclosed in the consent request. Its presentation rules for the textbook tables are applied in section 15. Its provisional protocol for evaluating a textbook, once lawful access exists, is reproduced below.

Provisional textbook evaluation protocol (the conscience's design). Respect the lawyer's route conditions: lawful copies only; no scanning of commercial books until Western Copyright Services answers in writing; no circumvention of digital locks; no machine processing of library e-books without a licence check; short quotations with source and author named; open texts attributed as their licences require. Choose texts by how often the inventory names them, and evaluate by edition. Record one observation at a time: title, edition, ISBN, page, a verbatim quote of a sentence or two, the criterion, the evidence level (observed; none found in pages read; none found in index; not assessable), the pages actually read, and the reader. Two readers code the same three books independently first. Readers record what the text says, not views about its authors. The criteria, each tied to a resource in the EDID pool: who is credited in history boxes and chapter openers (identity only where the book states it); each eponym used and whether a descriptive term or contested credit is given; whether reference ranges, example cohorts and variant data say whose bodies they came from, and how race, ethnicity, sex and gender are labelled; whose diseases and bodies serve as cases, and whether colonial-era case series carry their context; whether biochemical practice before and outside Euro-Western laboratories appears, and whether any Indigenous knowledge is linked rather than merged, with its Nation and source named; whether data-sharing passages mention community data governance (OCAP®, TCPS 2 Chapter 9); language and metaphors ("war on", "battle", "master/slave", "Indigenous" as one people), with technical terms such as tumour "invasion" recorded separately; and images, recorded but not judged. A table of contents or index cannot show framing, tone, metaphors, images, whose population sits behind a table, or Indigenous content filed under a Nation's own name. Four things need consultation rather than evaluation and are left blank for the people named: whether a text's account of a Nation's knowledge is accurate or was the Nation's to share; whether a case built on First Nations, Inuit or Métis data respected that community's governance; how the people behind a widely used cell line want that history told; and images of Indigenous people or objects.

Adversary (audit of Part II). Three passes. The first found that the textbook grouping split bookstore format variants (so the most-named text was undercounted), that lab manuals, a model kit and career books were counted as texts, that inferred years and source dates were not marked although the text said they were, that section 17 named courses while claiming department-level reporting, and that section 16 stated as settled three things the memo marked as inferred. The second pass, after the merge script and text were revised, found the counts reproducing and five small residuals: an inferred-title row and a replaced-course row still counted, one alias over-merging a different Lehninger title and one missing McGill's, duplicate listings inside the year and subject counts, five course codes left in the tally paragraph, and a wrong appendix cross-reference. All were fixed in the merge script and the text, and the figures in section 15 were then regenerated from the data rather than edited by hand. Its verdict after the second pass: *needs revision (minor; text and alias table only)*; nothing else would block internal circulation. Its gate: the textbooks are named only as an inventory, nothing is scanned, licensed or disclosed, no governed data moves; counsel's phase-2 verdict is quoted ("Q1 (textbooks): Conflict as proposed; Q2 (curricula): Clear, with conditions, for publicly posted descriptions and outlines used in internal research"); nothing in Part II acts against Q1, and Q2's consent condition is met while section 17 reports at department level and Appendix G stays internal. Both audits are in `outputs/adversary/report_audit_2.md`.

19. Glossary

Terms are defined only from a named source; where the sources we hold are silent, the entry says so. Scope tags: [binds CA] a Canadian rule; [binds QC] or [binds UWO] a rule only there; [from X] developed in X and offered as a source, not as the reader's rule; [voice] a community's or person's own account. One tension is left as the sources state it. TRC Call to Action 62(ii) asks governments to "provide the necessary funding to post-secondary institutions to educate teachers on how to integrate Indigenous knowledge and teaching methods into classrooms"; it concerns teacher education, not university science teaching. Two-Eyed Seeing (Etuaptmumk) is the guiding principle brought forward by Mi'kmaw Elder Albert Marshall, together with Elder Murdena Marshall, both of Eskasoni First Nation in Unama'ki: "learning to see from one eye with the strengths of Indigenous ways of knowing and from the other eye with the strengths of Western ways of knowing and to using both of these eyes together". A scoping review (Roher and colleagues, 2021) notes that words such as "blending, integrating, and merging" sit uneasily with "the original authors' contention that Two-Eyed Seeing should not prompt a merging of knowledges". The two are quoted, not harmonized. In our own voice this report writes "Indigenous Peoples", which is Western University's usage (Inclusive Language Guide, July 2025), not a rule that binds elsewhere; TCPS 2, UNDRIP and the federal government write "Indigenous peoples", and each source's form is kept inside quotations.

Allyship

"Allyship: an ongoing process of learning, unlearning, and action. It involves recognizing and challenging systems of power and privilege that marginalize Indigenous Peoples and other equity-deserving groups." — Western Research, with the Offices of Indigenous Initiatives (Western University), *Centering Indigenous Voices: Guide Towards Allyship in Indigenous Research (glossary)*, July 2025 [binds UWO] [source] (Read from the PDF (two-column glossary; the first sentence and the following sentence are joined from the column). Also Western's page: "Braiding Truth Into Action: A Guide Towards Indigenous Allyship at Western University is a transformative resource for non-Indigenous

faculty, staff, students and community members committed to building meaningful, respectful and reciprocal relationships with Indigenous Peoples." (<https://indigenous.uwo.ca/allyship/index.html>). Present as Western's framing.)

Autochtonisation

Definition pending a source. Searched the UdeM Premiers Peoples page and news item (words absent) and could not reach the OQLF Grand dictionnaire terminologique (search engine rate-limited; no entry URL known). No definition is written. Treat as a search term only.

Bioprospecting / misappropriation

"We introduce a new conceptual model called "Pollen Sovereignty", a sister to Indigenous food sovereignty, to begin critical discussions around the ethics of field research and the impacts of research on the environment, land management, and Indigenous communities." — Nakagawa, Nakagawa & Bobiwash, FACETS (2024), *Decolonizing Indigenous science: Bees and Indigenous sovereignty (abstract)* [from CA] [\[source\]](#) (Abstract via Crossref (publisher page 403). The word bioprospecting does not appear in the abstract; no definition. Better primary wording for misappropriation is in TCPS 2 ch. 9 (see section 2).)

Call 62(ii) (one side of the tension)

"Provide the necessary funding to post-secondary institutions to educate teachers on how to integrate Indigenous knowledge and teaching methods into classrooms." — Truth and Reconciliation Commission of Canada, *TRC Calls to Action (2015), Call 62(ii), printed p. 7 (PDF p. 11)* [binds CA] [\[voice\]](#) [\[source\]](#) (DISCREPANCY WITH THE DESIGN: design 6 renders this as funding to "integrate Indigenous knowledge and teaching methods into classrooms". The Call actually asks for funding to post-secondary institutions TO EDUCATE TEACHERS on how to integrate; the verb integrate is the Call's, but the object is teacher education. Quote the full sentence. Call 62 is addressed to education for reconciliation in K-12 and teacher education, not to university science curricula.)

Cognitive justice

"Cognitive justice recognises the right of different forms of knowledge to co-exist, but adds that this plurality needs to go beyond tolerance or liberalism to an active recognition of the need for diversity. It demands recognition of knowledges, not only as methods but as ways of life." — Shiv Visvanathan, *The search for cognitive justice, Seminar 597 (2009)* [context] [\[source\]](#) (Primary source for the term; the author says the concept was "serendipitously proposed by the author".)

Coloniality

"the long-standing patterns of power that emerged as a result of colonialism, but that define culture, labour, intersubjectivity relations, and knowledge production well beyond the strict limits of colonial administrations. Coloniality survives colonialism. (Nelson Maldonado-Torres 2007: 243)" — Action Solidarite Tiers Monde (ASTM), Luxembourg, quoting N. Maldonado-Torres, *Decolonized Glossary (hors-serie, 22 Nov 2022)* [context] [\[source\]](#) (Orientation only (design marks ASTM as [context]). The fetch stripped the headword labels; the quoted passage is the entry text as it follows its (stripped) headword, matched to the Maldonado-Torres attribution. Verify the headword on the page. The glossary calls itself "brief, general definitions ... not meant to be exhaustive or in-depth.")

Colonization (Racial Equity Tools)

"Colonization can be defined as some form of invasion, dispossession, and subjugation of a people." — Racial Equity Tools, *Racial Equity Tools Glossary, entry Colonization* [from US] [\[source\]](#) (US-produced nonprofit resource.)

Cultural safety (FNHA)

"Cultural Safety is an outcome based on respectful engagement that recognizes and strives to address power imbalances inherent in the health care system. It results in an environment free of racism and discrimination, where people feel safe when receiving health care." — First Nations Health Authority (BC), *Cultural Safety and Humility (Framework)* [\[voice\]](#) [from BC] [\[source\]](#) (OUTSIDE THE EDID RESOURCES. Health-care definition by a First Nations-led body; the survey uses it in an education context, which the source does not address. Companion: "Cultural Humility is a process of self-reflection to understand personal and systemic biases and to develop and maintain respectful processes and relationships based on mutual trust.")

Decolonization

"Decolonization would mark a fundamental change in the relationship between Indigenous and non-Indigenous people. It would bring an end to the settler effects on Indigenous Peoples with respect to their: governments; ideologies; religions; education systems; cultures" — Kory Wilson and Colleen Hodgson (MNBC), BCcampus, 2018 (CC BY-NC 4.0), *Pulling Together: Foundations Guide, Section 3: Decolonization* [from BC] [\[source\]](#) (Same chapter: "Decolonization is every Canadian's responsibility" and "A common misunderstanding is that decolonization is an attempt to re-establish the conditions of a pre-colonial North America ... That is not the goal." Written for BC public post-secondary staff. Fetched via Internet Archive copy (Wayback), because the live openextbc.ca returned HTTP 403 to automated fetch.)

Decolonization (academic review)

"We observed three major meanings of decolonization and four ways to actualize DCP that were associated with geographical, disciplinary, institutional, and/or stakeholder contexts. We argue that while there are similarities within the literature, ultimately the meanings, actualizations, and challenges of DCP are contextual, which has political and epistemological consequences." — Shahjahan, Estera, Surla & Edwards, Review of Educational Research 92(1):73-113 (2022), *"Decolonizing" Curriculum and Pedagogy: A Comparative Review Across Disciplines and Global Higher Education Contexts (abstract)* [academic] [\[source\]](#) (Abstract only, obtained from the Crossref record (publisher page returned 403). Full text is withheld locally, so the three meanings are NOT stated here; the abstract does not define them. The review's own conclusion is that meaning is contextual, which supports the design's choice to record the word each institution uses.)

Decolonization (Racial Equity Tools)

"Decolonization may be defined as the active resistance against colonial powers, and a shifting of power towards political, economic, educational, cultural, [and] psychic independence..." — Racial Equity Tools, *Racial Equity Tools Glossary, entry Decolonization* [from US] [\[source\]](#) (Extracted by the fetch tool's summarizer, so ellipsis and bracketed 'and' are as returned; re-check on the page before printing. The same entry also reads: "Decolonization demands an Indigenous framework and a centering of Indigenous land, Indigenous sovereignty, and Indigenous ways of thinking.")

Decolonization (talks)

"[not fetched]" — Kevin Lamoureux; Nikki Sanchez, *Lamoureux (2022), A Beginner's Guide to Decolonization, TEDxSurrey; Sanchez (2019), Decolonization Is for Everyone, TEDxSFU* [\[voice\]](#) [\[source\]](#) (Videos: no transcript fetched in this task, so nothing is quoted. Not verified. A teacher/bookworm media pass would be needed before any wording is attributed to the speakers.)

Decolonizing the curriculum (Edinburgh STEM guide)

"Decolonising the Curriculum aims to illuminate how historical and contemporary injustices have influenced core elements of modern thought, disciplinary identities, and persistent inequalities." — University of Edinburgh, College of Science and Engineering, Equality & Diversity HUB, *How to Decolonise the STEM Curriculum: A Practical Guide* [from UK] [\[source\]](#) (Also: "Decolonising curricula doesn't entail eliminating or disregarding well-established scientific knowledge or renowned scientific figures." The ACS J. Chem. Educ. account the design also names was not fetched.)

Decolonizing the curriculum (The Biochemist)

"Decolonization requires actively confronting the legacy of colonization, typically through scrutiny or rejection of western-centric ways of thinking and by re-imagining power dynamics between former oppressors and the oppressed." — Lovleen Tina Joshi, Catherine Mansfield, Isaiah J. Ting, Katharine Hubbard (Biochemical Society / Portland Press), *Why we need to decolonize the biosciences curriculum, The Biochemist* 46(2):26-32 (27 May 2024) [from UK] [source] (Retrieved via Internet Archive copy (live site 403). Same article, footnote 1: "We acknowledge that the term decolonisation can be controversial in its own right ... We write from the perspective of UK Higher Education, where decolonisation is a commonly used term, but recognise that this language is not universal." and "We recognise that our thinking is shaped from the perspective of the colonisers, not the colonised." Also: "We need to create more inclusive curricula that actively confront the legacies of colonialism, eugenics and exploitation in the name of biology. This is known as decolonization of the curriculum." Useful for Q9: the authors themselves flag the term as contested and note barriers, 'active hostility towards inclusivity-related work from some'. No Canadian or Indigenous voice among the authors.)

Décolonisation (UdeM usage)

"[no definition found]" — Université de Montréal, *Place aux Premiers Peuples 2024-2029 and the Conseil de gouvernance autochtone* page [binds QC] [source] (OUTSIDE THE EDID RESOURCES. Term is USED but not defined: "L'Université de Montréal s'engage résolument dans un processus de décolonisation et de réconciliation avec les Premiers Peuples" (news item, 26 Sept 2025) and the Conseil de gouvernance autochtone is mandated "de conseiller l'administration relativement aux stratégies de décolonisation et de réconciliation". A Comité de la décolonisation de la recherche report is listed and 'vise à nourrir la réflexion institutionnelle, sans constituer une position officielle' (verbatim) - not opened. [our translation] 'The University is firmly committed to a process of decolonization and reconciliation with First Peoples'.)

EDI (NFRF)

"Equity: 'the removal of systemic barriers (e.g., unconscious bias, discrimination, racism, sexism, ableism, homophobia, etc.), enabling all individuals to have equitable opportunity to access and benefit from the program'. Inclusion: 'the practice of ensuring that all individuals are valued and respected for their contributions and are supported equitably in a culturally safe environment'." — Social Sciences and Humanities Research Council (for the NFRF), *New Frontiers in Research Fund: Best Practices in Equity, Diversity and Inclusion in Research* [binds CA] [source] (CONFLICT NOTED, NOT RESOLVED: NSERC and NFRF word 'equity' and 'inclusion' differently (NSERC: access to resources for 'just outcomes'; NFRF: 'removal of systemic barriers'). The glossary should attribute each to its funder. NFRF also names 'culturally safe' and OCAP)

EDI (NSERC)

"Equity: 'The principle of considering people's unique experiences and differing situations, and ensuring they have access to the resources and opportunities that are necessary for them to attain just outcomes'. Diversity: 'The presence of a wide range of human qualities and attributes within a group, organization or society'. Inclusion: 'The practice of using proactive measures to create an environment where people feel welcomed, respected and valued, and to foster a sense of belonging and engagement.'"

— Natural Sciences and Engineering Research Council of Canada, *NSERC guide on integrating equity, diversity and inclusion considerations in research* [binds CA] [source] (Fetch-tool extraction; the same page also defines "Indigenous means 'native to the area' and applies to peoples who have occupied a territory since time immemorial. In Canada, Indigenous Peoples include First Nations, Inuit and Métis." and points to TCPS 2 (2022) Chapter 9.)

EDID

Definition pending a source. The acronym EDID does not appear in the Western Inclusive Language Guide 2025, the Western Research Allyship Guide, or the Indigenous Initiatives allyship page (text searched). Equity, diversity and inclusion and decolonization appear separately in the Western guide: "Explain how and why certain language related to equity, diversity, inclusion and decolonization has changed over time". Use the design's instruction: define EDID as this project's working term.

Epistemic (knowledge) justice

"This resource introduces the concept of epistemic justice, or knowledge justice, and explores how it applies to academic studies and future professional work." — Campbell, McKeown, Sansom, Holmes, Lengyll, Dilkes, Leyland & Glasgow-Osment (eds.), eCampusOntario, 2025 (CC BY-NC-SA 4.0), *Knowledge Justice in the Helping Professions: From Theory to Practice* [from CA-ON] [source] (Book description, not a definition; chapters not fetched. Also: Library Curriculum as Epistemic Justice: Decolonizing Library Instruction Programs (Western Libraries story, CAPAL journal) abstract: "Information literacy scholars and leaders are calling for the decolonization of library instruction, knowing that our work helps to maintain colonial systems." (https://cjal.ca/index.php/capal/article/view/40964). Neither gives a one-line definition.)

First Nations / Métis / Inuit (distinctions): federal

"The Canadian Constitution recognizes 3 groups of Indigenous peoples: First Nations, Inuit, Métis. These are 3 distinct peoples with unique histories, languages, cultural practices and spiritual beliefs." — Crown-Indigenous Relations and Northern Affairs Canada (Government of Canada), *Indigenous peoples and communities* [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Verbatim. Government framing; see the community-authored rows next.)

Indigenization

"[no definition found in the chapters read]" — Kory Wilson and Colleen Hodgson (MNBC), BCcampus, 2018, *Pulling Together: Foundations Guide, overview and landing page* [from BC] [source] (Series is framed as supporting "Indigenization, decolonization, and reconciliation" but the pages read do not define Indigenization; the guide's /indigenization/ chapter URL was not retrievable (Cloudflare block, not in the archive). Use is quotable: "The Foundations Guide is part of an open professional learning series developed for staff across post-secondary institutions in British Columbia to support Indigenization of institutions and professional practice." Fetched via Internet Archive copy (Wayback), because the live opentextbc.ca returned HTTP 403 to automated fetch.)

Indigenization (100 Ways)

"[not retrieved]" — Shauneen Pete, University of Regina; aboriginal policy studies 6(1), 2016, *100 Ways: Indigenizing & Decolonizing Academic Programs* [from CA-SK] [source] (Landing page confirmed (author, DOI, 28 Oct 2016); the PDF text could not be extracted, so no definition is quoted. The design attributed it to U Alberta; the record shows the author at University of Regina, published in aboriginal policy studies (hosted by U Alberta Libraries).)

Indigenization (usage in a national statement)

"Recognize the importance of indigenization of curricula through responsive academic programming, support programs, orientations, and pedagogies." — Universities Canada, *Universities Canada principles on Indigenous education* (29 June 2015) [binds CA] [source] (A usage, not a definition. Principle text as listed on the page.)

Indigenous data sovereignty

"Advancing Indigenous Data Sovereignty and Governance" — Global Indigenous Data Alliance (GIDA); FNIGC, *Global Indigenous Data Alliance (home page tagline); FNIGC OCAP page*: "OCAP® is a tool to support strong information governance on the path to First Nations data sovereignty." [voice] [source] (OUTSIDE THE EDID RESOURCES. No sentence defining the term was retrieved: GIDA's CARE Principles page lists translations and links, and its 'History of Indigenous Data Sovereignty' page was not read. The tri-agency NFRF text (above) names "Indigenous data sovereignty through 'OCAP (ownership, control, access and possession) principles for the collection, protection, use and sharing of First Nations' data" (fetch-tool paraphrase). Do not write a definition until the CARE paper (Data Science Journal) or GIDA's history page is read.)

Indigenous knowledge systems / ways of knowing

"Several characteristics are considered common across many Indigenous peoples, cultures, histories and contexts. Together, these emphasize an approach to knowledge that is metaphysical, holistic, oral/symbolic, relational, and intergenerational." — CRIAW-ICREF, drawing on Levac, McMurtry et al. (2018), *What are Indigenous and Western Ways of Knowing? (Fact Sheet 2)* [from CA] [source] (Read from the PDF. The fact sheet opens: "There is no single Indigenous or Western way of knowing." Not itself Indigenous-authored.)

Indigenous peoples (TCPS 2)

"In the Canadian context, the term 'Indigenous peoples' typically refers to persons of Indian, Inuit or Métis descent, regardless of where they reside and whether their names appear on an official register. Self-identification is a fundamental criterion for defining Indigenous peoples. The term 'Indigenous' does not reflect the distinctions among First Nations, Inuit, and Métis peoples, who have their own histories, cultures and languages, so an attempt has been made to limit use of the term in this Policy to instances where a global term is appropriate." — Canadian Institutes of Health Research, NSERC, SSHRC (Panel on Research Ethics), *TCPS 2 (2022), Chapter 9: Research Involving the First Nations, Inuit, and Métis Peoples of Canada, Glossary* [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Directly supports the report using the specific nation or 'First Nations, Inuit and Métis' where it can. Lowercase 'peoples' is the TCPS 2 style (see section 3).)

Indigenous science (Popp)

"Indigenous science incorporates traditional knowledge and Indigenous perspectives, while non-Indigenous scientific approaches are commonly recognized as Western science." — Jessica N. Popp (Anishinaabe scientist, per the resource list), *How Indigenous knowledge advances modern science and technology (The Conversation, 2 Jan 2018)* [from CA-ON] [voice] [source] (Author attribution is the EDID resource's; the fetched text does not show the byline. Note she writes "the value of integrating Indigenous science with Western science has been recognized": a third voice using 'integrating' in the sense Two-Eyed Seeing cautions against. Keep visible.)

Inuit (ITK)

"Inuit are an Indigenous people living primarily in Inuit Nunangat." — Inuit Tapiriit Kanatami (ITK), *About Canadian Inuit* [voice] [source] (OUTSIDE THE EDID RESOURCES. Also verbatim: "The term 'Inuit Nunangat' is a Canadian Inuit term that includes land, water, and ice." and "There are four Inuit regions in Canada, collectively known as Inuit Nunangat." ITK's National Inuit Strategy on Research page was found but is only a stub in my fetch; the Strategy text itself was not read. No Inuit-specific guidance on decolonization of science was retrieved.)

Land / territorial acknowledgement (CAUT)

"Acknowledging territory shows recognition of and respect for Indigenous Peoples. It is recognition of their presence both in the past and the present. Recognition and respect are essential elements of establishing healthy, reciprocal relations." — Canadian Association of University Teachers (CAUT), *Guide to Acknowledging First Peoples & Traditional Territory* [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Faculty-union guidance, not Indigenous-authored; it recommends acknowledgements developed by local campus Indigenous councils. Verbatim, relevant to design decision 3.4: "While acknowledging territory is very welcome, it is only a small part of cultivating strong relationships with the First Peoples of Canada." and "Territorial acknowledgements should not simply be a pro forma statement made before getting on with the 'real business' of the meeting" and "this is a guide, not a script." Also notes Métis acknowledgement 'needs to be developed'. Complemented by Western's Research Allyship Guide (inside the resources), which lists "scripted land acknowledgements that do not clearly link to one's positionality and action" under Performative Allyship (WHAT TO AVOID).)

Land acknowledgement (reconnaissance territoriale), UdeM, own text

"L'Université de Montréal reconnaît qu'elle est située en territoire autochtone non cédé par voie de traité, et souhaite saluer ceux et celles qui, depuis des temps immémoriaux, en ont été les gardiens traditionnels." — Université de Montréal, *Place aux Premiers Peuples : Réconciliation et décolonisation à l'UdeM, Reconnaissance territoriale* [binds QC] [source] ([our translation] The Université de Montréal acknowledges that it is located on Indigenous territory unceded by treaty, and wishes to salute those who, since time immemorial, have been its traditional keepers. An institution's own statement, quoted as usage; fetched 2026-10-05.)

Land acknowledgement (Western, own text)

"The Great Lakes region of Turtle Island is the ancestral lands of the Anishinabek, Haudenosaunee and Lunaapéewak Nations. Western University is located in Baketigweyaang (At the Side-Flow), or what is now known as London, Ontario, alongside Deshkan Ziibiing (Antler River)." — Western University, *Inclusive Language Guide 2025, Land Acknowledgement section* [binds UWO] [source] (An institution's own statement quoted as an example of the genre, Not a definition.)

Métis (Métis National Council)

"'Métis' means a person who self-identifies as Métis, is distinct from other Aboriginal peoples, is of historic Métis Nation Ancestry and who is accepted by the Métis Nation." — Métis National Council, *Citizenship (National Definition adopted by the MNC General Assembly in 2002)* [voice] [source] (OUTSIDE THE EDID RESOURCES. Note the MNC's own text uses 'Aboriginal' inside this quoted 2002 definition (see Aboriginal point in section 3). The page also says the MNC "is not a government body and does not issue Métis citizenship". The Métis Nation's definition is a contested area in Canada (Quebec's different position above); this survey should not adjudicate it.)

OCAP® principles

"The First Nations principles of ownership, control, access, and possession - more commonly known as OCAP® - assert that First Nations have control over data collection processes, and that they own and control how this information can be used." — First Nations Information Governance Centre (FNIGC), *The First Nations Principles of OCAP®* [voice] [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Fetched from an Internet Archive copy dated 2026-01-11 (live page not requested separately). Principle texts verbatim from the page: "Ownership refers to the relationship of First Nations to their cultural knowledge, data, and information." "Control affirms that First Nations, their communities, and representative bodies are within their rights to seek control over all aspects of research and information management processes that impact them." "Access refers to the fact that First Nations must have access to information and data about themselves and their communities regardless of where it is held." "Possession ... refers to the physical control of data." Also: "OCAP® is not a doctrine or a prescription"; the page states OCAP® is a registered trademark of FNIGC and that it covers FIRST NATIONS, not Inuit or Métis (Inuit/Métis have their own frameworks; not fetched). Use the ® as FNIGC does.)

Premiers Peuples / Premières Nations / Autochtones (Quebec government usage)

"Au Québec, le terme Autochtones désigne [les Premières Nations] et les Inuits ... En ce qui concerne l'appellation Premières Nations, elle ne désigne que les Amérindiens. Le terme Indiens, quant à lui, n'est utilisé que dans le contexte de la Loi sur les Indiens." — Gouvernement du Québec, Secrétariat aux affaires autochtones, *Amérindiens et Inuits : Portrait des nations autochtones du Québec, 2e édition, 'Note au lecteur' (2011)* [binds QC] [source] (OUTSIDE THE EDID RESOURCES. The bracketed words are my restoration: in the extracted PDF text the sentence reads "le terme Autochtones désigne et les Inuits, et les Amérindiens" (a word is missing in extraction); check the printed page before quoting. [our translation] In Quebec, 'Autochtones' refers to ... the Inuit and the Amerindians; 'Premières Nations' refers only to the Amerindians; 'Indiens' is used only in the context of the Indian Act. 2011 publication, so terminology may have moved. CONTENTION to flag, not resolve: the same brochure states "Au Québec, le nom de Métis n'est pas utilisé pour désigner les Indiens non inscrits" and "le gouvernement du Québec ne reconnaît pas la présence sur son territoire de communautés historiques métisses au sens du jugement rendu par la Cour suprême du Canada dans l'affaire Powley" (2011). UdeM uses 'Premiers Peuples' and 'Premières Nations' and lists nations by their own names (e.g. 'Inuk/Inuuk/Inuit', 'Wendat', 'Mi'gmaq/Mi'qmaq/Mi'kmaq'); no source defines 'Premiers Peuples'. A current (post-2011) Quebec source is a remaining gap.)

Reconciliation

"Reconciliation is an important part of the process of decolonization. Reconciliation requires that Indigenous people tell their stories and that they are heard. It requires a shared understanding of our common past and a shared vision of the future." — Kory Wilson and Colleen Hodgson (MNBC), BCcampus, 2018, *Pulling Together: Foundations Guide, Section 3: Reconciliation* [from BC] [source] (Fetched via Internet Archive copy (Wayback), because the live opentextbc.ca returned HTTP 403 to automated fetch.)

Réconciliation (UdeM usage)

"La réconciliation vise essentiellement à reconnaître les droits des Premiers Peuples et à rétablir une relation avec ceux-ci." — Université de Montréal, *Place aux Premiers Peuples, section S'engager dans la réconciliation* [binds QC] [source] ([our translation] Reconciliation essentially aims to recognize the rights of the First Peoples and to re-establish a relationship with them. The only French-language statement about what reconciliation means found in this pass; it is one institution's own wording, not a general definition.)

Scientific racism / eugenics

"Eugenics and scientific racism are widely misunderstood despite their long histories." — National Human Genome Research Institute (NHGRI), US NIH, *The Meaning of Eugenics: Historical and Present-Day Discussions of Eugenics and Scientific Racism* [from US] [source] (An event announcement; the page contains no definition. Closest definitional wording in a read source is The Biochemist 46(2): "pseudoscientific 'biological' arguments have been used to justify discrimination and oppression, particularly on the basis of disability and ethnicity.")

Settler colonialism

"[no standalone entry]" — Racial Equity Tools, *Racial Equity Tools Glossary* [from US] [source] (The glossary has no entry titled Settler Colonialism (only a related-resource box). The only 'settler-colonialism' wording found in an EDID resource is Western's: "For non-Indigenous people, allyship means understanding the impacts of settler-colonialism and reflecting on one's role in upholding or dismantling systemic inequality." (Western Research Allyship Guide, 2025). That is use, not a definition. Still no Canadian definition.)

Sharing / learning circles

"The circle influences how Indigenous people view the world. That is, how all things are connected. Balance relies on this connection and without balance, health is compromised." — Pass The Feather (Dawn lehstoseranon:nha), *Sharing Circles (Talking Feathers for Sharing and Restorative Justice Circles)* [voice] [source] (Describes the circle's meaning, not a procedural definition of 'sharing circle'. The page itself writes 'Indigenous people' in the singular-collective form that Western's guide flags (section 3 below).)

Sécurisation culturelle

"La sécurisation culturelle consiste à rétablir et à soutenir l'équité pour les Autochtones. Elle reconnaît la présence des iniquités et cherche à combler ces écarts par des pratiques pertinentes." — Gouvernement du Québec, ministère de la Santé et des Services sociaux, *La sécurisation culturelle en santé et en services sociaux : vers des soins et des services culturellement sécurisants pour les Premières Nations et les Inuit (édition mars 2021)* [binds QC] [source] ([our translation] Cultural safety consists of restoring and sustaining equity for Indigenous people. It recognizes the presence of inequities and seeks to close these gaps through relevant practices. OUTSIDE THE EDID RESOURCES. Government health-system source, not community-authored. The same document credits the approach to Irihapeti Ramsden, a Maori nurse (verbatim: "mise au point initialement par Irihapeti Ramsden, une infirmière maorie de Nouvelle-Zélande"). UdeM uses the term in an education setting (see below).)

TCPS 2 Chapter 9 (purpose, as the reference standard for research review)

"This chapter on research involving Indigenous peoples in Canada, including Indian (First Nations), Inuit, and Métis peoples, marks a step toward establishing an ethical space for dialogue on common interests and points of difference between researchers and Indigenous communities engaged in research." — CIHR, NSERC, SSHRC (Panel on Research Ethics), *TCPS 2 (2022), Chapter 9: Research Involving the First Nations, Inuit, and Métis Peoples of Canada, Introduction* [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Also verbatim: "This chapter forms an integral part of this Policy to which institutions eligible to administer and receive research funding from any of the three research agencies agree to adhere as a condition of funding." and, on misappropriation: "Appropriation of collective knowledge, treatment of such knowledge as a commodity to be traded, or making unauthorized adaptations for commercial purposes, may cause offence or harm to communities from which the knowledge originates." (application notes after Article 9.1; I did not confirm the exact article number). Defines "Traditional knowledge – the knowledge held by First Nations, Inuit, and Métis peoples ... specific to place, usually transmitted orally, and rooted in the experience of multiple generations." Scope: human-participant research ethics; it is not a curriculum standard, so for Q4 it speaks to research review only. Also records "Aboriginal peoples – see Indigenous peoples.")

Tokenism

"Tokenism: refers to the superficial or symbolic effort to include individuals from underrepresented or marginalized groups, without addressing systemic issues or ensuring meaningful participation. It often involves selecting one or a few individuals to represent an entire group, which can reinforce stereotypes and further marginalize those individuals (CultureAlly, 2023)." — Western Research (Western University), quoting CultureAlly (2023), *Centering Indigenous Voices: Guide Towards Allyship in Indigenous Research (glossary), July 2025* [binds UWO] [source] (FOUND INSIDE AN EDID RESOURCE, not outside: the design's gap register says no source for tokenism, but Western's Allyship guide (already listed in domain 4) carries a glossary entry and a 'What to avoid' box. Verbatim from the box: "Tokenism: Engaging an Indigenous person only because they are Indigenous and not for the knowledge they bring is tokenistic." and "Tokenism: can be difficult to recognize because it creates an optic of inclusion and fairness by virtue of bringing members of an equity-denied group into a space without transforming the power dynamics through meaningful structural or systemic changes." The glossary text is a secondary definition (a consultancy blog) adopted by Western; it is not community-authored. Companion entry in the same guide: "Performative Allyship: Undertaking actions that do not create meaningful positive change for Indigenous Peoples to make oneself appear to others as an Ally, often for personal or professional benefit.")

TRC Calls to Action

"In order to redress the legacy of residential schools and advance the process of Canadian reconciliation, the Truth and Reconciliation Commission makes the following calls to action." — Truth and Reconciliation Commission of Canada, *Truth and Reconciliation Commission of Canada: Calls to Action (2015), local PDF, printed p. 1 (PDF p. 5)* [binds CA] [voice] [source] (Read directly from the local PDF (layout-mode extraction confirms the full sentence). Call 62(ii)'s printed page is 7 (PDF p. 11).)

Treaty (Dish With One Spoon)

"I called this new adapted methodology One Dish, One Spoon, which references a covenant agreement between the Haudenosaunee and Anishnawbe to peacefully share lands and resources." — Scott Thomas (Haudenosaunee), *AlterNative* 18(1):84-93 (2022), *Applying One Dish, One Spoon as an Indigenous research methodology (abstract)* [from CA-ON] [voice] [source] (Abstract via Crossref (publisher page 403). Spelling 'Anishnawbe' is the abstract's. Applies to that treaty only, as the design says. Note the EDID list calls the author a Scott/D.S. Thomas; the Crossref record gives the first name as Scott.)

Two-Eyed Seeing / Etuaptmumk (other side of the tension)

"Two-Eyed Seeing refers to learning to see from one eye with the strengths of Indigenous ways of knowing and from the other eye with the strengths of Western ways of knowing and to using both of these eyes together" — Albert Marshall (Mi'kmaw Elder, Eskasoni First Nation), as quoted on the Two-Eyed Seeing site, *Two-Eyed Seeing (page quoting Bartlett, Marshall & Marshall 2012, p. 335)* [from CA] [voice] [source] (FINDING: the phrase "linking, not integrating" does NOT appear on this page (checked in full: it says 'intentionally and respectfully brings together our different ways of knowing' and 'avoids a clash of knowledges'). Roher et al. 2021 (open access; also searched, the word 'linking' does not occur) is the nearest verbatim statement; see next row. The design should not put "linking, not integrating" in quotation marks as a quote of the Marshalls or of this site.)

Two-Eyed Seeing: integrating vs merging (verbatim tension evidence)

"Words such as blending, integrating, and merging imply a mixing of knowledges, which seems contradictory to the original authors' contention that Two-Eyed Seeing should not prompt a merging of knowledges." — Roher, Yu, Martin & Benoit, PLoS ONE 16(7) e0254612 (2021), *How is Etuaptmumk/Two-Eyed Seeing characterized in Indigenous health research? A scoping review* [from CA] [voice] [source] (Also verbatim: "Despite different word use, there is clear articulation in the original authors' publications that knowledges should not be tweaked or merged with one another (i.e., to avoid one knowledge system being subsumed within another)" and "some suggest that Two-Eyed Seeing encourages the bridging of Indigenous and Western knowledges, while others see Two-Eyed Seeing as encouraging the blending or integration of Indigenous and Western knowledges". Attribution of the principle to Elders Albert and Murdena Marshall of Eskasoni First Nation and Dr. Cheryl Bartlett confirmed in the article. The real tension is TRC 62(ii) 'integrate' versus the originators' caution against merging; the authors note scholars use the term 'in various and sometimes contradictory ways'. Do not harmonize.)

UNDRIP (Declaration text)

"Indigenous peoples have the right to self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development. [Art. 3] ... Indigenous peoples have the right to maintain, control, protect and develop their cultural heritage, traditional knowledge and traditional cultural expressions, as well as the manifestations of their sciences, technologies and cultures, including human and genetic resources, seeds, medicines, knowledge of the properties of fauna and flora ... [Art. 31(1)]" — United Nations General Assembly, *United Nations Declaration on the Rights of Indigenous Peoples*, A/RES/61/295 (13 Sept 2007), Articles 3 and 31(1) [binds CA] [context] [source] (OUTSIDE THE EDID RESOURCES. Words joined across a hyphenated line break; ellipsis marks my cuts. Article 31 explicitly names 'sciences' and 'genetic resources', directly relevant to biochemistry. The UN text uses lowercase 'indigenous peoples' in the Declaration's own style.)

UNDRIP Act (Canada, 2021)

"the Declaration is affirmed as a source for the interpretation of Canadian law" — Parliament of Canada (Justice Laws Website), *United Nations Declaration on the Rights of Indigenous Peoples Act*, S.C. 2021, c. 14 (preamble) [binds CA] [source] (OUTSIDE THE EDID RESOURCES. Also verbatim (preamble): "Whereas the United Nations Declaration on the Rights of Indigenous Peoples provides a framework for reconciliation, healing and peace"; and s. 2(1): "Indigenous peoples has the meaning assigned by the definition aboriginal peoples of Canada in subsection 35(2) of the Constitution Act, 1982." The preamble also records the TRC's call to "fully adopt and implement the Declaration as the framework for reconciliation" (the TRC's Call 43 is the original; PDF p. 8, printed p. 4).)

Appendix C. Courses (Q8)

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
1_a	faculty	CHEM 121	Natural Dyeing	undergraduate	not_stated	indigenous_knowledge_linked	Listed as a course example on the UBC Indigenous Chemistry Connections site (UBC Chemistry, not BMB). No description captured. Level inferred from number only.	link
1_a	faculty	CHEM 300	Policy Writing and Pollution in Quin ?amak?is	not_stated	not_stated	indigenous_knowledge_linked	Listed as a course example on the UBC Chemistry Indigenous Chemistry Connections site (not BMB); content not captured.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
1_a	faculty	CHEM 301	Tsleil-Waututh Restoration of selilwet	not_stated	not_stated	indigenous_knowledge_linked	Listed as a course example on the UBC Chemistry Indigenous Chemistry Connections site (not BMB); content not captured.	link
3_a	faculty	HSCI 100	Human Biology	undergraduate	module_or_unit	indigenous_knowledge_linked; pedagogy_change	Instructional modules built around the question "how do we know?", comparing the traditional scientific method and Indigenous knowledge-gathering methods, using medicinal and native plants as the context. Faculty of Health Sciences project, Sept 2018 to Nov 2021, \$6000; not an MBB course.	link
12_a	university		Indigenous Peoples as Scientists	not_stated	whole_course	indigenous_knowledge_linked; unrecognized_contributors; pedagogy_change	Microcredential (Indigenous Technoscience) course on how Indigenous scientists work, including decolonizing methods; not a biochemistry-unit course, relevant to science students at university level	link
24	department	CHEM 101	Chemistry of Food and Cooking	undergraduate	not_stated	indigenous_knowledge_linked	A food-chemistry course whose description states First Nations traditional knowledge of food preparation will be explored (extent not stated).	link
24	department	BIOC 200	Medicinal Plants and Culture	undergraduate	whole_course	indigenous_knowledge_linked	A biochemistry course on indigenous bioactive plants and their role in Indigenous culture.	link
25	department		Indigenous Environmental Science (classes within Indigenous Knowledge and Science)	undergraduate	whole_course	indigenous_knowledge_linked	Program lists Indigenous Environmental Science classes alongside Biology, Chemistry, Computer Science, Mathematics and Statistics; no course code or syllabus read.	link
87	department		Certificate of Science: Yukon First Nations core competency	undergraduate	not_stated	indigenous_knowledge_linked	Program-level requirement, not a single course; students learn how courses feature local, Indigenous and Northern examples.	link
36_a	faculty	BIO 225 (also written BIOL 225 on the Science Indigenous Initiatives page)	Plants and Civilization	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Biology course redesigned to bring Indigenous and Western science perspectives together; weekly circle format; uses Braiding Sweetgrass by Robin Wall Kimmerer. Led by the Biology chair and the Manager of Science Indigenous Initiatives. Students proposed alternative titles such as 'Plant Knowledge and Practices: From Indigenous and Western Science Perspectives'.	link
36_a	faculty	not_stated	Science Communication course (Traditional Ecological Knowledge module)	undergraduate	module_or_unit	indigenous_knowledge_linked	(paraphrase from fetch summary) A Traditional Ecological Knowledge (TEK) module is stated to be a required component in the Science Communication course for all undergraduates.	link
39_a	university	not_stated	Collaborative Indigenous Learning Bundle: Indigenous Sciences – Shifting the Paradigm in Western Science	not_stated	module_or_unit	indigenous_knowledge_linked	(paraphrase from fetch summary) Brightspace module that can be added to any course; emphasizes the significance of Indigenous science and traditional knowledge in shaping worldviews; includes an Indigenous expert lesson followed by a Knowledge Keeper interview. No specific biochemistry course named.	link
44_a	university	IESS 1001H	Foundations in Indigenous Environmental Studies and Science	not_stated	whole_course	indigenous_knowledge_linked	Listed on the Approved Indigenous Course List that fulfils the Indigenous Course Requirement (2019-2020 calendar). A science-facing option on the list; whether Biochemistry and Molecular Biology students use it was not found.	link
44_a	university	INDG-ERST-IESS 2601Y	Indigenous Knowledge Systems and the Natural Environment	not_stated	whole_course	indigenous_knowledge_linked	On the same Approved Indigenous Course List (2019-2020 calendar).	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
sector	university	not_stated	Chemistry and Indigenous Knowledge: Development of a Novel Chemistry Course	not_stated	whole_course	indigenous_knowledge_linked	Course developed by a chemistry professor at First Nations University of Canada (seed row 25, handled by another batch); mentioned in a Trent news item. Also: 'Medicinal Plant Survey and Paint Project Highlighting Indigenous Food, Medicine and Art Traditions'. Hand to the batch covering row 25 to find the course page itself.	link
46_a	university	not_stated	Anishnaabe earth-based courses in the four seasons (new Indigenous curriculum)	not_stated	whole_course	indigenous_knowledge_linked; naming_and_language	Courses centred on Anishnaabe knowledge and the Anishnaabemowin language, taught on the land; not a science course, recorded because the page presents it as the university's new Indigenous curriculum. Codes and titles not given on the page.	link
49_a	university	ANIS 3906A	Anishinaabe land sustainability practices in the Great Lakes: Knowledge for a changing climate	undergraduate	whole_course	indigenous_knowledge_linked	(paraphrase from fetch summary) Anishinaabe Studies course introducing pre-contact ecological knowledge and contemporary issues such as climate change and food security (fetch-tool summary). Not a biochemistry course; recorded as the nearest science-adjacent offering.	link
73_a	university		Social Research: Decolonizing Methodologies	not_stated	whole_course	pedagogy_change; other	Course title listed on the Indigenous page; not a biochemistry course.	link
73_a	university		Colonialism, Racism, and Indigeneity in Canada	not_stated	whole_course	other	Course title listed on the Indigenous page; not a biochemistry course; approach_type is a best fit, not a content claim.	link
88_a	university	HIST 4202F/G	Confronting Colonialism	not_stated	whole_course	other	History course; not biochemistry. "education, literacy and schooling have been used as imperial and colonial tools"	link
54_a	university		Introduction to Indigenous Studies (200-level elective, planned)	undergraduate	whole_course	other	Listed as a development commitment in a 2023 news item; not a biochemistry course.	link
57_a	faculty	PPHS 593	Medical colonialism	not_stated	not_stated	colonial_harms_in_bioscience	Title of a new Faculty course listed on the Indigenous Health Professions Program page; the page also says courses address 'past and present discrimination against Indigenous peoples in Canada's healthcare system'. Content beyond that not read.	link
57_a	faculty	not_verified (search snippet gave FMED 506)	Indigenous perspectives: Decolonizing the approach to health (title from search snippet; not fetched)	not_stated	whole_course	indigenous_knowledge_linked; pedagogy_change	Faculty news article (2019): the course explores 'the nature of Indigenous peoples' ways of understanding health and wellness, particularly with regards to the divergences between the Western and Indigenous knowledge and practices.' Calendar page returned HTTP 403, so code and title are unconfirmed.	link
57_a	university	DENT 206; SOCI 526; POLI 368 (listed among new Indigenous-themed courses since 2019)	Social Justice Seminar; Indigenous Women's Health and Healthcare; Political Theory and Indigeneity	not_stated	not_stated	colonial_harms_in_bioscience	Footnote on DENT 206: 'Ce cours ne porte pas uniquement sur des sujets autochtones, mais en présente quelques-uns.' [our translation: This course is not only about Indigenous topics but presents some.] Dentistry collaborated with the Faculty of Medicine and Health Sciences on themes including 'De la molécule à la santé mondiale'.	link
58_a	university	(microprogramme)	Microprogramme de 1er cycle en santé autochtone (soins en communauté)	undergraduate	whole_course	indigenous_knowledge_linked	Listed on the Place aux Premiers Peuples page as a first-cycle microprogramme in Indigenous health; no biochemistry content.	link
58_a	university	ANT2830	Cosmologies autochtones	not_stated	whole_course	indigenous_knowledge_linked	Listed in Portrait 2023 Annexe I among courses with Indigenous content (Faculté des arts et des sciences, Anthropologie). Not a biochemistry course; included as university-level context only.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
59_a	university	MED 5601	Santé des autochtones	graduate	whole_course	colonial_harms_in_bioscience; indigenous_knowledge_linked	Listed in Portrait 2023 among Indigenous-related courses (Faculty of Medicine). Not biochemistry.	link
59_a	university	SAP 7019	Santé des Autochtones - questions d'histoire et de pouvoir	graduate	whole_course	colonial_harms_in_bioscience	Seminar in public-health master's programs; listed in Portrait 2023. Not biochemistry.	link
60_a	faculty	MSI 642	Interventions (nursing master's; full title not captured)	graduate	whole_course	colonial_harms_in_bioscience	Portrait 2023 names MSI 642 and a faculty-of-medicine initial-nursing program with Indigenous-health content; not biochemistry; title truncated in source text read.	link
61_a	university	(CTL primer course)	Primer Course modules on the Rotinohnsionni Confederacy	not_stated	module_or_unit	indigenous_knowledge_linked; pedagogy_change	(paraphrase from fetch summary) Listed on the Centre for Teaching and Learning decolonization page as a related initiative; nature and audience not read. Not a biochemistry course.	link
62_a	university	(summer course)	Décoloniser les savoirs et les institutions universitaires (credit summer school on Indigenous women's governance)	not_stated	whole_course	pedagogy_change; other	Research project table: 'Développement d'un cours d'été crédité pour les femmes autochtones' with editions in 2017 (pilot), 2018 and 2022. Not a biochemistry course.	link
63_a	university	SPU1012; SPU1022	Perspectives sociales et culturelles de la santé; Contexte socioculturel des soins	undergraduate	single_lecture	colonial_harms_in_bioscience; indigenous_knowledge_linked	Nursing courses that 'incluent un trois heures sur la santé des Autochtones' [our translation: include a three-hour session on Indigenous health]. Not biochemistry; university-level context.	link
64_a	department		(course within the planned Certificat en agriculture nordique; title not given)	not_stated	whole_course	indigenous_knowledge_linked; colonial_harms_in_bioscience	A planned course in a certificate hosted by the Département des sciences fondamentales on Indigenous perspectives on agriculture today and on the role of agriculture in colonization. Future tense in the source ('contiendra'); no code or syllabus found.	link
66_a	department		Dimensions humaines du rapport aux écosystèmes forestiers (course in the Maîtrise en gestion durable des écosystèmes forestiers)	graduate	module_or_unit	indigenous_knowledge_linked	Master's programme in sustainable management of forest ecosystems (listed as a Département des sciences naturelles programme) introduces Indigenous knowledge into one named course. Source is a university-authored document; no syllabus seen.	link
68_a	university	PRA8120	Pratiques de recherche et action publique en contexte autochtone	graduate	whole_course	indigenous_knowledge_linked; research_ethics_and_data_governance; pedagogy_change	Graduate course in the INRS Pratiques de recherche et action publique programme; Indigenous knowledge-holders are part of the core teaching team and transmit knowledge students must account for in their work. Not located in the Centre Armand-Frappier; relevant to INRS graduate students generally.	link
68_a	university	EUR8512/UCS6060	Logiques et dynamiques urbaines des Premiers Peuples	graduate	whole_course	indigenous_knowledge_linked	Master's course in Études urbaines INRS/UQAM, with Indigenous scientists contributing; not specific to the health-biotechnology centre.	link
76_a	faculty	not_stated (IPHE course per search snippet)	Introduction to Cultural Safety in Healthcare for Indigenous People	not_stated	whole_course	colonial_harms_in_bioscience; other	(paraphrase from fetch summary) Required for medicine, pharmacy, nursing, dental hygiene and dentistry students at Dalhousie.	link
83_a	university	not_stated	Indigenous Peoples and Media; Reporting in Mi'kma'ki	not_stated	whole_course	other	(paraphrase from fetch summary) Two journalism courses named on the Indigenous Community page.	link
85_a	university	IKE-3062	Introduction to Indigenous Knowledge and Worldviews	undergraduate	whole_course	indigenous_knowledge_linked	(paraphrase from fetch summary) Core course of the Indigenous Studies Minor, open across programs; not a science course and not stated to be required for Chemistry.	link
1_a	department	BIOC 470	Biochemistry & Society: Current Issues	undergraduate	whole_course	other	Department's own fourth-year course on controversial societal issues in biochemistry; listed as one of the courses a Biochemistry major must choose from for one 4th-year requirement. No Indigenous or decolonial wording in the description.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
1_a	faculty	SCIE 113	First-Year Seminar in Science	undergraduate	module_or_unit	indigenous_knowledge_linked; pedagogy_change; other	Required first-year course in the Biochemistry Major, Honours and Combined programs (listed in every first-year program table). Faculty of Science page describes science-and-society and DEI content; a June 2024 Faculty news item says Indigenous Ways of Knowing are being woven through the course; the 2023-24 Skylight report says a working group is designing and piloting an Indigenous Science module.	link
1_a	department	CHEM 329	Research Ethics and Data Analysis Skills	undergraduate	whole_course	research_ethics_and_data_governance	Chemistry-department course (1 credit) required in the Combined Honours Biochemistry and Chemistry program (third year, 'CHEM_V 319, 329'). Description names research ethics; no Indigenous content stated.	link
3_a	department	MBB 342	Introductory Genomics and Bioinformatics	undergraduate	module_or_unit	research_ethics_and_data_governance	Own upper-division MBB course listed in the MBB major's calendar page; description states integrated discussion of ethical/legal/social issues of genomics. No Indigenous content stated.	link
3_a	department	MBB 441	Bioinformatics	undergraduate	module_or_unit	research_ethics_and_data_governance	Own MBB course; description includes ethics in method development and analysis.	link
3_a	department	MBB 463	Forensic Genomics	undergraduate	module_or_unit	research_ethics_and_data_governance	Own MBB course; description lists ethical considerations of DNA typing.	link
3_a	department	MBB 801	Student Seminar in Molecular Biology and Biochemistry	graduate	module_or_unit	research_ethics_and_data_governance; other	Graduate MBB introductory course (3 units); description lists research ethics and 'professional equality, diversity, and inclusiveness'. No Indigenous content stated.	link
3_a	faculty	CHEM 373	Green Chemistry: Science with Conscience	undergraduate	module_or_unit	indigenous_knowledge_linked; other	Chemistry-department (Faculty of Science) course, not an MBB course; calendar description names Indigenous perspectives among those shaping chemical practice. Not shown to be required for the MBB major (level coded faculty for that reason).	link
4_a	university	FNST (course prefix)	First Nations Studies courses, listed in UNBC's Social Science breadth requirement	undergraduate	not_stated	indigenous_knowledge_linked	Not a biochemistry-specific course. UNBC's calendar lists the FNST prefix among the Social Science courses that count toward the Academic Breadth requirement that BSc students (other than listed exempt BSc majors; Chemistry not among the exempt) must meet. Individual FNST course descriptions were not fetched.	link
14_a	department	CHEM 2320	History of Chemistry	undergraduate	whole_course	global_origins_of_science; other	Department's own whole course on the history of chemistry (key figures and discoveries, origins of chemistry). Description names no Indigenous or non-Western contributors.	link
14_a	department	CHEM 2310	Chemistry and Biochemistry in Society	undergraduate	whole_course	other	Department's own whole course (for non-majors) on the history of chemistry and its impact on society; no Indigenous content stated.	link
14_a	university	INDG (all courses)	Indigenous Studies, Blackfoot and Cree courses on the Liberal Education Lists	undergraduate	not_stated	indigenous_knowledge_linked; naming_and_language	Not biochemistry-specific. The B.Sc. requires completion of the Liberal Education List Requirement, and the Liberal Education Lists include Indigenous Studies (all courses), Blackfoot (all courses), Cree (all courses), Indigenous Governance and Business Management and Indigenous Health 3300 (Traditional Indigenous Health Concepts). Students choose from the lists; no Indigenous course is shown as compulsory.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
23	faculty	Indigenous Learning Requirement (3 cu)	College of Arts and Science Indigenous Learning Requirement	undergraduate	not_stated	indigenous_knowledge_linked; other	College-level requirement shown as a line in the BMIS 4-year planning sheet; students choose from an approved list of courses; courses 'aim to teach students about the context of the contemporary and historical position of Indigenous people, and in so doing also seek to unsettle core elements of settler colonialism'. The approved list itself was not read.	link
23	faculty	INDG 107.3	Introduction to Canadian Indigenous Studies	undergraduate	whole_course	indigenous_knowledge_linked	Appears in the first-year schedule of the Biomedical Sciences (BMSC) guidebook that leads into the BMIS major; whether it is on the ILR list was not read.	link
26_a	department	BGEN 3010	Genetics in Biomedicine	undergraduate	whole_course	research_ethics_and_data_governance	Human genetics course that lists ethics among its topics; marginal (clinical genetics ethics, no Indigenous content).	link
26_a	department	BGEN 3024	Introduction to Human Genetics B	undergraduate	whole_course	research_ethics_and_data_governance	Same pattern as BGEN 3010: 'ethics' named among clinical topics; marginal.	link
26_b	department	CHEM 1018	Chemistry - The Central Science	undergraduate	whole_course	global_origins_of_science	Introductory course for non-majors (cannot count toward Chemistry honours, joint honours or major); 'history of science' is one item in a list of topics. Marginal.	link
26_b	faculty	SCI 1100	Wawatay Foundations: Re-centering Indigenous Science within Western Frameworks	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Faculty of Science first-year course restricted to students in the Wawatay Cohort (Indigenous Direct Entry students, who must take 6 credit hours of Wawatay interdisciplinary science courses). Not open to other students.	link
26_b	faculty	SCI 1200	Wawatay Research Project: Exploring Science through Indigenous and Western Perspectives	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Laboratory research-skills course for the Wawatay Cohort; restricted enrolment.	link
26_b	university	INDG 3330	Indigenous Science, Technology, and Society	undergraduate	whole_course	indigenous_knowledge_linked; colonial_harms_in_bioscience; research_ethics_and_data_governance	Indigenous Studies (Faculty of Arts) 3000-level course on technoscience including genomics and biomedicine; an elective for science students, prerequisite INDG 1200 or equivalent; attribute Humanities. Not required for the Biochemistry B.Sc. as far as read.	link
26_b	university	INDG 3240	Indigenous Medicine and Health	undergraduate	whole_course	indigenous_knowledge_linked	Indigenous Studies course on health, disease and medical practices; available as an elective; attribute Humanities.	link
26_b	faculty	BIOL 4650	Biology and Society	undergraduate	whole_course	research_ethics_and_data_governance; other	Biological Sciences course (not Chemistry or Microbiology) on societal implications of research in genetics, biotechnology, ecology and evolution; no Indigenous content in the description. The description limits enrolment to students in third year or higher of a major or honours program in Biological Sciences, so biochemistry students are probably not eligible (page text truncated; not confirmed).	link
27	university	Indigenous Course Requirement (ICR)	Indigenous Course Requirement (all undergraduate degrees; Education excepted)	undergraduate	whole_course	indigenous_knowledge_linked; other	Applies to Chemistry and Biochemistry students like all others; 3 credit hours with 'significant Indigenous content'. The calendar's ICR list names no CHEM or BIOL courses (it includes IS-2012 Indigenous Sciences).	link
27	university	IS-2012	Indigenous Sciences: Contributions to Contemporary Challenges	undergraduate	whole_course	indigenous_knowledge_linked; global_origins_of_science	Indigenous Studies course on Indigenous sciences alongside western sciences and STEM case studies; listed in the calendar's ICR courses (so open to chemistry and biochemistry students as their ICR choice).	link
27	university	IS-3010	Protecting Indigenous Knowledge Systems	undergraduate	whole_course	indigenous_knowledge_linked; research_ethics_and_data_governance	ICR-listed Indigenous Studies course on rights over knowledge and biodiversity stewardship.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
27	university	IS-3012 / ANTH-3170	Ethnoecology As a Research Approach	undergraduate	whole_course	indigenous_knowledge_linked; research_ethics_and_data_governance	Cross-listed course on traditional ecological knowledge systems, including medicinal plants; ICR-listed (ANTH-3170 and IS-3012 both appear on the calendar ICR list).	link
29	faculty	ENVR 2393	Les plantes qui enseignent: les relations plantes-humains	undergraduate	whole_course	indigenous_knowledge_linked	Environmental sciences course taught at USB (French); not shown as required by the biochimie-microbiologie program page. Prerequisite ENVR 1001 or 1000.	link
30	university	Indigenous requirement (3 credit hours)	CMU common curriculum: Indigenous requirement	undergraduate	not_stated	indigenous_knowledge_linked; pedagogy_change	Common-curriculum category: 'Indigenous – 3 credit hours' listed in the BA Arts and Science Major and the four-year BSc (Biology major) requirement lists; transitional core for BA, BBA, BSc: 'Anabaptist, Indigenous, Making – 6 credit hours from two of the three categories'. Qualifying courses are outside the sciences (INDS-1050, HIST/INDS-2040, BUSI/ECON-2090, MUSC-3240, PCTS/IDS-2443).	link
30	university	INDS-1050	Indigenous Peoples of Canada	undergraduate	whole_course	other; indigenous_knowledge_linked	A course that fulfils the Indigenous requirement; no science content.	link
30	university	HIST-2000	History of Science	undergraduate	whole_course	global_origins_of_science	6 credit hours, listed among courses that may be used to meet the science requirement; 'emphasis on the concepts of the physical sciences'; no Indigenous content stated.	link
86	department	HUBI 3004	Cellular Signaling	undergraduate	whole_course	indigenous_knowledge_linked	Human Biosciences course in which Indigenous medicines appear as an example of signalling interactions; one clause in the description. Co-requisite or equivalent Biochemistry 3108.	link
86	department	HUBI 3005	Environment-Health Interactions	undergraduate	whole_course	indigenous_knowledge_linked	Human Biosciences course; Indigenous communities named among populations affected by food and environment policy.	link
86	department	HUBI 4240	Nutrient-Gene Interactions and Personalized Health	undergraduate	whole_course	research_ethics_and_data_governance	Marginal: ethics of personal DNA data; no Indigenous wording in the description.	link
87	department	GEOG 290	Climate Change and the Circumpolar World	undergraduate	whole_course	indigenous_knowledge_linked	Science-program course (listed on the Science program page) that treats Traditional, Indigenous and Scientific knowledge as co-equal frames.	link
87	department	GEOL 106 / GEOL 108	Historical Geology / Earth Through Time	undergraduate	whole_course	global_origins_of_science; indigenous_knowledge_linked	Science-program geology courses; identical sentence in both descriptions.	link
87	university	NS 200 / HIST 140	Indigenous Canada (NS 200; History of Yukon First Nations and Self-Government, HIST 140)	undergraduate	whole_course	colonial_harms_in_bioscience; indigenous_knowledge_linked	Meets the Yukon First Nations core competency. NS 200 is a science-coded course 'Registration restricted to students in the B.Sc. in Environmental and Conservation Sciences program'; other students take HIST 140.	link
87	university	PHIL 230	Bridging Knowledges	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	On the list of courses that meet the Yukon First Nations core competency (so open to Science Certificate students); prerequisites ENGL 100 and HIST 140, FNQA 100 or FNQA 101.	link
87	department	BIOL 202	Genetics	undergraduate	whole_course	research_ethics_and_data_governance	Marginal: 'ethics' listed among current topics; no Indigenous wording.	link
32_a	faculty	SCIENCE 2AR3	Foundations of Science: Equity, Justice and Anti-Racism in Science	undergraduate	whole_course	unrecognized_contributors; other	Faculty of Science course, open to Level II and above (any faculty); required for the ARIE Concurrent Certificate. Whether BBS students must or are advised to take it: not stated.	link
32_a	faculty	SCIENCE 4AR6	Inquiry in Science, Equity, Justice and Anti-Racism in Science	undergraduate	whole_course	other	Faculty of Science inquiry course (prerequisite SCIENCE 2AR3 or permission); second course in the ARIE certificate.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
32_a	department	NEXUS 2A03	Impact of Infectious Disease on Individuals and Society	undergraduate	assignment	other	Listed on the department's undergraduate course-outline page (instructor listed for 2026/2027). Course description frames societal impact of infectious disease; the Fall 2026 outline's media assignment offers a topic on Indigenous water inequities.	link
32_a	department	NEXUS 4A06 A/B	How to Survive a Pandemic: Capstone Project for Nexus Minor	undergraduate	whole_course	other	Capstone listed on department course-outline page; project topics bridge science with societal considerations.	link
32_a	department	BIOCHEM 4E03	Gene Regulation and Stem Cell Development	undergraduate	module_or_unit	other	Department course; outline lists modules on the history and ethics of stem cells and 'Canadian Stem Cell History' lectures.	link
32_a	department	BIOCHEM 3AB3	Antibiotics are the Cornerstone of Medicine	undergraduate	whole_course	other	Department course (history-of-science content in the description).	link
32_a	department	BIOCHEM 3M13	Microbial Interactions	undergraduate	single_lecture	other	Outline schedule lists a lecture on the history of microbiology.	link
33_a	department	BIOCHEM 4320F/G	Synthetic Biology and Philosophy	undergraduate	whole_course	research_ethics_and_data_governance; other	Department course; 'Some background in bioethics and/or philosophy of science is recommended' as prerequisite note. No Indigenous or decolonial content in the description.	link
35_a	department	GLPH 281	Racism and Health in Canada	undergraduate	whole_course	colonial_harms_in_bioscience; other	Listed on the DBMS undergraduate course list (Global and Population Health focus); not shown as required for Biochemistry; 'Priority access will be given to students registered in the Bachelor of Health Sciences program.'	link
35_a	department	BCHM 320	Applications of Synthetic Biology	undergraduate	assignment	research_ethics_and_data_governance	Biochemistry course; ethics debate is an assessment.	link
35_a	department	BCHM 441	Current Topics in Biochemistry	undergraduate	single_lecture	research_ethics_and_data_governance	Biochemistry course; ethics appears in one learning objective.	link
36_a	faculty	BIOL 225	Plant Knowledge and Practices: Indigenous and Western Science Perspectives	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Biology (BIOL) 200-level course in the Faculty of Science; a BIOL 200-level course satisfies the Biochemistry program's '0.5 additional BIOL courses at the 200-level' requirement (inferred). Current calendar title differs from the 'Plants and Civilization' title in wave 1 and on the Science page.	link
36_a	faculty	SCI 211	Traditional Medicines Land-Based Field Course	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Faculty of Science course; not on the Biochemistry approved-course list read (elective use inferred).	link
36_a	faculty	COMMST 193 / ENGL 193 (match to the page's 'Science Communication course' inferred)	Communication in the Sciences	undergraduate	module_or_unit	indigenous_knowledge_linked	Required in the Biochemistry (BSc Honours) program (COMMST193 or ENGL193). The Faculty of Science page describes a TEK module in 'the Science Communication course'; the calendar description of COMMST 193/ENGL 193 does not mention it.	link
36_a	faculty	BIOL 489	Arctic Ecology	undergraduate	module_or_unit	indigenous_knowledge_linked	Biology course; not on the Biochemistry approved-course list read; possible elective (inferred).	link
36_a	faculty	SCI 227	Chemistry in Society: Yesterday, Today, and Tomorrow	undergraduate	whole_course	other	Faculty of Science course; no Indigenous content in the description; not on the Biochemistry approved list.	link
37_a	department	MCB*2000	Microbes, Medicines, and Society	undergraduate	whole_course	other	MCB course on societal implications of infectious disease; no Indigenous content in the description.	link
38_a	department	SC/BIOL 4005	The Scientific Method: Applications and Controversies	undergraduate	whole_course	research_ethics_and_data_governance	Fourth-year course offered by the Department of Biology, which co-offers the Biochemistry degree with Chemistry; it can count among the 3000/4000-level BCHM/BIOL/CHEM elective credits the Specialized Honours program allows (eligibility inferred from the program page, not stated for this course). Content is research integrity and misconduct, not Indigenous or decolonial content.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
38_a	faculty	SC/NATS 1535	Global Cultures of Science and Technology	undergraduate	whole_course	global_origins_of_science; indigenous_knowledge_linked	Faculty of Science natural-science course (not a BCHM/CHEM/BIOL code). Whether Biochemistry students may count it toward their required 12 credits of non-science General Education is not stated on the pages read. Names First Nations of the Americas as one possible source of science and technology contributions ('may include').	link
38_a	faculty	SC/STS 3725	Science, Technology and Exploration	undergraduate	whole_course	other	Faculty of Science science-and-technology-studies course; relevance to Biochemistry students not stated.	link
38_a	faculty	SC/STS 3740	How Darwinism developed: a history of evolutionary Biology.	undergraduate	whole_course	other	Faculty of Science history-of-biology course; relevance to Biochemistry students not stated.	link
38_a	faculty	SC/NATS 1760	Science, Technology and Society	undergraduate	whole_course	other	Faculty of Science natural-science course on science and society; no Indigenous or decolonial wording in the description.	link
39_a	department	BIOC 1500	Biochemistry in a Modern Society	undergraduate	whole_course	other	First-year workshop course listed among the Biochemistry program's courses; calendar prerequisite: 'Enrolled in a Biochemistry program'. The description is about applications of biochemistry; it does not mention Indigenous, ethics, history or decolonial content. Recorded as the unit's only 'in society' titled course.	link
39_a	department	BIOL 3301 / BTEC 3301	Biotechnology II	undergraduate	whole_course	research_ethics_and_data_governance	Cross-listed Biology/Biotechnology course; Biotechnology is a sister program on the Institute of Biochemistry's program page. Whether Biochemistry students must or may take it was not confirmed.	link
39_a	department	BTEC 3302	Regulations and Intellectual Property	undergraduate	whole_course	research_ethics_and_data_governance	Biotechnology course (Institute-owned code); relevance to Biochemistry majors not confirmed.	link
39_a	faculty	BIOL 4810	Education Research in Undergraduate Science	undergraduate	whole_course	pedagogy_change	Offered by Biology; the calendar says it 'can only be used by students in programs offered by, or in conjunction with, the Faculty of Science as a free elective', so Biochemistry students may take it as a free elective.	link
39_a	university	PHIL 2408	Bioethics	undergraduate	not_stated	research_ethics_and_data_governance	Appears by title only in a '1.5 credits in:' option list (BUSI 1800, BUSI 2800, PHIL 2408) on the Biochemistry program page; the extracted text does not separate the Biochemistry from the Biotechnology streams, and no description was read.	link
41_a	department	Honours Biochemistry degree requirement (c)	Required Indigenous Studies course within the Honours Biochemistry program	undergraduate	whole_course	indigenous_knowledge_linked	Degree requirement printed in the Honours Biochemistry program in the Winter 2027 Undergraduate Calendar (p. 548). The same wording appears in the Honours Biochemistry with Thesis, Pharmacy Stream, Biochemistry and Biomedical Sciences (Health Stream) and Honours Chemistry listings. The courses on the list are Arts, Humanities and Social Sciences courses; the requirement itself is stated in the Biochemistry program. Note the PDF also prints a degree-requirement block in programs of the Faculty of Arts, Humanities and Social Sciences ('one course with Indigenous content, perspectives, or materials').	link
41_a	faculty	GART-1210 / SOSC-1210	An Introduction into Indigenous Topics	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link

41_a	faculty	HIST-2460	Aboriginal Peoples in Canadian History: Beginnings to Mid-Nineteenth Century	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	HIST-2470	Aboriginal Peoples in Canadian History: Mid-Nineteenth Century to the Present	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	POLS-2000	Indigenous Policy and Constitutional Relationships	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	POLS-3000	Indigenous Treaties and Land Claims	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	POLS-4000	Indigenous Nation-Building: Traditional Governance in a Modern Era	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	ENGL-2320	Indigenous Literatures	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	PHIL-1350	Culture, Health, and Social Justice on Turtle Island	undergraduate	whole_course	colonial_harms_in_bioscience	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	PHIL-2300	Indigenous Philosophy of the Americas	undergraduate	whole_course	indigenous_knowledge_linked	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
41_a	faculty	PHIL-4260	Philosophy of Law	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	faculty	POLS-2010	Current Issues in Canadian Politics	undergraduate	whole_course	other	On the list of Indigenous Studies courses from which Honours Biochemistry students must take at least one (Winter 2027 calendar p. 548). Arts/Humanities/Social Sciences course; level coded 'faculty' because the course belongs to that faculty although the requirement sits in the Biochemistry program.	link
41_a	department	CHEM-1003	Alchemy to Chemistry: Science Through the Ages	undergraduate	whole_course	global_origins_of_science	Department course taught as history of chemistry; the calendar lists it among courses excluded from the major average and says it 'may be taken by science students for credit'. Not a required course.	link
41_a	faculty	BIOM-4560	Molecular Biotechnology	undergraduate	whole_course	research_ethics_and_data_governance	Biomedical Sciences course within the Biochemistry and Biomedical Sciences program family; whether it is required was not checked.	link
41_a	faculty	BIOM-1000	Biomedical Science Impacts of Society	undergraduate	whole_course	other	Calendar says it 'May not be used for credit as a Science Course in any Faculty of Science program'; recorded only as science-and-society content in the faculty.	link
43_a	department	CHEM 3P63	Indigenous Medicine and Medicinal Chemistry	undergraduate	whole_course	indigenous_knowledge_linked	Department of Chemistry course (Brock calendar snapshot labelled '2024-2025 Undergraduate Calendar - Chemistry'). Prerequisite CHEM 2P20. The page text does not list it as required in any Chemistry or Biochemistry program; it is recorded as an available course.	link
43_a	department	SCIS 1P50	Science in Society I	undergraduate	whole_course	other	Coordinated through the Department of Chemistry; 'for non-science majors'. No Indigenous wording.	link
43_a	department	SCIS 1P51	Science and Society II	undergraduate	whole_course	other	Coordinated through the Department of Chemistry; 'for non-science majors'. No Indigenous wording.	link
43_a	department	BIOL 2P95 / PHIL 2P95	Bioethics	undergraduate	whole_course	research_ethics_and_data_governance	Biological Sciences course (one of the two departments that offer Biochemistry); not confirmed as required for Biochemistry.	link
44_a	university	ICR (all undergraduate degrees)	Indigenous Course Requirement	not_stated	whole_course	indigenous_knowledge_linked	University degree regulation that applies to Biochemistry & Molecular Biology students ('students must satisfy the University degree requirements'). The program does not name a designated course: students choose any course on the Approved Indigenous Course List (current list has 39 entries across 100-400 levels; science-facing options include IESS 1001H and INDG/ERST/IESS 2601Y).	link
44_a	university	IESS-1001H	Foundations in Indigenous Environmental Studies and Science	undergraduate	whole_course	indigenous_knowledge_linked	On the current Approved Indigenous Course List (fetched 2026-10-05); Peterborough. Update to the wave-1 row, which used the 2019-2020 calendar.	link
44_a	university	INDG-2601Y (cross-listed ERST-2601Y, IESS-2601Y)	Indigenous Knowledge Systems and the Natural Environment	undergraduate	whole_course	indigenous_knowledge_linked	On the current Approved Indigenous Course List; Peterborough and Durham GTA.	link
44_a	university	INDG-2100Y	Introduction to Indigenous Knowledge	undergraduate	whole_course	indigenous_knowledge_linked	On the current Approved Indigenous Course List (title and designation read; description not quoted).	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
45_a	department	ICR in HBSc (Chemistry Major)	Indigenous Content Requirement met by any Type E course	undergraduate	whole_course	indigenous_knowledge_linked	Answer to 'which course does the chemistry/biochem program designate?': none by name. The HBSc Chemistry Major (and the Concentration in Medical Sciences) require 0.5 FCE from the calendar's 'Type E' (Indigenous Content) classification, chosen by the student at any year level. Lakehead has no stand-alone biochemistry program in the Chemistry program list; biochemistry is a specialty area (Chemistry page) and the Chemistry programs carry biochemistry courses.	link
45_a	faculty	Biology 3012	Indigenous Ethnobotany	undergraduate	whole_course	indigenous_knowledge_linked	Classified 'Type E: Indigenous Content'. The only Type E course found in the Chemistry, Biology, Applied Bio-Molecular Science, Bioinformatics and General Science course chapters. It is the course the calendar names for the Biology and Chemistry Major: 'This program fulfills the Indigenous Content Requirement by including Biology 3012.'	link
45_a	department	Chemistry 3210	Genes and Genomics	undergraduate	whole_course	research_ethics_and_data_governance	Chemistry-coded biochemistry course; ethics is one topic in a list.	link
45_a	faculty	Biology 2310	History of Biology	undergraduate	whole_course	global_origins_of_science	Biology course in the same faculty; relevance to Chemistry program not stated.	link
45_a	faculty	General Science 0251 / 0252	Basic General Science - Biological Sciences / Physical Science (Indigenous STEM Access Program)	not_stated	whole_course	indigenous_knowledge_linked; pedagogy_change	Restricted to students in the Indigenous Transition Year Program and the Indigenous STEM Access Program; not open to the chemistry program's general cohort. Recorded as Faculty of Science course design from 'Western and Indigenous worldviews'.	link
46_a	university	PHIL 2345E	Bioethics and Human Life	undergraduate	whole_course	research_ethics_and_data_governance	The Biochemistry program page says 'PHIL 2345E and SCOM 4006E are highly recommended as electives'; Philosophy course.	link
46_a	department	SCOM 1007E	Science Communication and Society	undergraduate	whole_course	other	School of Natural Sciences course; not stated as required for the Biochemistry program.	link
46_a	department	BIOL 3977E	Biodiversity and Conservation	undergraduate	whole_course	research_ethics_and_data_governance	School of Natural Sciences Biology course; 'conservation ethics' is one topic. Weak match recorded for completeness.	link
54_a	department	CHE-381 / 382 / 383 / 384	Senior Seminar I-IV	undergraduate	whole_course	other	The Chemistry General Major requires one of CHE-381/382/383/384; prerequisites mention the 'Biochemistry or Chemistry major'. Seminar on historical, theological, ethical and societal contexts of the discipline. No Indigenous wording.	link
54_a	faculty	SCI-310	History & Philosophy of Science	undergraduate	whole_course	global_origins_of_science	Listed as a cognate requirement for the Chemistry General Major ('Cognate Requirements: ENV-222; MAT-121; MAT-201 or 215; PHY-115 or 121; SCI-310'). Description frames science as Western.	link
54_a	university	Core Curriculum (ten courses)	Core outcomes: cultural diversity; Non-Western Perspectives; Local and Global Issues	not_stated	module_or_unit	other	University core curriculum applying to all degrees, including Chemistry. The 2026-27 calendar lists cultural-diversity learning outcomes and a 'Non-Western Perspectives' course area; Indigenous content is not named in the core description.	link
54_a	university	APS-255	Introduction to Indigenous Peoples in Canada	undergraduate	whole_course	indigenous_knowledge_linked	Applied Social Sciences course in the 2026-27 calendar. The pages read do not state that Chemistry majors must or may take it (no statement either way).	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
57_a	faculty	FMED 506	Indigenous Perspectives Decolonizing Health Research	undergraduate	whole_course	indigenous_knowledge_linked; colonial_harms_in_bioscience; research_ethics_and_data_governance	Faculty of Medicine and Health Sciences course (offered by Family Medicine), 3 credits per the catalogue; 'not offered this catalogue year'. Not listed in the BSc Biochemistry Major requirements or complementary lists (checked U1-U3 lists); no restriction visible on the course page. Supersedes wave-1 row that carried only a search-snippet title. Conflict: a search-result summary described it as one credit; the catalogue page says 3.	link
57_a	faculty	FMED 527	Inuit Health in the Circumpolar World	not_stated	whole_course	colonial_harms_in_bioscience; indigenous_knowledge_linked	Faculty of Medicine and Health Sciences course (Family Medicine), 3 credits, offered Winter 2027. Not listed in the Biochemistry Major. Description begins with Inuit presence and lifeways and covers 'examination of colonialism by European entities; transmission of infectious diseases and effects on Inuit health'; description truncated in my extraction after 'midwifery'.	link
57_a	university	INDG 200	Introduction to Indigenous Studies	undergraduate	whole_course	indigenous_knowledge_linked	Faculty of Arts course (Institute for Indigenous Research and Knowledges), 3 credits, offered Fall 2026; not listed in the Biochemistry Major. Part of the Indigenous Studies Minor Concentration, which the catalogue lists among minors available to B.Sc. students ('Indigenous Studies Minor Concentration (B.A. & Sc.)').	link
57_a	university	BTEC 502	Biotechnology Ethics and Society	undergraduate	whole_course	research_ethics_and_data_governance	Offered by Parasitology (Faculty of Agricultural and Environmental Sciences), 3 credits, U3 and over; not listed in the Biochemistry Major. Ethics-of-science / science-and-society content; no Indigenous content in the description.	link
58_a	department	BCM 3515	Éthique en biochimie	undergraduate	whole_course	research_ethics_and_data_governance	2-credit course in Bloc 01A 'Connaissances fondamentales en biochimie' (Obligatoire - 35 crédits) of the Baccalauréat en biochimie et médecine moléculaire (version A23). Applied-ethics course for biochemistry; description does not mention Indigenous peoples.	link
58_a	faculty	PHI 1130	Philosophie des sciences	undergraduate	whole_course	other	Listed in Bloc 01E 'Connaissances complémentaires' (Option, maximum 3 crédits) of the biochemistry bachelor; one of several outside-discipline options, so students may but need not take it. Same bloc lists POL 3235 Politiques scientifiques and SOL 3410 Technosciences, culture et société.	link
58_a	faculty	SOL 3410	Technosciences, culture et société	undergraduate	whole_course	other	Optional course in Bloc 01E of the biochemistry bachelor (see PHI 1130). Science-and-society content; no Indigenous content in the description.	link
58_a	faculty	POL 3235	Politiques scientifiques	undergraduate	whole_course	other	Optional course in Bloc 01E of the biochemistry bachelor (see PHI 1130). Science-policy content; no Indigenous content in the description.	link
59_a	faculty	CHM-3004	Éthique et gestion pour chimiste	undergraduate	whole_course	research_ethics_and_data_governance	1-credit required course (Cours obligatoires) of the Baccalauréat en biochimie; taught by the chemistry department (CHM code), so faculty-of-science level for biochemistry students. Professional/legal ethics; no Indigenous content in the description. The other new-looking required course BCM-1000 'Profession : biochimiste' is career-focused and carries no relevant content.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
60_a	faculty	SCI601	Éthique en sciences biomédicales	undergraduate	whole_course	research_ethics_and_data_governance	3-credit required course (tronc commun) of the Baccalauréat en biochimie de la santé (Faculté des sciences). The program's 'Éthique et responsabilité' learning target is to integrate ethics and the social responsibility of scientists. Topics include use of participants' data and research integrity; Indigenous research ethics are not mentioned in the course sheet.	link
60_a	department	BCM306	La biochimie dans la société : enjeux et opportunités	undergraduate	whole_course	other	1-credit required course (tronc commun) of the Baccalauréat en biochimie de la santé, run by the Programme de biochimie; 'science et société' content. No Indigenous content stated.	link
61_a	department	CHEM 209	Discovering Biotechnology	undergraduate	whole_course	research_ethics_and_data_governance	Department course for non-scientists; the calendar note says it may not be taken for credit by Biochemistry students, so it is not part of the program. Included only because it is a department course with an ethics component. No Indigenous content.	link
63_a	department	CHM1014	Aspects professionnels, éthique et sécurité	undergraduate	whole_course	research_ethics_and_data_governance	2-credit course shown in year 2, winter, of the Baccalauréat en biochimie et biotechnologie (cheminement 7608, version 2026-3) grid. Title only; the catalogue description could not be fetched (course page needed authentication), so content is unknown.	link
69_a	university	LIB 218	The History and Philosophy of Science	undergraduate	whole_course	global_origins_of_science; other	3-credit Liberal Arts course in the 'Skills and Perspectives Courses (3 courses)' list a B.Sc. Biochemistry student may choose from (offered outside the department). History-of-science content; no Indigenous content stated; 'taught two out of every three years'.	link
69_a	university	SOC 107	Indigenous and First Nations Peoples in Canada	undergraduate	whole_course	indigenous_knowledge_linked	Update of wave-1 row: description now read. Listed in the 'Skills and Perspectives' list for B.Sc. Biochemistry; offered by Sociology. The student chooses 3 courses from a list of about 25, so it is optional.	link
69_a	university	HIS 108	A Global History of Indigenous Peoples	undergraduate	whole_course	other; other	Update of wave-1 row: description now read. Optional in the same 'Skills and Perspectives' list; offered by History and Global Studies. Also an entry course of the Indigenous Studies minor.	link
72_a	faculty	FSCI3903	Pratique professionnelle	undergraduate	whole_course	research_ethics_and_data_governance; other	Required Faculty of Sciences course in the biochemistry major; generic professional/research ethics content. No Indigenous, decolonial or history-of-science wording in the description.	link
72_a	university	LING4400	Langues & cultures autochtones	undergraduate	whole_course	indigenous_knowledge_linked; naming_and_language	Listed in the general-education course bank (OFG2 'Ouverture à l'Autre et/ou internationalisation') from which biochemistry majors choose 3 credits if they do not take FSCI2013; not required and not a science course.	link
72_a	university	LING3100	Langue et colonialisme	undergraduate	whole_course	other; naming_and_language	General-education bank option (OFG2); colonialism content, not Indigenous-specific, not a science course; not required.	link
73_a	university	INDG 2881 / GENS 2881	Traditional Ecological Knowledge	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Indigenous Studies course cross-listed to a science code (GENS); a science course (BIOL 1001 or GENS 1401) is an accepted prerequisite, so science students are an anticipated audience. Not listed in the Biochemistry or Chemistry degree requirements read (calendar chapters Biochemistry.html, Chemistry.html), so elective at most.	link

ID	Level	Code	Title	Degree	Form	Approach	What it looks like	Source
73_a	university	INDG 3901 / SOCI 3901	Indigenous Research Ethics	undergraduate	whole_course	research_ethics_and_data_governance; indigenous_knowledge_linked	Indigenous Studies seminar; prerequisites are Indigenous/Canadian Studies courses, so not accessible to a biochemistry student without those; not required by the Chemistry/Biochemistry programs.	link
73_a	university	INDG 1001	Introduction to Indigenous Studies	undergraduate	whole_course	other; indigenous_knowledge_linked	Entry course of the Indigenous Studies minor and an accepted prerequisite for INDG 2881; not required by the Chemistry/Biochemistry programs.	link
76_a	faculty	BIOL 4003 / INDG 4003	Indigenous perspectives in conservation biology	undergraduate	whole_course	indigenous_knowledge_linked; colonial_harms_in_bioscience	Current-calendar entry for the course already recorded in wave 1 from a 2021 syllabus; Faculty of Science field course (application and permission required); not a biochemistry course and not in the BSc Biochemistry degree requirements read.	link
76_a	university	INDG 1000	Mi'kma'ki	undergraduate	whole_course	indigenous_knowledge_linked	Indigenous Studies introductory course open as an elective; not required by the biochemistry programs on the pages read; not a science course.	link
76_a	department	BIOC 3501	Introduction to Biotechnology	undergraduate	module_or_unit	other	Only unit-owned course (the BIOC entries linked from the department's course-descriptions page, BIOC 1420-8893, were read) whose description names history and responsibilities; no Indigenous, decolonial or reconciliation wording appears in any BIOC description. Evidence of the wording is thin (one list item each).	link
77_a	faculty	ENVS 3460	Indigenous Experience and Environmental Impact	undergraduate	whole_course	indigenous_knowledge_linked; colonial_harms_in_bioscience	Faculty of Science (Department of Environmental Science) elective; lists in the ENVS major; not required for Chemistry (CHEM 3473 Environmental Chemistry is cross-listed to ENVS 3473 but its description has no Indigenous content). The 2026-2027 calendar PDF returned 404; 2025-2026 PDF read.	link
79_a	department	PHIL 213; PHIL 333; SOCI 329 (suggested electives)	Philosophy of Science; Environmental Ethics; Climate Justice	undergraduate	whole_course	other	The department suggests (does not require) Arts electives with science-and-society and ethics content for the Sustainable Chemistry concentration. No Indigenous or decolonial wording on the page. Course descriptions for these Arts courses were not read.	link
80_a	faculty	PHIL 2221	Science & Society	undergraduate	whole_course	other	Required in every BSc Chemistry option (as an alternative to PHIL-2223). Taught by Philosophy (School of Arts and Social Sciences), not by Chemistry. Science-and-society content; no Indigenous wording in the description.	link
80_a	faculty	PHIL 2223	Technology & Society	undergraduate	whole_course	other	Alternative to PHIL 2221 for the 3-credit core requirement; ethics-of-technology content; no Indigenous wording.	link
80_a	university	MSIT 2101 / MSIT 2103	Int Sci & Ways of Knowing I / II	undergraduate	whole_course	indigenous_knowledge_linked; global_origins_of_science; pedagogy_change	Integrative Science (MSIT) series, each course written as paired 'Mi'kmaw world view' and 'Western science' sections. Usable as BSc electives and designated as science. Chemistry appears only in the list of sciences whose 'major questions' are discussed; no CHEM course description mentions MSIT, Two-Eyed Seeing or Etuaptmunk (all 108 CHEM catalogue entries scanned).	link
80_a	university	MSIT 1101, 3101, 4101 (and 1103, 3103, 4103)	Sense of Place, Emergence & Participation; Cycles & Holism; Wholeness	undergraduate	whole_course	indigenous_knowledge_linked; pedagogy_change	Rest of the MSIT 1000-4000 series, same paired structure; designated science per the calendar; BSc elective eligible.	link
80_a	faculty	BIOL 2505 / MSIT 2505; BIOL 2506	Ecosystems of Cape Breton; Biology of Mi'kmaq Seasons	undergraduate	whole_course	indigenous_knowledge_linked	Biology-coded courses with Mi'kmaw knowledge content; open to BSc students as 'Other Science' electives (a second science discipline from BIOL is a program requirement option). Not Chemistry courses.	link

sector	university	not_stated	Indigenous Science Course (development at Mount Royal University)	undergraduate	whole_course	indigenous_knowledge_linked	Peer-reviewed account by an Indigenous environmental scientist and recent graduate, a settler assistant professor and an Indigenous assistant professor (as the abstract self-describes) of developing the course and the 'hopes, complexities, tensions, and frustrations' encountered. Abstract only; full text not read.	link
sector	university	not_stated	Integrative Science undergraduate program (Cape Breton University) and Indigenous Environmental Studies program (Trent University)	undergraduate	not_stated	indigenous_knowledge_linked	Research article (Griffith University authors, 2009) on 'the practices and experiences of two Canadian programs' that embed Indigenous knowledge in tertiary science curriculum. Abstract read; the article is dated and describes programs rather than chemistry courses.	link
sector	university	Indigenous Course Requirement (ICR)	University of Winnipeg undergraduate Indigenous Course Requirement	undergraduate	whole_course	other	Mixed-methods study of select ICR courses' effect on non-Indigenous students' attitudes. Abstract via Crossref.	link
sector	university	not_stated	Indigenous Knowledge in the Curriculum (Lakehead University)	undergraduate	not_stated	indigenous_knowledge_linked	2015 news report of an initiative giving undergraduates at least one course incorporating Indigenous content by 2017; the vice provost is quoted on engineering (not chemistry). Current status not checked.	link
sector	faculty	not_stated	Enhanced Introductory College Chemistry (open textbook, Ontario colleges)	not_stated	not_stated	indigenous_knowledge_linked; pedagogy_change	Open textbook with a 'Commitment to Equity, Diversity, Inclusion and Indigenization in Chemistry' chapter, citing Two-Eyed Seeing/Etuaptmumk; says 'significantly more work is needed to truly decolonize science education'. Resource for college chemistry; college, not university.	link
sector	department	not_stated	Chemistry and Inuit Life and Culture (article series, Chem 13 News, University of Waterloo)	not_stated	not_stated	indigenous_knowledge_linked	Article series by a Memorial University (Grenfell) chemistry professor and an Inuk student from Nain, Nunatsiavut, explaining Inuit materials in terms of molecular structure; written for school chemistry and recommended by UBC Chemistry as a base for university modules. Not a university course.	link

Appendix D. Disagreement and criticism (Q9)

Rows about decolonization or Indigenization come first, then adjacent disputes (equity hiring and EDI statements; identity verification), then peripheral rows. Within each group, observed rows precede rows where the search found nothing ("none found") or could not be run ("not assessable"). Rows marked [SAFS family] are letters from one organization that share wording and argument. Eight rows set aside on counsel's advice are in the spreadsheet sheet `contention_excluded` with the reason for each.

12_a	decolonization / Indigenization	this_university	Franco-Albertan community concern about the university's Indigenous strategic plan	other	(paraphrase from fetch summary) operates to the detriment of their own history (news outlet's summary)	community_or_nation	news_report

ID	Q9 scope	Level	Topic	Direction	Claim (quoted)	Speaker	Standing
12_a	decolonization / Indigenization	this_university	Open letter of the president of the Association canadienne-française de l'Alberta (ACFA) on Campus Saint-Jean: consultation and reconciliation processes	process_or_consultation	par des démarches de réconciliation qui n'ont pas permis une participation suffisamment large de la communauté francophone albertaine, alors même que de nombreuses personnes et organisations de la francophonie albertaine sont engagées depuis plusieurs années dans des démarches de réconciliation et de rapprochement avec les communautés autochtones [our translation: through reconciliation processes that did not allow sufficiently broad participation by the Franco-Albertan community, even though many persons and organisations of the Franco-Albertan community have for several years been engaged in reconciliation and rapprochement with Indigenous communities]	community_or_nation	institutional_statement
12_a	decolonization / Indigenization	this_university	Open letter from two members of the Legislative Assembly of Alberta to the University President about a scheduled external speaker (January 2024)	other	We believe in the importance of preserving academic freedom as the bedrock of higher education insofar as it does not seek to unwind known truths, foment anger and animosity toward a particular group of people, or undermine the values of those same public institutions.	external_commentator	other
12_a	decolonization / Indigenization	this_university	Reply to the MLAs' letter: academic freedom and the right to hear a controversial speaker	overreach_ideological_or_coercive	your letter displays a fundamental misunderstanding of the academic endeavour and the nature of intellectual freedom itself.	external_commentator	union_or_association_state
14_a	decolonization / Indigenization	this_university	Petition to cancel a guest lecture by an external speaker whose views on residential schools conflicted with the University's stated commitment to the TRC Calls to Action (January 2023)	other	[petition, trimmed per counsel] ... endangers students' well-being and safety. (The petition's operative ask was that the lecture be cancelled; see the president's reply and the 2026 court ruling.)	not_stated	news_report
14_a	decolonization / Indigenization	this_university	Faculty association executive statement on the guest-lecture controversy: academic freedom and equity	other	Claims that equity and academic freedom are incompatible creates a false binary.	union_or_faculty_association	union_or_association_state
14_a	decolonization / Indigenization	this_university	Critique of the faculty association's statement and the lecture cancellation	overreach_ideological_or_coercive	The statement reveals serious misunderstandings of academic freedom and the academic mission of a university.	external_commentator	union_or_association_state
14_a	decolonization / Indigenization	this_university	Court of King's Bench review of the University's 2023 decision to cancel the lecture	other	fundamentally and fatally flawed	not_stated	news_report
16_a	decolonization / Indigenization	this_university	Dismissal of a tenured associate professor (December 2021) and the university's statement on academic freedom; the professor had published criticism of Indigenization initiatives (no causal link asserted here; see the 2024 arbitration row)	overreach_ideological_or_coercive	In Widdowson's view, initiatives to "indigenize" university curricula dishonour the scientific method.	faculty	news_report

ID	Q9 scope	Level	Topic	Direction	Claim (quoted)	Speaker	Standing
16_a	decolonization / Indigenization	this_university	Arbitration outcome on the dismissal: faculty association and university positions	process_or_consultation	The firing of a Calgary tenured professor ... was disproportionate, even if her conduct did warrant discipline, an arbitrator has ruled.	union_or_faculty_association	news_report
1_a	decolonization / Indigenization	this_university	Petition to the B.C. Supreme Court against UBC land acknowledgements and related diversity initiatives, filed April 7, 2025 by five UBC affiliates (faculty members and one graduate student, per the report)	overreach_ideological_or_coercive	have adverse effects on their academic freedom (petition wording as quoted by the news report; the report also says they cite "free inquiry, discussion, lecture and debate")	faculty	news_report
1_a	decolonization / Indigenization	this_university	Response to the April 2025 petition against land acknowledgements	other	It is an acknowledgment of historical truths and legal realities. Attempts to silence these acknowledgments are attempts to erase sylix Okanagan presence and rights.	community_or_nation	news_report
1_a	decolonization / Indigenization	this_university	FNHL open letter concerning public denial statements (responding to public statements questioning Indigenous rights, title and residential-school history, and to criticism of equity, diversity and inclusion efforts)	other	Acknowledging unceded Indigenous territories and the findings of the Truth and Reconciliation Commission is not an act of charity or opinion — it is a recognition of fact.	faculty	institutional_statement
1_a	decolonization / Indigenization	this_university	Open letter of Westbank First Nation responding to the April 2025 B.C. Supreme Court petition against UBC	other	their claims veiled under the banner of "academic freedom" are, in fact, a thinly disguised attempt to perpetuate harmful rhetoric rooted in racism, bigotry, and historical denialism.	community_or_nation	institutional_statement
1_a	decolonization / Indigenization	this_university	Petitioners' stated purpose: defend academic freedom and secure compliance with s. 66 of the University Act (April 2025 petition); letter clarifying that the petition is not aimed at Indigenous rights	overreach_ideological_or_coercive	The purpose of the Petition is to defend the academic freedom of students, professors and other members of the University community and to ensure the University's full compliance of s.66 of BC's University Act.	external_commentator	other
1_a	decolonization / Indigenization	this_university	Institutional neutrality and academic freedom, as argued by counsel for the petitioners in response to a civil-liberties critique of the petition	overreach_ideological_or_coercive	It's widely recognized that institutional neutrality is a necessary precondition for academic freedom	external_commentator	news_report
1_a	decolonization / Indigenization	this_university	Civil-liberties critique of the April 2025 petition against UBC land acknowledgements, DEI statements and related positions	other	We disagree with the interpretation of the University Act advanced by the petitioners and raise alarm at a lawsuit that considers diversity, equity and inclusion values, land acknowledgments, and faculty statements of solidarity to be inconsistent with civil liberties.	external_commentator	news_report
1_a	decolonization / Indigenization	this_university	BCCLA notice of application to intervene in the petition (s. 66 'non-political in principle')	other	In order to provide instruction in all branches of knowledge, the University must necessarily create an environment in which scholars of all backgrounds, representing a diverse array of fields of knowledge and expertise, can work, debate, deliberate, and flourish.	external_commentator	legal_or_tribunal_documer

ID	Q9 scope	Level	Topic	Direction	Claim (quoted)	Speaker	Standing
1_a	decolonization / Indigenization	this_university	Students' open letter on UBC statements about the death of Queen Elizabeth II and reconciliation commitments (School of Social Work)	insufficient_tokenistic_or_performative	the university's statements "completely contradict" claims and initiatives toward reconciliation and decolonization (reporter's rendering of a student's email; the words in quotation marks are verbatim)	student_or_student_group	news_report
23	decolonization / Indigenization	this_university	Faculty association's concern about the pace of Indigenization at the university and the experience of Indigenous faculty	insufficient_tokenistic_or_performative	However, the experiences of the Association and its members do not show a commitment to action on reconciliation and Indigenization.	union_or_faculty_association	union_or_association_state
23	decolonization / Indigenization	this_university	Indigenous Students' Council boycott of university reconciliation and Indigenization talks (2018)	process_or_consultation	One of the things Indigenous people have never given up is self-determination,	student_or_student_group	news_report
23	decolonization / Indigenization	this_university	Implementation of mandatory Indigenous content: who teaches it and to what standard (2017)	insufficient_tokenistic_or_performative	"It's not just 'add Indigenous and stir,' ... 'It's a world view and it takes a long time to learn how to do it respectfully, even for those of us that are Indigenous.'"	faculty	news_report
23	decolonization / Indigenization	this_university	Opposition to mandatory Indigenous content, as relayed by a university administrator (2017)	overreach_ideological_or_coercive	[The vice-provost] also noted there are also those who oppose indigenization. Some professors argue that for everything that's added to the curriculum, something has to be taken out. Some students say Indigenous studies aren't relevant to their field of study.	administration	news_report
24	decolonization / Indigenization	this_university	Consultation with Indigenous communities and academic freedom: faculty open letter after the Woodrow Lloyd lecture controversy (2020)	process_or_consultation	The administration was warned by multiple different constituencies who are part of and connected to Indigenous communities about the real harm that the lecture would cause	faculty	news_report
24	decolonization / Indigenization	this_university	Call for an apology to the Indigenous community after the Woodrow Lloyd lecture controversy (2020)	process_or_consultation	An apology is not only warranted, it's expected	external_commentator	op_ed
26_a	decolonization / Indigenization	this_university	Students' group statement on the university's response to anti-Indigenous racism (2018)	insufficient_tokenistic_or_performative	From the utter disregard and disdain of the only Indigenous administrator, to the blatant disrespect for the safety and security of Indigenous students, it is no secret that the University of Manitoba does not give concern to issues that affect Indigenous people who are working for or enrolled in the institution	student_or_student_group	news_report
26_a	decolonization / Indigenization	sector_wide	Whether Indigenous knowledge, including 'indigenous science', can be openly questioned in universities (2017)	overreach_ideological_or_coercive	But the appearance of indigenous science has raised more concerns. This is because science is supposed to be a discipline in which all truth claims are open to experimental refutation.	faculty	op_ed
26_a	decolonization / Indigenization	this_university	Replacement of art works in the university's collection described as 'decolonizing' (2024)	overreach_ideological_or_coercive	What does an institution of higher learning do when it has a "problematic" collection of paintings and sculptures? Answer: It "decolonizes" them.	external_commentator	blog_or_personal

ID	Q9 scope	Level	Topic	Direction	Claim (quoted)	Speaker	Standing
27	decolonization / Indigenization	sector_wide	Mandatory Indigenous course requirements (University of Winnipeg and Lakehead named): risk of box-ticking (2016)	insufficient_tokenistic_or_performative	If it's not done properly... people who walk out of these courses will be able to sort of wash their hands and say oh, I took an indigenous studies course and be able to just kind of say whatever they want after that, and not really understand the knowledge that's been given to them.	student_or_student_group	news_report
27	decolonization / Indigenization	sector_wide	Indigenous content requirements (Winnipeg and Lakehead named): implementation and funding (2016, republished 2019)	resources_or_workload	Without a firm commitment and careful implementation —backed up with the requisite funding—we risk further entrenching the kind of colonial relationship we're now supposedly committed to transforming.	faculty	other
28	decolonization / Indigenization	this_university	Proposed mandatory Indigenous course: effect on course choice and time to degree (2016)	resources_or_workload	If it was taking away a course slot ... it would take longer to get through the courses that I actually had to or wanted,	student_or_student_group	news_report
2_a	decolonization / Indigenization	this_faculty	Faculty of Science Indigenous Science Scholar job posting (cross-posted to six departments including Biochemistry & Microbiology)	definitional_disagreement	there are no "indigenous ways of knowing" beyond the ways that modern science "knows" things	external_commentator	blog_or_personal
2_a	decolonization / Indigenization	this_faculty	Faculty of Social Sciences / Psychology tenure-track posting limited to Indigenous Peoples and members of visible minorities (hiring policy, equity and reconciliation strategy)	overreach_ideological_or_coercive	Appointing scholars to academic positions according to race, ethnicity, or minority status is a violation of the merit principle, the principle that academic decisions should be made on academic grounds only.	external_commentator	union_or_association_stat
2_a	decolonization / Indigenization	this_university	Student group's letter: UVic's commitment to reconciliation versus lack of response to the Native Students Union	insufficient_tokenistic_or_performative	Seeing as how UVic knows how to talk the talk, you would think that they could walk the walk.	student_or_student_group	op_ed
31_a	decolonization / Indigenization	this_faculty	A student letter (#DanielsDoBetter2022) on the transition of the First Peoples Leadership Advisory role at the John H. Daniels Faculty of Architecture, Landscape, and Design, and the Faculty's joint statement about it	process_or_consultation	The letter was released by AVSSU and GALDSU with a perceived sense of urgency after the announced transition between the single First Peoples Leadership Advisory role and the incoming multiple First Peoples Leadership Advisors. This rushed posting meant that the letter was published without further consultation between the unions and the Faculty, or with other support structures at the University such as the Office of Indigenous Initiatives or First Nations House.	student_or_student_group	institutional_statement
32_a	decolonization / Indigenization	this_university	Targeted tenure-track search in Philosophy for 'Indigenous, Black and/or Racialized persons', with EDI commitment requested	overreach_ideological_or_coercive	Favouring candidates for academic positions on the basis of racial, ethnic or other group identity is a violation of the merit principle, the principle that academic decisions be made on academic grounds only.	external_commentator	union_or_association_stat

Appendix E. Territorial acknowledgements (recorded, not counted)

We recorded each territorial acknowledgement on the pages we read, with the nations named as the institution wrote them. We did not count an acknowledgement as an effort, and a desk survey cannot judge what action stands behind one. The level column says whether the department or the university wrote it. The University of Ottawa calls its statement an Indigenous Affirmation.

For thousands of years it has been the traditional land of the Huron-Wendat, the Seneca, and the Mississaugas of the Credit. Today, this meeting place is still the home to many Indigenous people from across Turtle Island and we are grateful to have the opportunity to work on this land.	link
32_a	department	Mississauga; Haudenosaunee	We recognize and acknowledge that McMaster University meets and learns on the traditional territories of the Mississauga and Haudenosaunee nations, and within the lands protected by the "Dish with One Spoon" wampum, an agreement amongst all allied Nations to peaceably share and care for the resources around the Great Lakes.	link
32_a	department	Mississauga; Haudenosaunee	McMaster University is located on the traditional territories of the Mississauga and Haudenosaunee nations, and within the lands protected by the "Dish with One Spoon" wampum agreement. We seek a new relationship with the original peoples of this land, one based in honour and deep respect. May we be guided by love and right action as we transform our personal and institutional relationships with our indigenous friends and neighbors.	link
33_a	department	Anishinaabek; Haudenosaunee; Lūnaapéewak	The Biochemistry Dept. acknowledges that Western University is located on the traditional lands of the Anishinaabek (Ah-nish'-in-a-bek), Haudenosaunee (Ho'-den-no-show-nee), and Lūnaapéewak (Len-ah'-pay-wuk) Nations, on lands connected with the Dish with One Spoon Covenant Wampum between the Anishinaabeg and Haudenosaunee and the London Township and Sombra Treaties of 1796. With this, we respect the longstanding relationships that Indigenous Nations have to this land, as they are the original caretakers. We acknowledge historical and ongoing injustices that Indigenous Peoples (First Nations, Métis, and Inuit) endure in Turtle Island (aka Canada), and we accept responsibility as a public institution to contribute toward revealing and correcting miseducation, as well as renewing respectful relationships with Indigenous communities through our teaching, research, and community service.	link
34_a	university	Algonquin	We pay respect to the Algonquin people, who are the traditional guardians of this land. We acknowledge their longstanding relationship with this territory, which remains unceded. We pay respect to all Indigenous people in this region, from all nations across Canada, who call Ottawa home. We acknowledge the traditional knowledge keepers, both young and old. And we honour their courageous leaders: past, present, and future.	link
38_a	department	Anishinaabek Nation; Haudenosaunee Confederacy; Huron-Wendat; Mississaugas of the Credit First Nation	We recognize that many Indigenous Nations have longstanding relationships with the territories upon which York University campuses are located that precede the establishment of York University. York University acknowledges its presence on the traditional territory of many Indigenous Nations. The area known as Tkaronto [Tig-ar-on-toe] has been care taken by the Anishinaabek [Nish-na-bek] Nation, the Haudenosaunee [Ho-dee-no-sho-nee] Confederacy, and the Huron-Wendat. It is now home to many First Nation, Inuit and Métis communities. We acknowledge the current treaty holders, the Mississaugas of the Credit First Nation. This territory is subject of the Dish with One Spoon Wampum Belt Covenant, an agreement to peaceably share and care for the Great Lakes region.	link
43_a	department	Haudenosaunee; Anishinaabe	We acknowledge the land on which Brock University was built is the traditional territory of the Haudenosaunee (ho-din-anish-shonee) and Anishinaabe (A-nish-shin-aaabee) people, many of whom continue to live and work here today. This territory is covered by the Upper Canada Treaties and is within the land protected by the Dish with One Spoon Wampum agreement. Today, this gathering place is home to many First Nations, Métis and Inuit, and acknowledging reminds us that our great standard of living is directly related to the resources and friendship of Indigenous people.	link
45_a	department	Fort William First Nation	Lakehead University respectfully acknowledges its campuses are located on the traditional lands of Indigenous Peoples. Lakehead Thunder Bay is located on the traditional lands of the Fort William First Nation, Signatory to the Robinson Superior Treaty of 1850	link
79_a	university	Mi'kmaw people	StFX espi-kina'matno'kuom etek Mi'kma'ki, wejkwataqanik Mi'kmaq maqamikewmuen mna'q iknmuetu'tik. Nalikitquniejik na Mi'kmawey wisun wjit Antigonish teluek Aklasie'w-iktuk, 'place where branches are torn off.' StFX is located in Mi'kma'ki, the uncended ancestral territory of the Mi'kmaw people. The Mi'kmaw name for Antigonish is Nalikitquniejik, meaning 'place where branches are torn off.'	link

Appendix F. Files

- Spreadsheet: `exp/1_survey/decolonization_biochem_survey_1.xlsx` (one sheet per table, a vocabulary sheet, the pilot second coding, and each batch's notes).
- Merged tables: `data/survey*_1.csv`. Raw agent output: `outputs/bookworm/batch*_1.json`. Survey design: `outputs/conscience/survey_design_1.md`. Reviews: `outputs/conscience/review_1.md`, `outputs/lawyer/contention_review_1.md`, `outputs/adversary/`.
- Figures and the script that draws them: `exp/1_survey/figures/`, `exp/1_survey/make_figures.py`.
- Part II: textbook inventory `data/textbooks_1.csv` and `data/textbooks_summary_1.csv` (also sheets in the version-2 spreadsheet); raw batches `outputs/bookworm/textbooks/`; Western course texts `outputs/bookworm/western_courses/`; legal memo `outputs/lawyer/textbooks_curricula_memo_1.md`; conscience reviews `outputs/conscience/western_courses_review_1.md` and `outputs/conscience/phase2_review_1.md`; adversary audit `outputs/adversary/report_audit_2.md`.

Appendix G. Internal working tables (not for circulation)

Internal. The tables below identify courses in a single named department. Under the legal memo (section 16) and the conscience's review, they are not to be circulated beyond the PI, or published, until each instructor has seen their row and given written consent, or the rows are removed. The PI may consent for BIOCHEM 4450A and MEDSCI 3391A, which he teaches.

G.1 Western biochemistry courses, one row per course (conscience review, 2026-10-05)

The two outlines with a three-Nation acknowledgement (finding F1 in section 17) are BIOCHEM 2280A (fall) and BIOCHEM 4986Y; the four-Nation wording to reuse is in BIOCHEM 3381A.

Code	Title	Yr	Source	What is observed (quoted)	Approach	Observation
BIOCHEM 2280A	Biochemistry and Molecular Biology	2	Full (Fall + Summer 2026)	Fall: EDID; LA3 (" <i>Anishinaabek, Haudenosaunee, and Lūnaapéewak</i> "); outcome " <i>Reflect on the nature of science and the identities of scientists</i> "; four reflections on " <i>the types of people who do science</i> " and " <i>science as a way of knowing</i> ". Required text: Pratt & Cornely, <i>Essential Biochemistry</i> 5e. ACC, TRD. Summer: DIV only, no acknowledgement	OT (reflections on who does science); UC not assessable (which scientists is not published)	The only outline with a learning outcome about who does science. Its acknowledgement omits Chonnonton (F1)
BIOCHEM 2288A	Biochem. & Mol. Bio. for Foods and Nutrition	2	Full	DIV; no acknowledgement; " <i>Links to Food Science and Nutrition will be emphasized throughout</i> "; topic " <i>Enzyme Kinetics</i> ". Required text: Pratt & Cornely. ACC, TRD	—	No decolonial content on the outline
BIOCHEM 3380G	Biochemistry Laboratory	3	Description only (department's 2023 outline link returned 404)	" <i>basic methods in biochemistry and molecular biology</i> "	—	Coverage note
BIOCHEM 3381A	Protein Structure and Enzyme Function	3	Full	LA4 with " <i>we accept responsibility as a public institution to contribute toward revealing and correcting miseducation</i> "; EDID; DIV; ACC; TRD. Optional texts: Garrett et al., <i>Biochemistry</i> , 1st Canadian ed. (Nelson 2013); Hofmann	—	The fullest acknowledgement found; the outline names no contributor to enzyme kinetics
BIOCHEM 3382A	Biochemical Regulation	3	Full	LA4; DIV; ACC; TRD; no required text	—	No decolonial content on the outline
BIOCHEM 3383F/G	Introduction to Biochemical Research	3	Full	LA4; DIV; ACC; TRD	—	Research-project course
BIOCHEM 3385B	Human Biochemistry	3	Description only	" <i>biochemical and molecular aspects of the human condition... in a clinical-case-oriented fashion</i> "	—	Cases are not published, so their selection is not assessable
BIOCHEM 3386B	Clinical Biochemistry	3	Description only	" <i>select, evaluate and interpret tests for clinical diseases</i> "	—	Coverage note
BIOCHEM 3390B	Advanced Methods for Biochemistry	3	Description only	" <i>the mining of biochemical databases</i> "	—	Coverage note
BIOCHEM 3392F/G	Synthetic Biology: Principles and Practice	3	Description only	" <i>design and model regulated biological circuits</i> "	—	Coverage note
MEDSCI 3391A	Truth and Lies in Biomedical Big Data	3	Full (required in two Biochemistry modules)	LA4 plus " <i>We encourage all students and faculty to consider historical and ongoing decisions that enable them to have the privilege of attending / teaching this course while others do not enjoy that opportunity.</i> " Lectures " <i>Accessing & managing biomedical data</i> ", " <i>Biases & Errors</i> ", " <i>Ethics in AI</i> "; theme " <i>open science, data-sharing</i> ". ACC, TRD	OT (positionality prompt); RE-gen	The only acknowledgement that asks students to reflect on their own position. The PI teaches here
BIOCHEM 4320F/G	Synthetic Biology and Philosophy	4	Description only	" <i>What are the ethical dimensions of creating genetic novelty in various contexts?</i> "	RE-gen	Cross-listed with Philosophy
BIOCHEM 4405A/B	Design and Delivery of Personalized Genetic Medicine	4	Description only (not offered until Winter 2028, per bookworm)	" <i>Case-based studies highlight clinical successes, limitations</i> "	—	Coverage note
BIOCHEM 4410A	Molecular Biology of DNA and RNA	4	Full	LA4; ACC; TRD; outcome " <i>discuss advantages and limitations of therapeutic gene editing to the lay public including technical and ethical concerns</i> "; " <i>Gene editing in the real world</i> "	RE-gen	No decolonial content on the outline
BIOCHEM 4415B	Applications of Synthetic Biology and Chemical Genetics in Medicine	4	Description only	" <i>metabolic pathways are currently being re-engineered in microorganisms to produce drugs</i> "	—	Coverage note
BIOCHEM 4420A	Molecular Biology of Proteins	4	Full	LA4; ACC; TRD; three recommended books (Kuriyan, Konforti & Wemmer; Williamson; Almeida)	—	No decolonial content on the outline
BIOCHEM 4425B	Proteomics and Metabolomics	4	Description only	" <i>sample preparation and collection</i> "	—	Coverage note
BIOCHEM 4450A	Molecular Genetics of Human Cancer	4	Full	LA4; ACC; TRD; required text Weinberg, <i>The Biology of Cancer</i> 3e; topic " <i>Cancer Genetics</i> "	NL (S): the resources record eponyms in Weinberg ch. 1–4; how the course treats them is not published	The PI teaches here. The resources cite an earlier EDID review of this course, which I have not read
BIOCHEM 4955E	Community-Engaged Learning ... Translational Cancer Biology	4	Full	No acknowledgement, no DIV. Lecture " <i>EDID in Research</i> "; tutorial " <i>Cancer & Underserved Populations</i> "; outcome " <i>Articulate the intersectionality between biochemical, pathophysiological, epidemiological, and psychosocial determinants</i> "; work " <i>with community partners</i> " (not named). AI statement: knowledge bases are " <i>western-centric</i> ", which can result in misrepresentation, silencing or erasing of cultures, histories, and ways of knowing	OT (EDID-in-research session); CH not assessable (session content not published)	The only outline that names Western-centric knowledge as a harm

Code	Title	Yr	Source	What is observed (quoted)	Approach	Observation
BIOCHEM 4984E	Biotechnology Innovation Studio	4	Full	LA4; DIV; ACC; TRD; required modules <i>"Building Inclusivity through Anti-Racism"</i> , <i>"AODA - Accessibility in Service"</i> ; projects show <i>"how the biotechnology... will integrate into society"</i>	OT (anti-racism training)	No decolonial content on the outline
BIOCHEM 4985E	Research Project and Seminar	4	Full (cross-listed with MICROIMM, ANATCELL)	LA4; ACC; TRD; same required modules; outcome <i>"adhering to ethical research practices"</i>	OT; RE-gen	No decolonial content on the outline
BIOCHEM 4986Y	Beyond the Bench	4	Full (cross-listed; coordinated from MICROIMM)	LA3; ACC; TRD; lecture <i>"Equity, Diversity, and Inclusion in Research"</i> ; <i>"Research Data and Integrity"</i> ; outcome <i>"apply ethical principles in research, including human and animal ethics, data integrity"</i>	RE-gen; OT (EDI session)	Acknowledgement omits Chonnonton (F1)
BIOCHEM 4999E	Advanced Research in Biochemistry	4	Full	LA4; DIV; ACC; TRD; workshops incl. <i>"bioethics"</i> ; <i>"Research Ethics/Integrity Online Modules"</i>	RE-gen	No decolonial content on the outline
BIOCHEM 9501	Scientific Writing	Grad	Description only	<i>"Mechanics and style of writing... word usage"</i>	—	Coverage note
BIOCHEM 9510	Protein Structure Determination (NMR)	Grad	Description only	<i>"validate structures in the Protein Data Bank"</i>	—	Coverage note
BIOCHEM 9511	Systems and Synthetic Biology	Grad	Description only	<i>"Human Genome Project—Write... DNA editing (including CRISPR), and ethics"</i>	RE-gen	Coverage note
BIOCHEM 9516	Cancer Biology (Precision Oncology)	Grad	Description only	<i>"molecular-targeted therapies for precision cancer medicine"</i>	—	Coverage note
BIOCHEM 9549	High-Throughput Transcriptomics	Grad	Description only	<i>"access to publicly available data"</i>	—	Coverage note
BIOCHEM 9552	Quantitative Approaches in the Biomedical Sciences	Grad	Description only	<i>"programming, software development... machine learning"</i>	—	Coverage note
BIOCHEM 9703	Chemical Biology	Grad	Description only	<i>"chemical-genetic approaches to drug discovery"</i>	—	Coverage note
MEDSCI 9506	Data Science	Grad	Description only	<i>"the ethical and legal implications of data privacy, security, and storage in the context of big data, artificial intelligence, and open science"</i>	RE-gen	Coverage note

G.2 Western biochemistry courses: proposals by year of study (conscience design, provisional; two rows annotated after the adversary's audit)

Year / course	Suggestion	Type	Rests on	Alone or consult
Yr 2: 2288A (fermentation, foods)	One lecture segment on fermentation and food biochemistry as practised for millennia across many cultures, not only in the modern lab	GO	(R, d5: <i>description; Evolution of Food Fermentation Processes, MDPI; Traditional ancient Egyptian medicine review</i>)	Alone, for non-Indigenous examples. Consult OII before adding any Indigenous food practice
Yr 2: 2280A, 2288A (enzyme topics); Yr 3: 3381A	Name Maud Menten where enzyme kinetics is taught, and link the department's existing Menten biography and lecture series	UC	(R, d5: <i>Canadian Medical Hall of Fame; Dictionary of Canadian Biography [from CA]; Menten Lecture Series [from UW0]</i>)	Alone
Yr 2: 2280A reflections	Keep the scientist reflections. Draw some profiles from the ASBMB history of Black scientists, and publish the list on the outline so the outcome is checkable	UC, PC	(R, d3: <i>Scientist Spotlight, CBE-LSE; d5: ASBMB PDF</i>)	Alone
Yr 3: 3385B, 3386B (human, clinical)	One case on whose bodies set "normal" ranges and variant interpretation. Report race and ethnicity per JAMA guidance	CH	(R, d3: <i>GWAS Diversity Monitor, germline only; Middle Eastern variation paper, peer-reviewed; South Asian and TCGA preprints, provisional; d2: Flanagan et al. 2021, JAMA</i>)	Alone. If a case uses First Nations, Inuit or Métis data: consult, see RE row
Yr 3: MEDSCI 3391A ("Accessing & managing biomedical data"; "Biases & Errors")	Put OCAP® and TCPS 2 Chapter 9 beside "open science"	RE, CH	(R, d3: <i>FNIGC OCAP® [voice]; TCPS 2 Ch. 9 [binds CA]; GWAS Diversity Monitor</i>)	Course coordinator (MEDSCI). Teaching the principles needs no consultation; OCAP® covers First Nations, and Inuit and Métis frameworks are a gap (§6)
Yr 4: 4450A (Weinberg)	One session on eponyms: whom a name credits and whom it leaves out (Wilms, Barrett), with Hodgkin/Wilks and Kaplan–Meier as counter-examples. Burkitt's fieldwork under colonial-era hospital networks [adversary audit: the resources record this context only, with no published critique found, and the Wilms/Barrett sources are abstract-only; tag CH withdrawn, NL stands]	NL	(R, d2: <i>Weinberg eponym entries; Chala et al. 2024, PNAS; Fargen & Hoh 2014, abstract only</i>)	Alone. First read the earlier 4450A review the resources cite
Yr 4: 4450A, 4955E ("Cancer & Underserved Populations")	When First Nations cancer data is discussed, use the co-produced Chiefs of Ontario / ICES report and its governance as the model. Cite its findings as that report's	RE, CH	(R, d3: <i>Cancer in First Nations People in Ontario [voice] [from CA-ON]; Indigenous Cancer Care Unit [from CA-ON]</i>)	Consult for anything beyond citing the report. For Inuit data the resources say to contact Inuit Tapiriit Kanatami, not to search
Yr 4: 4955E (community partners)	If any partner is an Indigenous organization, plan the project with Western's research allyship guide	RE, PC	(R, d4: <i>Western Research Allyship Guide [binds UW0]</i>)	Consult the partner and OII. [AUTHOR TO CONFIRM: who the partners are]
Yr 4: 4415B (drugs from engineered pathways)	A segment on where natural-product leads came from, and on misappropriation of Indigenous knowledge [adversary audit: the cited sources do not cover bioprospecting; marked no-source and routed to the bookworm]	CH, IK (no-source)	(R, d3: <i>Bees and Indigenous sovereignty, FACETS; d5: Popp 2018 [voice] for one Anishinaabe scientist's account</i>)	Consult OII before teaching any specific Nation's knowledge. Never teach it from third-party sources

Year / course	Suggestion	Type	Rests on	Alone or consult
Yr 4: 4320F/G (philosophy)	A reading on cognitive justice, and Two-Eyed Seeing with its origin named	IK	(R, d3: <i>Visvanathan 2009; d4: Two-Eyed Seeing [from CA] [voice]</i>)	Philosophy and Biochemistry together. Name Elders Albert and Mordena Marshall of Eskasoni First Nation; it is <i>linking</i> , and its originators caution against "a merging of knowledges" (Roher et al. 2021)
Yr 4: 4984E, 4985E, 4986Y, 4999E (ethics sessions)	Add TCPS 2 Chapter 9 and OCAP® to the existing ethics and EDI-in-research sessions	RE	(R, d3: <i>TCPS 2 Ch. 9 [binds CA]; OCAP® [voice]</i>)	4999E alone; the others need the partner departments
Graduate: 9506, 9549, 9552, 9516	Indigenous data governance where public and clinical data are taught; ancestry composition of the datasets used	RE, CH	as the MEDSCI 3391A row	Graduate program committee
Graduate: 9501 (writing); 9552 (code)	Militarized metaphors in scientific prose; SAGER and JAMA reporting standards; replace master/slave and whitelist in code	NL	(R, d2: <i>Almendingen 2025; Mohapatra et al. 2026, preprint; Knodel & ten Oever, IETF; d1: SAGER</i>)	Alone

G.3 Courses in the textbook inventory for which no public page names a text

University	Course	Title	Year	Note
Simon Fraser University	BISC 102 †	General Biology	1	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/bisc/102/d100 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline lists materials but names no textbook.
Simon Fraser University	CHEM 126 †	General Chemistry Laboratory II	1	Outline term 2026/fall section LA03; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/chem/126/la03 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline lists materials but names no textbook.
Simon Fraser University	MBB 110 †	Data Analysis for Molecular Biology and Biochemistry	1	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/110/d100 . Outline lists no required text.
Simon Fraser University	BISC 202 †	Genetics	2	Outline term 2026/summer section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/summer/bisc/202/d100 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline states no textbook / journal articles only.
Simon Fraser University	CHEM 216 †	Introduction to Analytical Chemistry Laboratory	2	Outline term 2026/fall section LA01; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/chem/216/la01 . Outline lists materials but names no textbook.
Simon Fraser University	MBB 229 †	Introductory Molecular Biology and Biochemistry Laboratory	2	Outline term 2026/fall section LA01; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/229/la01 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline lists no required text.
Simon Fraser University	HSCI 321 †	Human Pathophysiology	3	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/hsci/321/d100 . Outline lists no required text.
Simon Fraser University	HSCI 324 †	Human Population Genetics and Evolution	3	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/hsci/324/d100 . Outline lists no required text.
Simon Fraser University	MBB 304 †	Introduction to Cells and Disease	3	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/304/d100 . Outline lists no required text.
Simon Fraser University	MBB 308 †	Molecular Biology Laboratory	3	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/308/d100 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline lists no required text.
Simon Fraser University	MBB 309W †	Biochemistry Laboratory	3	Outline term 2026/summer section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/summer/mbb/309w/d100 . Course is required in the MBB Major per calendar: https://www.sfu.ca/students/calendar/2026/fall/programs/molecular-biology-and-biochemistry/major/bachelor-of-science.html Outline lists no required text.
Simon Fraser University	MBB 342 †	Introductory Genomics and Bioinformatics	3	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/342/d100 . Outline lists no required text.
Simon Fraser University	HSCI 440 †	Cell Pathophysiology Laboratory	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/hsci/440/d100 . Outline states no textbook / journal articles only.
Simon Fraser University	HSCI 441 †	Virology Laboratory	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/hsci/441/d100 . Outline states no textbook / journal articles only.
Simon Fraser University	MBB 402 †	Cell Signalling in Development and Disease	4	Outline term 2025/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2025/fall/mbb/402/d100 . Outline lists no required text.

University	Course	Title	Year	Note
Simon Fraser University	MBB 421 †	Nucleic Acids and Biotechnology	4	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/421/d100 . Outline lists no required text.
Simon Fraser University	MBB 423 †	Proteins in Human Health	4	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/423/d100 . Outline lists no required text.
Simon Fraser University	MBB 427 †	Immune Responses in Health and Disease	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/mbb/427/d100 . Outline lists materials but names no textbook.
Simon Fraser University	MBB 430 †	Mechanisms of Secretory Transport	4	Outline term 2025/summer section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2025/summer/mbb/430/d100 . Outline lists no required text.
Simon Fraser University	MBB 438 †	Human Molecular Genetics	4	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/438/d100 . Outline lists no required text.
Simon Fraser University	MBB 441 †	Bioinformatics	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/mbb/441/d100 . Outline lists no required text.
Simon Fraser University	MBB 443 †	Protein Biogenesis and Degradation	4	Outline term 2026/summer section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/summer/mbb/443/d100 . Outline states no textbook / journal articles only.
Simon Fraser University	MBB 446 †	The Molecular Biology of Cancer	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/mbb/446/d100 . Outline lists materials but names no textbook.
Simon Fraser University	MBB 447 †	Stem Cells - Current Trends	4	Outline term 2026/spring section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/mbb/447/d100 . Outline lists no required text.
Simon Fraser University	MBB 448 †	Cancer Immunology	4	Outline term 2025/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2025/fall/mbb/448/d100 . Outline lists materials but names no textbook.
Simon Fraser University	MBB 463 †	Forensic Genomics	4	Outline term 2026/summer section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/summer/mbb/463/d100 . Outline states no textbook / journal articles only.
Simon Fraser University	MBB 465 †	Cancer Genomics	4	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/465/d100 . Outline lists no required text.
Simon Fraser University	MBB 478 †	Seminar in Molecular Epidemiology of Infectious Diseases	4	Outline term 2026/fall section D100; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/fall/mbb/478/d100 . Outline lists materials but names no textbook.
Simon Fraser University	MBB 505	Problem Based Learning in Bioinformatics	graduate	Outline term 2026/spring section G200; data via https://www.sfu.ca/bin/wcm/course-outlines?2026/spring/mbb/505/g200 . Outline states no textbook / journal articles only.

University	Course	Title	Year	Note
University of Saskatchewan	BMSC 210	Microbiology	2	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Core course for BMIS (Biochemistry, Microbiology and Immunology) major; guidebook: https://medicine.usask.ca/documents/biomedicalsciencesguidebook.pdf
University of Saskatchewan	BMSC 220	Cell Biology	2	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Core course for BMIS (Biochemistry, Microbiology and Immunology) major; guidebook: https://medicine.usask.ca/documents/biomedicalsciencesguidebook.pdf
University of Saskatchewan	BMSC 230	Metabolism	2	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Core course for BMIS (Biochemistry, Microbiology and Immunology) major; guidebook: https://medicine.usask.ca/documents/biomedicalsciencesguidebook.pdf
University of Saskatchewan	BMSC 240	Laboratory Techniques	2	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Core course for BMIS (Biochemistry, Microbiology and Immunology) major; guidebook: https://medicine.usask.ca/documents/biomedicalsciencesguidebook.pdf
University of Saskatchewan	BMIS 308	An Introduction to Microbial Pathogens	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 310	Proteins and Enzymes	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 317	Introductory Virology	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 321	Fundamentals of Immunology	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 325	Fundamentals of Bacteriology	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 340	Introductory Molecular Biology	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.

University	Course	Title	Year	Note
University of Saskatchewan	BMIS 390	Experimental Microbiology and Immunology	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMSC 320	Nucleic Acids From Central Dogma to Human Disease	3	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 412	Methods for Engineering Designer Proteins	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 423	Advanced Immunology	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 430	Biochemistry of Cancer	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 435	Human Metabolism and Disease	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 436	Advanced Molecular Biology	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 455	Mechanisms of Protein Function	4	Course catalogue page lists a Syllabi table whose entries link to Canvas (usask.instructure.com) syllabus PDFs that require NSID login (download returned a login 'Stale Request' page); shop.usask.ca CourseSearch returned 'No courses or course materials found' for the course (several term codes tried). Text not publicly readable. Requirement status from the BMIS program grid in the guidebook (BMSC 320/BMIS 340/BMIS 310 appear in the required block; others in elective lists); year inferred from course number.
University of Saskatchewan	BMIS 800	Science Communication in Biochemistry Microbiology Immunology	graduate	Graduate course of the BMI department; catalogue page names no text; syllabi (if any) behind Canvas login.
University of Saskatchewan	BMIS 812	Protein Structure Function and Engineering	graduate	Graduate course of the BMI department; catalogue page names no text; syllabi (if any) behind Canvas login.
University of Saskatchewan	BMIS 821	Principles of Immunology	graduate	Graduate course of the BMI department; catalogue page names no text; syllabi (if any) behind Canvas login.
University of Saskatchewan	BMIS 830	Advanced Topics in the Biochemistry of Cancer	graduate	Graduate course of the BMI department; catalogue page names no text; syllabi (if any) behind Canvas login.
University of Saskatchewan	BMIS 836	Advanced Nucleic Acids	graduate	Graduate course of the BMI department; catalogue page names no text; syllabi (if any) behind Canvas login.
Canadian Mennonite University	BIOL-1310 †	Cells and Energy	1	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).

University	Course	Title	Year	Note
Canadian Mennonite University	CHEM-1010 †	Structure and Modelling in Chemistry	1	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	CHEM-1020 †	Physical Chemistry	1	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	BIOL-2100 †	Genetics of Eukaryotes and Bacteria	2	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	BIOL-2200 †	Microbiology	2	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	CHEM-2010 †	Organic Chemistry I: Structure and Function	2	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	CHEM-2020 †	Organic Chemistry II: Reactivity and Synthesis	2	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	CHEM-2110 †	Biochemistry I: Biomolecules and Metabolic Energy	2	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
Canadian Mennonite University	CHEM-3110 †	Biochemistry II: Catabolism, Synthesis, and Metabolic Pathways	3	CMU Academic Calendar 2025/26 (PDF) names no textbooks; cmu.ca/bookstore is behind a Cloudflare challenge (403); no syllabi public. Year inferred from course number. Biochemistry is a Sciences-concentration option (36 cr) within CMU's science degree rather than a stand-alone BSc. Required in the Biochemistry sciences-concentration option (calendar p.16).
University of Manitoba	CHEM 1100 †	Introductory Chemistry 1: Atomic and Molecular Structure and Energetics	1	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Requirement status from the Biochemistry B.Sc. Major course list (https://catalog.umanitoba.ca/undergraduate-studies/science/biochemistry/biochemistry-bsc-joint-major/); CHEM 4360 or 4620 is an either/or. Year inferred from course number.
University of Manitoba	CHEM 1110 †	Introductory Chemistry 2: Interaction, Reactivity, and Chemical Properties	1	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Requirement status from the Biochemistry B.Sc. Major course list (https://catalog.umanitoba.ca/undergraduate-studies/science/biochemistry/biochemistry-bsc-joint-major/); CHEM 4360 or 4620 is an either/or. Year inferred from course number.
University of Manitoba	MBIO 1010 †	Microbiology I	1	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Required in the joint Biochemistry B.Sc. Major (Microbiology list); taught by Microbiology, listed here because the Biochemistry BSc is jointly offered. Year inferred.
University of Manitoba	BGEN 2000 †	Medical Cell Biology	2	Calendar names no textbook; no BGEN course outlines found on the department page (umanitoba.ca/medicine/department-biochemistry-and-medical-genetics) or via search; bookstore blocked (Cloudflare 403); UMLearn login-only. Year inferred from course number.

University	Course	Title	Year	Note
University of Manitoba	CHEM 2100 †	Organic Chemistry 1: Foundations of Organic Chemistry	2	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Requirement status from the Biochemistry B.Sc. Major course list (https://catalog.umanitoba.ca/undergraduate-studies/science/biochemistry/biochemistry-bsc-joint-major/); CHEM 4360 or 4620 is an either/or. Year inferred from course number.
University of Manitoba	CHEM 2110 †	Organic Chemistry 2: Foundations of Organic Synthesis	2	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Requirement status from the Biochemistry B.Sc. Major course list (https://catalog.umanitoba.ca/undergraduate-studies/science/biochemistry/biochemistry-bsc-joint-major/); CHEM 4360 or 4620 is an either/or. Year inferred from course number.
University of Manitoba	CHEM 2700 †	Biochemistry 1: Biomolecules and an Introduction to Metabolic Energy	2	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Requirement status from the Biochemistry B.Sc. Major course list (https://catalog.umanitoba.ca/undergraduate-studies/science/biochemistry/biochemistry-bsc-joint-major/); CHEM 4360 or 4620 is an either/or. Year inferred from course number.
University of Manitoba	CHEM 2710 †	Biochemistry 2: Catabolism, Synthesis, and Information Pathways	2	Calendar (course-descriptions page) names no textbook. UM Bookstore (bookstore.umanitoba.ca/SelectTermDept) is behind a Cloudflare challenge (403 to scripted fetch and WebFetch). Current department outline PDFs under sci.umanitoba.ca/chemistry/wp-content/uploads no longer resolve (HTML shell returned; not in Wayback). UMLearn outlines are login-only. Laurentian University	NATS 3106E	Scientific Writing and Communication	3	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 3236E	Enzymology	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4206E	Applied Bioinformatics	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4207E	Advanced Cellular Biochemistry	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4217E	Biomembranes, Structure and Function	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4256E	Biochemistry of Diseases	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4286E	Environmental Biochemistry	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4287E	Biochemical Toxicology	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4297E	Biochemistry of the Immune System	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	CHMI 4446E	Drug Design and Development	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
Laurentian University	NATS 4005E / 4106E	Honours Thesis / Literature Review	4	Required in the BSc Specialization in Biochemistry per the program page. Laurentian course pages (laurentian.ca/academics/course/<code>) carry only a description; no outline, bookstore (bkstr.com JS app) or reserve listing readable. French-language pages not separately searched for texts.
McMaster University	BIOCHEM 1MM3 †	From Molecules to Medicine: Unlocking Biochemical Secrets in Health	1	2025/2026 outline (Winter 2026) read in full text; no textbook or required-materials statement found in it. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	NEXUS 2A03 †	Impact of Infectious Disease on Individuals and Society	2	2026/2027 outline states there is no textbook (readings posted on Avenue to Learn). Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.

University	Course	Title	Year	Note
McMaster University	BIOCHEM 3AB3 †	Antibiotics are the Cornerstone of Medicine	3	2025/2026 outline states no textbook. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3BP3 †	Practical Bioinformatics in the Genomics Era	3	2026/2027 outline states no textbook. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3CB3 †	Emerging Discovery in Cell Biology	3	Fall 2026 Simple Syllabus printout (image PDF) read by OCR; states "No textbook used". Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3GN3 †	Biochemical and Molecular Foundations of Genetics	3	Winter 2026 outline; literature and book chapters/online resources supplied. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3LA3 †	Biochemistry laboratory (title not read in outline text)	3	Winter 2026 lab outline; requires a lab notebook from the campus store; no textbook named. Course title not captured. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3LT3 †	Biochemistry laboratory (title not read in outline text)	3	Lab outline; requires a lab notebook from the campus store; no textbook named. Course title not captured. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3MI3 †	Microbial Interactions	3	Fall 2025 outline. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 3Z03 †	Structural Determination and Analysis of Macromolecules	3	2026 Winter outline; no textbook or materials statement found. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 4C03 †	Inquiry in Biochemistry	4	2026 Winter outline; readings posted on A2L; no textbook named. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 4E03 †	Gene Regulation in Stem Cells and Development	4	2025 Fall outline. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 4H03 †	Drug Discovery and Biotechnology	4	Term 2 (2025) outline; no textbook statement found. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	NEXUS 4A06 †	How to Survive a Pandemic: Capstone Project for Nexus Minor	4	Fall 2026/Winter 2027 independent-project outline; no textbook named. Outline PDF obtained via macdrive share link listed on the department course-outlines page https://biochem.healthsci.mcmaster.ca/education/undergraduate/course-outlines/ ; link fetched with ?dl=1.
McMaster University	BIOCHEM 720	Scientific Communication	graduate	Graduate courses page lists the course with description and instructor; no textbook named. Course outlines for 700-level courses not published on the page.
McMaster University	BIOCHEM 732	Writing for Science	graduate	Graduate courses page lists the course with description and instructor; no textbook named. Course outlines for 700-level courses not published on the page.
McMaster University	BIOCHEM 733	Biomedical Commercialization and Entrepreneurship	graduate	Graduate courses page lists the course with description and instructor; no textbook named. Course outlines for 700-level courses not published on the page.
McMaster University	BIOCHEM 734	Advanced Techniques in the Biomedical Sciences	graduate	Graduate courses page lists the course with description and instructor; no textbook named. Course outlines for 700-level courses not published on the page.
McMaster University	BIOCHEM 735	Antimicrobial Resistance	graduate	Graduate courses page lists the course with description and instructor; no textbook named. Course outlines for 700-level courses not published on the page.
Queen's University	ANAT 215 †	Principles of Human Morphology I	2	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	BCHM 218 †	Molecular Biology	2	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	BCHM 270 †	Biochemical Basis of Health and Disease	2	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	MICR 221 †	Fundamental Microbiology	2	

University	Course	Title	Year	Note
Queen's University	PHGY 215 †	Principles of Mammalian Physiology I	2	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	BCHM 311 †	General Biochemistry Laboratory	3	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	BCHM 313 †	Molecular Biochemistry	3	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.
Queen's University	BCHM 316 †	Metabolism	3	DBMS course page (description, prerequisites, evaluation) has no "Textbooks and Materials" statement naming a text.

University of Guelph	MCB*3010 †	Dynamics of Cell Function and Signaling	3	Title from Guelph calendar course list; restricted elective in BIOC major. No MCB*3010 outline located (searches returned none).

University	Course	Title	Year	Note
University of Guelph	BIOC*4050	Protein and Nucleic Acid Structure	4	Fall 2023 outline. Restricted elective in the BIOC major (Guelph calendar program page).
University of Guelph	MCB*4010 †	Advanced Cell Biology	4	Winter 2022 outline (latest located); refers students to resources used in MCB*2050 and MCB*3010.
University of Guelph	MCB*4600 †	Topics in Molecular and Cellular Biology	4	Winter 2024 outline; resources are Courselink only; no textbook named.
University of Guelph	MCB*6370	Protein Structural Biology and Bioinformatics	graduate	Winter 2023 graduate outline; resources are Courselink lecture notes, PyMOL, Google Colab; no textbook named.
University of Ottawa	BCH 2333 †	Introduction to Biochemistry	2	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 3120 †	General Intermediary Metabolism	3	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 3125 †	Protein Structure and Function	3	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 3170 †	Molecular Biology	3	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 3346 †	Biochemistry Laboratory II	3	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 3356 †	Molecular Biology Laboratory	3	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 4116 †	Analytical Biochemistry	4	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Ottawa	BCH 4122 †	Structural Biology of Proteins 1	4	Course listed as compulsory in the Honours BSc Biochemistry calendar page (also described at https://catalogue.uottawa.ca/en/courses/bch/). Calendar entries carry no textbook. No public outline, bookstore listing or library reserve page could be fetched (uottawa.ca bookstore/library course-reserve URLs tried returned 404; Brightspace outlines are not public).
University of Toronto	BCH210H1 †	Biochemistry I: Proteins, Lipids and Metabolism	2	Department course page (description, prerequisites, coordinator) names no text. Department says BCH210H is intended for most life-science programs (undergraduate-courses page).
University of Toronto	BCH311H1 †	Biochemistry II: Nucleic Acids and Biological Information Flow	3	Department course page names no text.
University of Toronto	BCH340H1 †	Proteins: Structure and Function	3	Department course page names no text.
University of Toronto	BCH370H1 †	Laboratory Course in Biochemical Techniques	3	Lab manual provided online.
University of Toronto	BCH377H1 †	Biochemistry Laboratory I	3	Department course page names no text.
University of Toronto	BCH426H1 †	Regulation of Signalling Pathways	4	Department course page names no text.
University of Toronto	BCH428H1 †	Genomics of Microbial Communities: Human Health and Beyond	4	Department course page names no text.
University of Toronto	BCH440H1 †	Protein Homeostasis	4	Department course page names no text.

Wilfrid Laurier University	CH358 †	Visualization and Analysis of Biomolecules	3	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH390 †	Chemical Literature and Scientific Communication	3	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH419 †	Principles of Biochemical Toxicology	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH450 †	Enzymology	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH452 †	Capstone Biochemistry Laboratory	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH453 †	Molecular Principles of Drug Design	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH454 †	Bioinformatics: Genomics and Proteomics	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH456 †	Medicinal Chemistry	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.

University	Course	Title	Year	Note
Wilfrid Laurier University	CH458 †	Molecular Approaches to Diagnostics and Therapy	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
Wilfrid Laurier University	CH459 †	Biochemistry III: Membrane Transport, Signal Transduction and Anabolic Pathways	4	Required in Honours BSc Biochemistry and Biotechnology per 2026/2027 calendar. No outline, bookstore (bookstore.wlu.ca did not resolve) or reserve listing readable; web search found no Laurier outline.
York University	SC/BIOL 1500 †	Introduction to Biology	1	Outline states no textbook is required.
York University	SC/BIOL 2070 †	Research Methods in Cell and Molecular Biology	2	Summer 2026 outline; readings via Perusall.
York University	SC/BIOL 2080 †	Ecology in Practice - Research Fundamentals in Ecology and Evolution	2	Fall 2025 outline.
York University	SC/BIOL 4005 †	The Scientific Method: Applications and Controversies	4	
York University	SC/BIOL 4020 †	Genomics	4	
York University	SC/BIOL 4030 †	Proteomics	4	
York University	SC/BIOL 4120 †	Applied Immunology	4	
York University	SC/BIOL 4141 †	Current Topics and Methods in Cell Biology	4	
York University	SC/BIOL 4150 †	Cellular Regulation	4	
York University	SC/BIOL 4285 †	Human Molecular Genetics	4	
York University	SC/BIOL 4290 †	Biotechnology	4	Lab manual and notebook required.
York University	SC/BIOL 4400 †	Behavioural Genetics	4	
York University	SC/CHEM 4051/5051 †	Biological Chemistry	4	Cross-level 4000/5000 (also graduate). Undated outline.
York University	SC/CHEM 4052/5052 †	Chemical Biology	4	2023-24 syllabus; cross-level with graduate CHEM 5052.
York University	SC/CHEM 4055 †	Enzyme Design in Virtual Reality	4	Winter 2025.
York University	SC/CHEM 4093 †	Biomaterials Chemistry	4	Undated outline.
York University	SC/5051	Biological Chemistry	graduate	Graduate listing of the same cross-level outline as the 4000-level course. Cross-level 4000/5000 (also graduate). Undated outline.
York University	SC/5052	Chemical Biology	graduate	Graduate listing of the same cross-level outline as the 4000-level course. 2023-24 syllabus; cross-level with graduate CHEM 5052.
Bishop's University			not_stated	Coop Bishop's page fetched: online orders currently unavailable; program page names no texts. No texts found
Concordia University			not_stated	Calendar URLs guessed (sec31) returned 404; bookstore URLs returned 404/unreachable. No texts found
McGill University			graduate	No graduate (BIOC 6xx) texts found in any fetched source; Campus Store Fall 2026 lists no graduate BIOC.
McGill University	BIOC 212		not_stated	Catalogue entry fetched; names no text. Not in McGill Campus Store Fall 2026 course-materials autocomplete (only BIOC 311 listed under BIOC). No outline found.
McGill University	BIOC 312		not_stated	Catalogue entry fetched; names no text. Not in McGill Campus Store Fall 2026 course-materials autocomplete (only BIOC 311 listed under BIOC). No outline found.
McGill University	BIOC 454		not_stated	Catalogue entry fetched; names no text. Not in McGill Campus Store Fall 2026 course-materials autocomplete (only BIOC 311 listed under BIOC). No outline found.
McGill University	BIOC 458		not_stated	Catalogue entry fetched; names no text. Not in McGill Campus Store Fall 2026 course-materials autocomplete (only BIOC 311 listed under BIOC). No outline found.
Université Laval	BCM-1001	Biochimie structurale	not_stated	Code/title from program page. Year not stated on the page. ulaval.ca course page (BCM-1001 checked) names no text; plans de cours are in Capsule behind login; Coop Zone course search is a JS app and could not be queried
Université Laval	BCM-1003	Métabolisme et régulation (title as truncated on program page)	not_stated	Code/title from program page. Year not stated on the page. ulaval.ca course page (BCM-1001 checked) names no text; plans de cours are in Capsule behind login; Coop Zone course search is a JS app and could not be queried
Université Laval	BCM-1005	Génétique moléculaire I	not_stated	Code/title from program page. Year not stated on the page. ulaval.ca course page (BCM-1001 checked) names no text; plans de cours are in Capsule behind login; Coop Zone course search is a JS app and could not be queried
Université Laval	BCM-2000	Génétique moléculaire II	not_stated	Code/title from program page. Year not stated on the page. ulaval.ca course page (BCM-1001 checked) names no text; plans de cours are in Capsule behind login; Coop Zone course search is a JS app and could not be queried
Université Laval	BCM-2001	Protéines	not_stated	Code/title from program page. Year not stated on the page. ulaval.ca course page (BCM-1001 checked) names no text; plans de cours are in Capsule behind login; Coop Zone course search is a JS app and could not be queried

Université de Moncton	BICH3843 †	Introduction au métabolisme	3	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH3913 †	Introduction aux protéines	3	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH4413 †	Biologie moléculaire avancée	4	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH4523 †	Biochimie clinique	4	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH4833 †	Métabolisme intermédiaire	4	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH4913 †	Immunologie	4	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH6233	Aspects avancés de biochimie	graduate	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH6423	Mécanismes macromoléculaires	graduate	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Université de Moncton	BICH6522	Biochimie des lipides	graduate	Course repertoire (JSON endpoint) lists descriptions and learning outcomes only; no plan de cours, bookstore or reserve listing could be read. Year inferred from course number (first digit).
Dalhousie University	BIOC 1420 †	Introductory Biochemistry for Nursing Students	1	Winter 2025 syllabus; no text named. Nursing service course (health-science elective for others). Year of study inferred from course number only.
Dalhousie University	BIOC 4010 / 5010 †	Bioinformatics	4	No required text. Cross-listed with a graduate section (5010). Recommended books follow in the next two rows.
St. Francis Xavier University	CHEM 151 †	Fundamentals of General and Biological Chemistry	1	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
St. Francis Xavier University	CHEM 221 †	Introductory Organic Chemistry I	2	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
St. Francis Xavier University	CHEM 255 †	Introductory Biochemistry	2	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
St. Francis Xavier University	CHEM 355 †	Advanced Biochemistry	3	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
St. Francis Xavier University	CHEM 451 †	Bio-Organic Chemistry I	4	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
St. Francis Xavier University	CHEM 455 †	Medicinal Chemistry	4	stfx.ca returns 403 to direct fetch; archived copy read. No outline, bookstore or reserve page found. StFX has no separate biochemistry department: biochemistry is a concentration within the BSc Chemistry program. Year inferred from course number.
Memorial University of Newfoundland	HUBI 1430 †	Biochemistry for Health Professionals	1	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.

University	Course	Title	Year	Note
Memorial University of Newfoundland	HUBI 2001 †	Introduction to Biochemistry	2	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
Memorial University of Newfoundland	HUBI 2003 †	Basics of Human Metabolism	2	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
Memorial University of Newfoundland	HUBI 2004 †	Fundamentals of Modern Molecular Biology	2	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
Memorial University of Newfoundland	HUBI 3003 †	Proteins and Health	3	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
Memorial University of Newfoundland	HUBI 3105 †	Physical Biochemistry	3	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
Memorial University of Newfoundland	HUBI 3207 †	Nucleic Acid Biochemistry and Molecular Biology	3	Memorial's Biochemistry programs are closed and Human Biosciences is the successor. Calendar read (archived 2025-26); no outline, bookstore or reserve listing could be read. Memorial bookstore (shop.mun.ca) course search is a JS app and was not queryable. Year inferred from course number.
